From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without

cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

Lavishly illustrated with thousands of charts, checklists and color photographs, this is an obsessive examination of legendary toy company Mego, and the extraordinary line of super-hero action figures that dominated the toy industry throughout the 1970s. Featuring a chronological history of Mego, interviews with former employees and Mego vendors, fascinating discoveries never revealed elsewhere, and thorough coverage of each figure and packaging variant, this full-color hardcover is the definitive guide to Mego.

### **Science and Technology Annual Reference Review**

Albania provides a small amount of social assistance to nearly 20% of its population through a system which allows a degree of community discretion in determining distribution. This study investigates the poverty targeting of this program. It indicates that relative to other safety net programs in low income countries, social assistance in Albania is fairly well targeted to the poor.

### **Motorcycle Workshop Practice Techbook**

"A kindergarten-level introduction to the motorized vehicles known as snowmobiles, covering their purpose, parts, and operation, and such defining features as their runners and tracks"--

### **How to Restore Your Harley-Davidson**

TRX300/Fourtrax 300, TRX300FW/Fourtrax 300 4x4

### **Clymer Yamaha YX600 Radian & FZ600, 1986-1990**

### **Power Farming**

### **Snowmobiles**

The Army often uses vehicles informally classified as ultra-light tactical mobility (UTM). This report assesses the demands, requirements, current ad hoc capabilities, and key considerations for developing and sustaining established Army UTM fleets.
