Interventional cardiology is a creative, innovative, and rapidly advancing frontier of cardiology. There has been mind-boggling proliferation of technology in this field, the use of which requires extraordinary skills and know how. In order to keep pace with the innovative genius of interventional cardiologists, it is indeed desirable to have specialty issues updating us on technology-orientated therapeutic procedures. Contemporary interventional cardiology care is a highly specialized art, dependent on critical decision making, selection of the most appropriate interventional procedure, and the operator possessing extraordinary skills and compassion. This first volume of the new series, Supported Complex and High Risk Coronary Angioplasty, attests to the preceding statement. Dr. Fayaz Shawl has mastered the procedure and has been very thoughtful and innovative in the clinical application of the percutaneous cardiopulmonary bypass support technique. This book provides to an interventionist the basic principles of cardiopulmonary bypass, identification of the high risk coronary angioplasty patient, and other alternate support devices for myocardial protection. Dr. Shawl and his team of talented contributors are to be complimented for providing us with this impressive volume on high technology. There will be ongoing specialty issues in this series highlighting the developments, complications, and advances in interventional cardiology.

To the rescue comes Anjali's wealthy, dictatorial Uncle Jeevan and his business partner, Rishi Shah--a mysterious Londoner, complete with British accent, cool gray eyes, and skin so fair it makes it hard to believe he's Indian. And the feeling is mutual. . . Love disappointed Anjali once before and she's vowed to live without it--though Rishi is slowly melting her resolve and, as the shop regains its footing, gaining her trust. Social justice has always been a core value driving public health. Today, much of the etiology of avoidable disease is rooted in inequitable social conditions brought on by disparities in wealth and power and reproduced through ongoing forms of oppression, exploitation, and marginalization. *Tackling Health Inequities Through Public Practice* raises questions and provides a starting point for health practitioners ready to reorient public health practice to address the fundamental causes of health inequities. This reorientation involves restructuring the organization, culture and daily work of public health. *Tackling Health Inequities* is meant to inspire readers to imagine or envision public health practice and their role in ways that question contemporary thinking and assumptions, as emerging trends, social conditions, and policies generate increasing inequities in health.

placing a mathematical symbol directly after a punctuation mark. And it provides many examples of what students should think and what they should write and how these two are often not the same.

Memphis has always been a theatrical town—a crossroads in the center of America for entertainment as well as commerce. Movies are among the many things that travel through the city, both for distribution and exhibition. Thousands of people who have lived here or just passed through, especially during and after World War II, found their way to the movie theatres. From the vaudeville palaces on Main Street to the nickelodeons on Beale Street, these theatres helped shape the culture of the city. Kemmons Wilson operated movie houses before he built the first Holiday Inn. Several movie theatres played roles in the life of Elvis Presley. W.C. Handy attended the opening of a theatre named for him. Local censorship practices influenced decisions in Hollywood, and the first multiplex in the region was built in Memphis.

A remarkable series of lectures on the art of creating effective nonfiction by one of the 20th century's most profound writers and thinkers--now available for the first time in print. Culled from sixteen informal lectures Ayn Rand delivered to a select audience in the late 1960s, this remarkable work offers indispensable guidance to the aspiring writer of nonfiction while providing readers with a fascinating discourse on art and creation. Based on the concept that the ability to create quality

nonfiction is a skill that can be learned like any other, The Art of Nonfiction takes readers through the writing process, step-by-step, providing insightful observations and invaluable techniques along the way. In these edited transcripts, Rand discusses the psychological aspects of writing, and the different roles played by the conscious and unconscious minds. From choosing a subject to polishing a draft to mastering an individual writing style--for authors of theoretical works or those leaning toward journalistic reporting--this crucial resource introduces the words and ideas of one of our most enduring authors to a new generation.

Jihad Incorporated is the seminal, comprehensive resource on radical Islam in the United States documenting the post-9/11 machinations of terrorist operatives and front groups inside our borders, from al-Qaeda and its affiliates to Hamas and Hizballah. Emerson provides key insights into current dilemmas faced by counterterrorism officials, a must-read for law enforcement, academics, government officials, and concerned citizens alike. Essential reading in any serious effort to better understand the character and evolution of militant Islam. - JOURNAL OF COUNTERTERRORISM AND HOMELAND SECURITY INTERNATIONAL

Jihad Incorporated is an incredibly informative look into the infiltration of terrorism into American society both before and after 9/11. The extent of the radical activity here in the United States that is uncovered by Emerson's book is truly eye opening. A scary reminder of the prevalence of terrorism in American society. - RICHARD CLARKE, Chair of the Counter-Terrorism Security Group (1992-2003)

What is the structure of al Qaeda and radical Islamic activity in the United States today? How has it evolved since 9/11? To what extent does domestic radical Islamism pose a threat to US national security at home and abroad? The Investigative Project on Terrorism, founded in 1995 by Steven Emerson, maintains the largest nongovernmental data and intelligence library in the world on militant Islam. The Project assists the White House, the FBI, the Justice Department, Department of Homeland Security, and other government departments with counterterrorism activities. Together with a staff of experts, Executive Director Steven Emerson has compiled this thorough factual overview of the Islamist terrorist threat to the United States. Unlike The 9/11 Commission Report, which was focused mainly on the retrospective analysis of al Qaeda activities leading up to the attack of September 11, 2001, Jihad Incorporated provides an in-depth examination of radical terrorist organizations and their financial support networks operating in the United States and abroad. Divided into three sections, the work first sets the stage for the current situation by reviewing the lessons learned from previous terrorist plots and attacks both within our borders and against American interests abroad. Emerson and colleagues profile key players in the terrorist network and describe their various criminal activities before and since 9/11. The second section analyzes organizations in the Middle East besides al Qaeda that have established ties in the United States: Hamas, Hizballah, the Palestinian Islamic Jihad, and radical groups in Pakistan. The third section analyzes the subtle, wide-ranging support system for terrorist activities that exists within our own borders: charities and foundations that secretly solicit for terror; the complex corporate web of companies, charities, and nonprofit corporations known as the SAAR Network; mosques that provide cover for terrorists; the use of the Internet for terrorist communication; and lobbying efforts by Muslim American organizations to influence the top echelons of the federal government. In a dangerous age, this is an important book for all Americans to read.

Further Praise for Jihad Incorporated: When it comes to the jihadist threat against the United States, Steve Emerson had the field lapped before most Americans - including those now fighting the battle at the highest levels of government - even knew the race was on. His groundbreaking, prophetic documentary, Jihad in America, awakened the nation to the peril lurking among us even before al Qaeda's onslaught began in the mid-1990s. With Jihad Incorporated, he demonstrates yet again why he remains our country's premier expert on the arc of Islamic terrorism and why his organization, the Investigative Project on Terrorism, has become such a singular resource. - ANDREW C. McCARTHY, former federal prosecutor, Contributor at National Review Online, and Senior Fellow, Foundation

The quasi-federal European Union stands out as the major exception in the thinly institutionalized world of international politics. Something has led Europeans—and only Europeans—beyond the nation-state to a fundamentally new political architecture. Craig Parsons argues in *A Certain Idea of Europe* that this "something" was a particular set of ideas generated in Western Europe after the Second World War. In Parsons's view, today's European Union reflects the ideological (and perhaps visionary) project of an elite minority. His book traces the progressive victory of this project in France, where the battle over European institutions erupted most divisively. Drawing on archival research and extensive interviews with French policymakers, the author carefully traces a fifty-year conflict between radically different European plans. Only through aggressive leadership did the advocates of a supranational "community" Europe succeed at building the EU and binding their opponents within it. Parsons puts the causal impact of ideas, and their binding effects through institutions, at the center of his book. In so doing he presents a strong logic of "social construction"—a sharp departure from other accounts of EU history that downplay the role of ideas and ideology.

The Dignitas clinic in Switzerland may be a long way away. But the issues around euthanasia can suddenly become very close to home. To many, it seems remarkable that in a society where freedom of choice is eulogised, thousands of people find that there is one last choice that they are not free to make. But as this book will show, euthanasia is an issue at the intersection of new technology, old laws, and timeless ethical quandaries, so that even apparently clear-cut cases have many contradictions. Drawing on the latest research and cases from around the world, Richard Huxtable drills deep into the key issues around euthanasia. His is a new, balanced look at an important issue, and it will appeal to lawyers, medical

students and - most importantly - those who find themselves or their relatives faced with end of life dilemmas.

With no-holds-barred honesty and poignant storytelling, Nate Larkin introduces a model of community and friendship that is reinvigorating men's ministry across the country, a model he calls The Samson Society. Too many men see the biblical hero Samson as their model for manhood--a rugged individualist of the highest order. Yet, Samson's solitary successes were eventually overcome by moral weaknesses. Larkin, through the story of his own past and the stories of those in The Samson Society, offers a radical, refreshing alternative.

Teachers make a difference. The success of any plan for improving educational outcomes depends on the teachers who carry it out and thus on the abilities of those attracted to the field and their preparation. Yet there are many questions about how teachers are being prepared and how they ought to be prepared. Yet, teacher preparation is often treated as an afterthought in discussions of improving the public education system. *Preparing Teachers* addresses the issue of teacher preparation with specific attention to reading, mathematics, and science. The book evaluates the characteristics of the candidates who enter teacher preparation programs, the sorts of instruction and experiences teacher candidates receive in

preparation programs, and the extent that the required instruction and experiences are consistent with converging scientific evidence. Preparing Teachers also identifies a need for a data collection model to provide valid and reliable information about the content knowledge, pedagogical competence, and effectiveness of graduates from the various kinds of teacher preparation programs. Federal and state policy makers need reliable, outcomes-based information to make sound decisions, and teacher educators need to know how best to contribute to the development of effective teachers. Clearer understanding of the content and character of effective teacher preparation is critical to improving it and to ensuring that the same critiques and questions are not being repeated 10 years from now.
