Criminal Procedure, Cases and Materials

First published in 1999, *Acing Your First Year of Law School* has become one of the bestselling law school preparation books of all time. Every law student will tell you that the first year is the most important and the most frustrating. Law professors do not teach students the law, instead they leave students on their own to figure out the "answer" from a series of questions. This is a manual that teaches first year law students the ten basic skills they need to know to start learning their first day and ace their first year. The Second Edition has been updated to reflect the best use of technology. It includes a Preface that addresses the Socratic Method and how to beat it. It also includes an Epilogue that focuses on tasks that are necessary to ensure a successful transition from the first to the second semester.

Acing the Bar Exam

The memoir of the noted defense attorney offers insight into the machinations of the criminal justice system and some of the notorious cases in which she has been involved

The Academic Skills Handbook

How do societies at the national and international level try to overcome historical injustices? What remedies did they develop to do justice to victims of large scale atrocities? And, even more important, what have we learned from the implementation of these so-called instruments of transitional justice in practice? Lawyers, social scientists, and historians have published shelves full of books and articles on how to confront the past through international criminal tribunals, truth commissions, financial compensation schemes, and other instruments of retributive/punitive and restorative justice. A serious problem continues to be that broad interdisciplinary accounts that include both categories of measures are still hardly available. In this volume, a group of international experts in the field endeavors to fill this gap, and more. By alternating historical overviews with critical assessments, this volume does not only offer an extensive introduction to the world of transitional justice, but also food for thought concerning the effectiveness of the remedies it offers to face the past successfully. (Series: Series on Transitional Justice, Vol. 21) [Subject: Human Rights Law, Criminal Justice]

Criminal Procedure

Often, members of the public become engaged (or enraged) when they read about

Supreme Court decisions involving substantive rights, whether the case involves same sex marriage, the right of corporations to spend huge sums to support political candidates, or the right of citizens to own firearms. But members of the public, students, and even many lawyers are not likely to understand the impact of procedural decisions. This book focuses on a series of Supreme Court decisions and changes to the Federal Rules of Civil Procedure that demonstrate the current Court's erosion of rules allowing plaintiffs access to court. Many of those decisions unravel rules developed during the heyday of the Progressive Movement and the postwar era when courts favored expanding access to court. This book animates procedure by focusing on the Court's concerted effort to close the courthouse door. It covers a number of specific issues, including decisions and rules changes dealing with personal jurisdiction, pleading, discovery, summary judgment practice, and class actions. It explores the not-so-hidden bias in favor of defendants generally and corporate defendants specifically. It also briefly explores the impact that Justice Scalia's death may have on the future direction of the Court's war on procedure.

Acing Tort Law

This book provides a clear and concise explanation of corporations, agency and partnership, and the other subjects addressed in most Business Associations courses. To accompany its explanations, the guide utilizes a checklist format to lead students through questions they need to ask and issues they need to address, to fully evaluate the agency, partnership or corporations, problems they will face when studying this subject. It also synthesizes the material in a way that most students are unable to do on their own, and organizes the critical issues, presenting a clear guide to analyze business associations issues that students can draw upon when writing their exams. Other study aids provide sample problems, but this book offers a systematic approach to problem solving.

Acing Administrative Law

Contemporary Criminal Law presents a clean new approach to teaching criminal law to first year students. A consistent emphasis on the elements of crime centers the book on what matters most, and compelling exercises are rooted in the discretion of prosecutors and judges. Using only opinions from federal courts in the modern era, the book presents a coherence that is missing from texts rooted in a hodge-podge of time frames and jurisdictions. Narcotics, firearm crimes, and immigration all are addressed in complete chapters, reflecting the real-life world of criminal law as it now exists.

Acing Civil Procedure

This book leaves newcomers to criminal law with what they need most: key concepts they can remember! Too many criminal law guides bury the novice in detailed rules when nine times out of ten mastery of the fundamental concepts is the key to success on the exam or in practice. Remembering these concepts is made easier by a "forest before the trees" organization and the use of quirky, often funny examples that stick the concepts to the reader's memory. Bonus chapters offer valuable tips for students on how to succeed in the study of the law. You'll laugh and learn. Learn more about this series at ShortandHappyGuides.com.

This is the ideal book for the student who wants both a broad overview of how the parts of the process fit together and enough detail to understand the thorny problems that are most likely to arise on an exam and in practice. This book works equally well as a stand-alone text or as a supplement to a traditional casebook.
