Harrison's Principles of Internal Medicine - Wikipedia

Gastric volvulus is a rare clinical entity defined as an abnormal rotation of the stomach of more than 180°, creating a closed-loop obstruction that can result in incarceration and strangulation. Berti first described gastric volvulus in a female autopsy patient in 1866.

Gastric Volvulus: Background, Pathophysiology, Etiology

Harrison's Principles of Internal Medicine is an American textbook of internal medicine. First published in 1950, it is in its 20th edition (published in 2018 by McGraw-Hill Professional ISBN 978-1259644030) and comes in two volumes. Although it is aimed at all members of the medical profession, it is mainly used by internists and junior doctors in this field, as well as medical students.

Acquired Neuromuscular Disorders Pathogenesis Diagnosis

Mitochondrial disorders: Rise with minimal exercise; Serum carnitine: Low in β -oxidation disorders, especially during attack
Acylcarnitine profile
