## **The Boat Rocker**

The Boat Rocker is a poetry of life that both presents a philosophy of life and describes an art of living that has been learned the hard way-by actually living a life; by having tasted all the joys life offers and having suffered many of the tragedies and pains life inevitably brings as well. While The Boat Rocker will not help a person to avoid all tragedy and pain-those are a part of every life-it will help everyone who takes it's message to heart to avoid some needless suffering and to get through whatever vale of tears is encountered through a simple act of faith, for fidelity is everything in life-fidelity to self, fidelity to our loved ones, fidelity to our purpose in life, and fidelity to God. These are essential for a well-lived, rewarding life. But love is the heart and soul of faith, and faith is but love made real.

From dirt bikes and jet skis to weed wackers and snowblowers, machines powered

by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.
