towns as an element of national policy. The various stages and the conclusions of this re-appraisal are discussed, and the new towns' role in the supposed 'urban crisis' is analysed. This title will be of interest to students of urban studies and development.

Awarded the Nobel Prize for Literature in 1969, Samuel Beckett's influence on 20th century fiction and drama is immeasurable. Published in conjunction with the RT (Radio Telef s ireann) Thomas Davis Lecture Series to mark the centenary of Beckett's birth, Samuel Beckett - 100 Years consists of thirteen essays by many of the foremost academics studying Beckett today. Literary luminaries such as John Banville and Anthony Cronin line up alongside philosophers Dermot Moran and Richard Kearney to delve into the psyche of the man responsible for classics such as Murphy, Krapp's Last Tape, and Waiting for Godot, while actors Barry McGovern and Rosemary Pountney describe what makes his works so theatrical. The book is a challenging and serious look at Beckett's work and its impact on literature today.

Matrix groups touch an enormous spectrum of the mathematical arena. This textbook brings them into the undergraduate curriculum. It makes an excellent one-semester course for students familiar with linear and abstract algebra and prepares them for a graduate course on Lie groups. Matrix Groups for Undergraduates is concrete and example-driven, with geometric motivation and rigorous proofs. The story begins and ends with the rotations of a globe. In between, the author combines rigor and intuition to describe the basic objects of Lie theory: Lie algebras, matrix exponentiation, Lie brackets, maximal tori, homogeneous spaces, and roots. This second edition includes two new chapters that allow for an easier transition to the general theory of Lie groups.

The Asian Grandmothers Cookbook

Asian grandmothers — whether of Chinese, Japanese, Indonesian, Vietnamese, or Indian descent — are the keepers of the cultural, and culinary, flame. Their mastery of delicious home-cooked dishes and comfort food makes them the ideal source for this cookbook. Author Pat Tanumihardja has assembled 130 tantalizing dishes from real Chinese fried rice to the classic Filipino Chicken Adobo to the ultimate Japanese comfort dish Oyako donburi. This is hearty food, brightly flavored, equally good to look at and eat. Flavors range from soy and ginger to hot chiles, fragrant curries, and tart vinegars. The author has translated all of the recipes to work in modern home kitchens. Many of them have been handed down from mother to daughter for generations without written recipes, and some appear

in tested and written form for the first time. An exhaustive Asian Pantry glossary explains the ingredients, from the many kinds of rice and curries to unfamiliar but flavorful vegetables.

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published

as *Auto Repair For Dummies*, 2nd Edition (9780764599026). While this version features a new *Dummies* cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated. Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the *Los Angeles Times* and has been interviewed on the *Today* show, *NBC Nightly News*, and other television programs.
