Analysis of Insurance Premiums and Payouts for 1987-1988 Designated High Theft Rate Passenger Cars

The Power Report on Automotive Marketing

In *Comeback*, Pulitzer Prize-winners Paul Ingrassia and Joseph B. White take us to the boardrooms, the executive offices, and the shop floors of the auto business to reconstruct, in riveting detail, how America's premier industry stumbled, fell, and picked itself up again. The story begins in 1982, when Honda started building cars in Marysville, Ohio, and the entire U.S. car industry seemed to be on the brink of extinction. It ends just over a decade later, with a remarkable turn of the tables, as Japan's car industry falters and America's Big Three emerge as formidable global competitors. *Comeback* is a story propelled by larger-than-life characters -- Lee Iacocca, Henry Ford II, Don Petersen, Roger Smith, among many others

-- and their greed, pride, and sheer refusal to face facts. But it is also a story full of dedicated, unlikely heroes who struggled to make the Big Three change before it was too late.

the relationship between employment growth and output growth is greatly affected by the functioning, efficiency and institutional structure of the labor market. --Joseph Stiglitz, Chief Economist Despite the resumption of economic growth in

most LAC countries since the late 1980s, improvements on the employment/unemployment front have been sluggish at best, with a few notable exceptions. In many countries, renewed growth in LAC in the 1990s has so far failed to generate adequate new jobs in place of those lost during the adjustment, and to restore wages to pre-crisis levels. The focus of this book is on: • the performance of labor markets in the LAC region since the beginning of significant structural reforms most countries in the region have undertaken • the structure of labor markets, institutions, and incentive structures; • the effects of that structure on employment, earnings, income distribution, and poverty levels; • the role of labor market institutions in labor market trends; • the options for reform and the benefits of comprehensive labor reforms, as evidenced inside and outside the region; • labor policy reforms to improve in a sustainable way the employment/unemployment outlook.

“Vintage Iacocca . . . He is fast-talking, blunt, boastful, and unabashedly patriotic. Lee Iacocca is also a genuine folk hero. . . . His career is breathtaking.”—Business Week He’s an American legend, a straight-shooting businessman who brought Chrysler back from the brink and in the process became a media celebrity, newsmaker, and a man many had urged to run for president. The son of Italian immigrants, Lee Iacocca rose spectacularly through the ranks of Ford Motor Company to become its president, only to be toppled eight years later in a power play that should have shattered him. But Lee Iacocca didn’t get mad, he got even. He led a battle for Chrysler’s survival that made his name a symbol of integrity, know-how, and guts for millions of Americans. In his classic hard-hitting style, he tells us how he changed the automobile industry in the 1960s by creating the phenomenal Mustang. He goes behind the scenes for a look at Henry Ford’s reign of intimidation and manipulation. He recounts the miraculous rebirth of Chrysler from near bankruptcy to repayment of its \$1.2 billion government loan so early that Washington didn’t know how to cash the check.

The Critical Path

Anybody who wanted to go toe to toe with the Big Three in the 1960s had to produce credible muscle cars. American Motors Corporation did exactly that with the SC Rambler and the incredibly fast AMX. Some argue, however, that AMC's insistence on pouring its relatively limited resources into the "muscle wars" ultimately led to its demise. Illustrated throughout with modern photography of restored and factory-original cars, archival images, AMC concept drawings, period advertisements, and cutaway illustrations, this color history primarily focuses on the conception, development, production, and performance of the AMX, as well as the Javelin upon which it was based. Special models like the Mark Donohue Signature Edition Javelin, along with the less-than-well-received Marlin, Rebel, SST, Hornet 360, Gremlin X, and others are also included.

The truck's role in American society changed dramatically from the 1960s through the 1980s, with the rise of off-roaders, the van craze of the 1970s and minivan revolution of the 1980s, the popularization of the SUV as family car and the diversification of the pickup truck into multiple forms and sizes. This comprehensive reference book follows the form of the author's popular volumes on American cars. For each year, it provides an industry overview and, for each manufacturer, an update on new models and other news, followed by a wealth of data: available powertrains, popular options, paint colors and more. Finally, each truck is detailed fully with specifications and measurements, prices, production figures, standard equipment and more.

The Evolution of Local Dealerships

In the early 1970s, Chrysler started working on a "magic wagon" -- a completely new passenger van that would fit into a normal garage. It was a daring project for a company that was strapped for cash. This book taps the people who created the minivans, with previously unpublished photos of the original clay models. It is not just a story of a vehicle, but of the people who pushed it through the development process, brought it to life, and refreshed it in the face of intense competition. Engineers, planners, and designers started arguing over alternatives ten years before the first van left the factory. This book dives into the reasons behind their decisions, and some of the ways minivans could have been very different; it also covers electric and CNG minivans, engines and transmissions, concept cars, and the assembly plants. The paperback is generously illustrated with full-color design studies and photos of the final product; the Kindle version has fewer photos, but still covers the original clay models and the concepts. "It's incredibly rare when the auto industry creates an entirely new class of vehicle, and rarer still when that innovation is an unqualified success story, but such was the case with Chrysler and the development of the minivan. "In Mopar Minivans, Zatz uses the people who were there to retell in vivid detail the largely forgotten story of how this innovative people mover evolved into a quintessential piece of American family life for two generations. It's a story that showcases not only how the automotive industry can work at its best, but also the ways that

the industry's prevalent groupthink mentality can stifle innovation." -- Larry Vellequette, Automotive News "I am amazed how complete you are, having not been on-site in the front trenches during agreements, disagreements, and, yes, even skirmishes, at times." -- Chrysler employee David Zatz founded Chrysler-focused web site allpar.com; he also holds a Ph.D. in social and organizational psychology from Columbia University, and has been a business consultant for 20 years.

The story of how Chrysler's minivan team created an automobile that captured the 1995 Motor Trend Car of the Year and other major awards - and reinvented a perilously entrenched corporation in the process - is as dramatic and inspiring a story as any in business today. Brock Yates, one of the most respected writers in the auto world, was given unprecedented

access to Chrysler - every planning session, presentation, budget review, test drive, assembly line start-up, and marketing launch. The result is a book that unveils the mysteries of modern car-making, revealing how cars are shaped through countless interlinked decisions ranging from size and power to door configurations, color selections, and innumerable other interconnected details. It also captures the complex process by which the thousands of separate pieces that make up a car are designed, tested, manufactured, and marshaled into place at the exact moment they are needed. For any reader who cares about cars, this is the most intriguing look inside the mysteries of their creation ever written. At the same time, *The Critical Path* recounts an extraordinary drama of all-too-human managers attempting to make something new, in a new way, inside a corporate culture that resists them at every turn. The story of how Chrysler's minivan platform team kept their commitment to quality, schedule, and budget - with a \$3 billion investment and the company's fate palpably in the balance - is as encouraging a tale as has emerged from American business in years. The unprecedented triumph and Chrysler's resultant comeback is a lesson in successful management that will be savored by any reader interested in how great companies make breakthrough products.

America Dreaming Longshots

From the Chrysler Six of 1924 to the front-wheel-drive vehicles of the 70s and 80s to the minivan, Chrysler boasts an impressive list of technological "firsts." But even though the company has catered well to a variety of consumers, it has come to the brink of financial ruin more than once in its seventy-five-year history. How Chrysler has achieved monumental success and then managed colossal failure and sharp recovery is explained in *Riding the Roller Coaster*, a lively, unprecedented look at a major force in the American automobile industry since 1925. Charles Hyde tells the intriguing story behind Chrysler-its products, people, and performance over time-with particular focus on the company's management. He offers a lens through which the reader can view the U.S. auto industry from the perspective of the smallest of the automakers who, along with Ford and General Motors, make up the "Big Three." The book covers Walter P. Chrysler's life and automotive career before 1925, when he founded the Chrysler Corporation, to 1998, when it merged with Daimler-Benz. Chrysler made a late entrance into the industry in 1925 when it emerged from Chalmers and Maxwell, and further grew when it absorbed Dodge Brothers and American Motors Corporation. The author traces this journey, explaining the company's leadership in automotive engineering, its styling successes and failures, its changing management, and its activities from auto racing to defense production to real estate. Throughout, the colorful personalities of its leaders-including Chrysler himself and Lee Iacocca-emerge as strong forces in the company's development, imparting a risk-taking mentality that gave the company its verve.
