AQA AS AND A-LEVEL SOCIOLOGY BRILLIANT EXAM NOTES (BOOK 1)

What happens to migrants after they are deported from the United States and dropped off at the Mexican border, often hundreds if not thousands of miles from their hometowns? In this eye-opening work, Jeremy Slack foregrounds the voices and experiences of Mexican deportees, who frequently become targets of extreme forms of violence, including migrant massacres, upon their return to Mexico. Navigating the complex world of the border, Slack investigates how the high-profile drug war has led to more than two hundred thousand deaths in Mexico, and how many deportees, stranded and vulnerable in unfamiliar cities, have become fodder for drug cartel struggles. Like no other book before it, *Deported to Death* reshapes debates on the long-term impact of border enforcement and illustrates the complex decisions migrants must make about whether to attempt the return to an often dangerous life in Mexico or face increasingly harsh punishment in the United States.

A2 Sociology for AQA is the definitive textbook for students following the AQA specification.

My Revision Notes: AQA A Level Sociology

Introduction to Sociology 2e adheres to the scope and sequence of a typical, one-semester introductory sociology course. It offers comprehensive coverage of core concepts, foundational scholars, and emerging theories, which are supported by a wealth of engaging learning materials. The textbook presents detailed section reviews with rich questions, discussions that help students apply their knowledge, and features that draw learners into the discipline in meaningful ways. The second edition retains the book's conceptual organization, aligning to most courses, and has been significantly updated to reflect the latest research and provide examples most relevant to today's students. In order to help instructors transition to the revised version, the 2e changes are described within the preface. The images in this textbook are grayscale. Authors include: Heather Griffiths, Nathan Keirns, Eric Strayer, Susan Cody-Rydzewski, Gail Scaramuzzo, Tommy Sadler, Sally Vyain, Jeff Bry, Faye Jones

Sociology, Gender and Educational Aspirations

A New York Times Bestseller Foreword by Stephen J. Dubner, coauthor of Freakonomics When first-year graduate student Sudhir Venkatesh walked into an abandoned building in one of Chicago's most notorious housing projects, he hoped

to find a few people willing to take a multiple-choice survey on urban poverty--and impress his professors with his boldness. He never imagined that as a result of this assignment he would befriend a gang leader named JT and spend the better part of a decade embedded inside the projects under JT's protection. From a privileged position of unprecedented access, Venkatesh observed JT and the rest of his gang as they operated their crack-selling business, made peace with their neighbors, evaded the law, and rose up or fell within the ranks of the gang's complex hierarchical structure. Examining the morally ambiguous, highly intricate, and often corrupt struggle to survive in an urban war zone, Gang Leader for a Day also tells the story of the complicated friendship that develops between Venkatesh and JT--two young and ambitious men a universe apart. "Riveting."--The New York Times "Compelling dramatic Venkatesh gives readers a window into a way of life that few Americans understand."--Newsweek "An eye-opening account into an underserved city within the city."--Chicago Tribune "The achievement of Gang Leader for a Day is to give the dry statistics a raw, beating heart."--The Boston Globe "A rich portrait of the urban poor, drawn not from statistics but from vivid tales of their lives and his, and how they intertwined."--The Economist "A sensitive, sympathetic, unpatronizing portrayal of lives that are usually ignored or lumped into ill-defined stereotype."--Financial Times Sudhir Venkatesh's latest book Floating City: A Rogue Sociologist Lost and Found in New York's Underground Economy--a memoir of sociological investigation revealing the true face of America's most diverse city--was published in September 2013 by Penguin Press

Sociology in Perspective

From the author of *The Presentation of Self in Everyday Life*, Stigma analyzes a person's feelings about himself and his relationship to people whom society calls "normal." Stigma is an illuminating excursion into the situation of persons who are unable to conform to standards that society calls normal. Disqualified from full social acceptance, they are stigmatized individuals. Physically deformed people, ex-mental patients, drug addicts, prostitutes, or those ostracized for other reasons must constantly strive to adjust to their precarious social identities. Their image of themselves must daily confront and be affronted by the image which others reflect back to them. Drawing extensively on autobiographies and case studies, sociologist Erving Goffman analyzes the stigmatized person's feelings about

himself and his relationship to “normals” He explores the variety of strategies stigmatized individuals employ to deal with the rejection of others, and the complex sorts of information about themselves they project. In *Stigma* the interplay of alternatives the stigmatized individual must face every day is brilliantly examined by one of America’s leading social analysts.

OCR Sociology for A Level Book 2

A groundbreaking exploration of how finding one's way later in life can be an advantage to long-term achievement and happiness. “What Yogi Berra observed about a baseball game—it ain't over till it's over—is true about life, and [Late Bloomers] is the ultimate proof of this. . . . It's a keeper.”—Forbes We live in a society where kids and parents are obsessed with early achievement, from getting perfect scores on SATs to getting into Ivy League colleges to landing an amazing

job at Google or Facebook—or even better, creating a start-up with the potential to be the next Google, Facebook or Uber. We see coders and entrepreneurs become millionaires or billionaires before age thirty, and feel we are failing if we are not one of them. Late bloomers, on the other hand, are under-valued—in popular culture, by educators and employers, and even unwittingly by parents. Yet the fact is, a lot of us—most of us—do not explode out of the gates in life. We have to discover our passions and talents and gifts. That was true for author Rich Karlgaard, who had a mediocre academic career at Stanford (which he got into by a fluke) and, after graduating, worked as a dishwasher and night watchman before finding the inner motivation and drive that ultimately led him to start up a high-tech magazine in Silicon Valley, and eventually to become the publisher of Forbes magazine. There is a scientific explanation for why so many of us bloom later in life. The executive function of our brains doesn't mature until age twenty-five, and later for some. In fact, our brain's capabilities peak at different ages. We actually experience multiple periods of blooming in our lives. Moreover, late bloomers enjoy hidden strengths because they take their time to discover their way in life—strengths coveted by many employers and partners—including curiosity, insight, compassion, resilience, and wisdom. Based on years of research, personal experience, interviews with neuroscientists, psychologists, and countless people at different stages of their careers, *Late Bloomers* reveals how and when we achieve our full potential. Praise for *Late Bloomers* “The underlying message that we should ‘consider a kinder clock for human development’ is a compelling

one.”—Financial Times “Late Bloomers spoke to me deeply as a parent of two millennials and as a coach to many new college grads (the children of my friends and associates). It’s a bracing tonic for the anxiety they are swimming through, with a facts-based approach to help us all calm down.”—Robin Wolaner, founder of Parenting magazine

The Sociology of Consumption

The classic work that redefined the sociology of knowledge and has inspired a generation of philosophers and thinkers In this seminal book, Peter L. Berger and Thomas Luckmann examine how knowledge forms and how it is preserved and altered within a society. Unlike earlier theorists and philosophers, Berger and Luckmann go beyond intellectual history and focus on commonsense, everyday knowledge—the proverbs, morals, values, and beliefs shared among ordinary people. When first published in 1966, this systematic, theoretical treatise introduced the term social construction, effectively creating a new thought and transforming Western philosophy.

A landmark work in sociology, cultural studies, and ethnography since its publication in 1977, Paul Willis's *Learning to Labor* is a provocative and troubling account of how education links culture and class in the reproduction of social hierarchy. Willis observed a working-class friendship group in an English industrial town in the West Midlands in their final years at school. These "lads" rebelled against the rules and values of the school, creating their own culture of opposition. Yet this resistance to official norms, Willis argues, prepared these students for working-class employment.

OCR Sociology Student Guide 1: Socialisation, culture and identity with family

With her characteristic brilliance, grace and radical audacity, Angela Y. Davis has put the case for the latest abolition movement in American life: the abolition of the prison. As she quite correctly notes, American life is replete with abolition movements, and when they were engaged in these struggles, their chances of success seemed almost unthinkable. For generations of Americans, the abolition of

slavery was sheerest illusion. Similarly, the entrenched system of racial segregation seemed to last forever, and generations lived in the midst of the practice, with few predicting its passage from custom. The brutal, exploitative (dare one say lucrative?) convict-lease system that succeeded formal slavery reaped millions to southern jurisdictions (and untold miseries for tens of thousands of men, and women). Few predicted its passing from the American penal landscape. Davis expertly argues how social movements transformed these social, political and cultural institutions, and made such practices untenable. In *Are Prisons Obsolete?*, Professor Davis seeks to illustrate that the time for the prison is approaching an end. She argues forthrightly for "decarceration", and argues for the transformation of the society as a whole.

Learning to Labor

The Sociology of Consumption: A Global Approach offers college students, scholars, and interested readers a state-of-the-art overview of consumption the desire for, purchase, use, display, exchange, and disposal of goods and services. The book's global focus, emphasis on social inequality, and analysis of consumer citizenship offer a timely, exciting, and original approach to the topic. Looking beyond the U.S. and Europe, Stillerman engages examples from his and others' research in Chile and other Latin American countries, Europe, the Middle East, Africa, and East and South Asia to explore the interaction between global and local forces in

consumption. The text explores the lived experience of being a consumer, demonstrating how social inequalities based on class, gender, sexuality, race, and age shape consumer practices and identities. Finally, the book uncovers the important role consumption has played in fueling local and international activism. This welcome new book will be ideal for classes on consumer culture across the social sciences, humanities, and marketing.

AQA Sociology BRILLIANT EXAM NOTES: Theory and Methods This book covers the following topic for the AQA A-level sociology (Year 2): Theory and Methods. Each section contains all the information that you will need for the AQA sociology exam. At the end of each section, we provide a comprehensive list of exam questions. These eBooks have been written by examiners and experienced teachers using their expertise to help students achieve the best possible grade in their exam. These exam notes have been carefully written using student friendly language and a layout that students will find easy to understand. Each topic has been broken down into exam notes which are more concise than general sociology text books but more comprehensive than standard revision guides. This content in this book follows the latest AQA sociology specification. Description How to get an A* DEAL EFFECTIVELY WITH THE EVALUATION PART OF THE EXAM: Contrary to popular belief, learning and memorising lots of facts and theories will not get you a grade A

or B in your exam. To achieve the highest grades possible, the exam requires you to be able to 'analyse' and 'evaluate' sociological knowledge, this does not mean jotting down a few brief criticisms at the end of your essay. The analysis and evaluation that you make, needs to be expanded upon and explained in an effective manner. With this in mind, we have written a lot of the evaluation points using the three-step-rule: identify, expand and conclude. We have done this for you in this book to demonstrate what a 'developed' evaluation point looks like. Please try and remember this technique and demonstrate it in your exam to achieve the highest grade possible. LOTS OF EXAM QUESTIONS: We have given you lots of exam questions at the end of each exam note to practise. We have covered most of the different types of questions you may be asked for each topic both at AS and at A Level. If you are taking the A level course, it is a good way of testing and practising both your knowledge and examination skills. You may realise some of the questions require the same answers, but are worded differently, this was deliberate, just so you are familiar with the different way the questions could be worded.

Folk Devils and Moral Panics

One in six children in the developed world is diagnosed as having 'developmental or behavioural problems' - this book explains why and shows what can be done about it. Children throughout the developed world are suffering: instances of

obesity, dyslexia, ADHD, bad behaviour and so on are all on the rise. And it's not simply that our willingness to diagnose has increased; there are very real and growing problems. Sue Palmer, a former head teacher and literacy expert, has researched a whole range of problem areas, from poor diet, lack of exercise and sleep deprivation to a range of modern difficulties that are having a major effect: television, computer games, mobile phones. This combination of factors, added to the increasingly busy and stressed life of parents, means that we are developing a toxic new generation. TOXIC CHILDHOOD illustrates the latest research from around the world and provides answers for worried parents as to how they can protect their families from the problems of the modern world and help ensure that their children emerge as healthy, intelligent and pleasant adults.

AQA SOCIOLOGY BRILLIANT EXAM NOTES

The second edition of Ken Browne's highly successful *Introducing Sociology* for AS-level provides in-depth and up-to-date coverage of the complete specification for AQA AS-level sociology. The first edition of this book was widely praised for its comprehensive coverage, and student-friendly style. In this second edition, all of the chapters have been revised to include new studies, reports and statistics. Key sociological terms are now systematically highlighted all the way through the book, and included in a comprehensive glossary, with fresh questions and activities

added to develop and test students' understanding further. Fuller consideration of issues of identity has been given throughout the text. More detailed advice has been provided on coursework, including a top-mark example to show students exactly what they have to do to achieve the highest grades. What's more, two authentic exam questions are now included on every topic. Pitched at exactly the right level for AS sociology, the book provides all the tools necessary to help students achieve top grades, and a sound basis for progression to A2. A host of cartoons, photographs, graphs, tables, and spider diagrams help to enliven the text, as well as reinforcing key issues. Web sites and web-based activities are included throughout, encouraging students to engage with the most recent social changes, and developments in sociology. Although it assumes no previous knowledge of sociology, its dedicated and in-depth coverage of all the AQA's AS topics provides a useful reference tool for the synoptic elements at A2. The second edition of *Introducing Sociology for AS Level* combines sociological rigour and accessibility in a way unrivalled by any other book at this level. It will be an invaluable resource to anyone following the AQA specifications.

Introducing Sociology for AS Level

There would be no need for sociology if everyone understood the social frameworks within which we operate. That we do have a connection to the larger picture is largely thanks to the pioneering thinker Émile Durkheim. He recognized

that, if anything can explain how we as individuals relate to society, then it is suicide: Why does it happen? What goes wrong? Why is it more common in some places than others? In seeking answers to these questions, Durkheim wrote a work that has fascinated, challenged and informed its readers for over a hundred years. Far-sighted and trail-blazing in its conclusions, Suicide makes an immense contribution to our understanding to what must surely be one of the least understandable of acts. A brilliant study, it is regarded as one of the most important books Durkheim ever wrote.

Late Bloomers

Girls are now out-performing boys at GCSE level, giving rise to a debate in the media on boys' underachievement. However, often such work has been a 'knee-jerk' response, led by media, not based on solid research. *Boys, Girls and Achievement - Addressing the Classroom Issues* fills that gap and: *provides a critical overview of the current debate on achievement; *Focuses on interviews with young people and classroom observations to examine how boys and girls see themselves as learners; *analyses the strategies teachers can use to improve the educational achievements of both boys and girls. Becky Francis provides teachers with a thorough analysis of the various ways in which secondary school pupils construct their gender identities in the classroom. The book also discusses methods teachers might use challenge these gender constructions in the classroom and thereby address the 'gender-gap' in achievement.
