The wait for The Mueller Report is over. This strikingly designed edition has been prepared by expert typographers – allowing for an optimised, immersive reading experience. "From the moment [the report] was published, two separate news universes took shape. In one, the special counsel's report was presented as a smoking-gun chronicle of high crimes and misdemeanours. In the other, it was heralded as a credibility-shredding blow to the president's opponents."—The Atlantic Make up your own mind. The Mueller Report is a must read political blockbuster.

### **The Uganda Country Self-assessment Report and Programme of Action**

"A subject-author-institution index which provides titles and accession numbers to the document and report literature that was announced in the monthly issues of Resources in education" (earlier called Research in education).

### **Informing Social Security's Process for Financial Capability Determination**

In spite of soaring tuition costs, more and more students go to college every year. A bachelor's degree is now required for entry into a growing number of professions. And some parents begin planning for the expense of sending their kids to college when they're born. Almost everyone strives to go, but almost no one asks the fundamental question posed by *Academically Adrift*: are undergraduates really learning anything once they get there? For a large proportion of students, Richard Arum and Josipa Roksa's answer to that question is a definitive no. Their extensive research draws on survey responses, transcript data, and, for the first time, the state-of-the-art Collegiate Learning Assessment, a standardized test administered to students in their first semester and then again at the end of their second year. According to their analysis of more than 2,300 undergraduates at twenty-four institutions, 45 percent of these students demonstrate no significant improvement in a range of skills—including critical thinking, complex reasoning, and writing—during their first two years of college. As troubling as their findings

are, Arum and Roksa argue that for many faculty and administrators they will come as no surprise—instead, they are the expected result of a student body distracted by socializing or working and an institutional culture that puts undergraduate learning close to the bottom of the priority list. Academically Adrift holds sobering lessons for students, faculty, administrators, policy makers, and parents—all of whom are implicated in promoting or at least ignoring contemporary campus culture. Higher education faces crises on a number of fronts, but Arum and Roksa’s report that colleges are failing at their most basic mission will demand the attention of us all.

Succinct, complete guidance on how to safely and competently care for adult, critically ill patients and their families – written by top clinical experts Endorsed by the American Association of Critical-Care Nurses (AACN), this acclaimed textbook sets the standard for critical care nursing education. Recognizing the learner’s need to assimilate foundational knowledge before attempting to master more complex critical care nursing concepts, the book features a practical building-block organization that starts with the basics and logically progresses to advanced topics. Bolstered by helpful tables and essential content cases, AACN Essentials of Critical Care Nursing is an essential tool for clinicians at the point of care, and those preparing for CCRN® certification in critical care nursing. AACN Essentials of Critical Care Nursing, Fourth Edition is presented in four sections: •The Essentials presents core information that new clinicians must understand to provide safe,

competent nursing care to all critically ill patients, regardless of their underlying medical diagnoses. •Pathologic Conditions covers pathologic conditions and management strategies commonly encountered among adult critical care patients. •Advanced Concepts in Caring for the Critically Ill Patient moves beyond the essentials and includes information about specific pathologic conditions that require specialized critical care management. •Key Reference Information features normal laboratory and diagnostic values, troubleshooting guides for hemodynamic monitoring, summary tables of critical care drugs, and cardiac rhythms and treatment guides. Learning aids include Knowledge Competencies that can be used to gauge progress, Principles of Management to summarize key concepts and “Essential Content” case studies with questions and answers to further reinforce the learners’ knowledge.

### **Road Safety Annual Report 2016**

The U.S. Social Security Administration (SSA) provides benefits to disabled adults and children, offering vital financial support to more than 19 million disabled

Americans. Of that group, approximately 5.5 million have been deemed "incapable" by virtue of youth or mental or physical impairment - incapable of managing or directing the management of their benefits. Hence, a representative payee has been appointed to receive and disburse SSA payments for these beneficiaries to ensure that their basic needs for shelter, food, and clothing are met. Periodically, however, concerns have been expressed about the accuracy of the process by which SSA determines whether beneficiaries are capable of managing their benefits, with some evidence suggesting that underdetection of incapable recipients may be a particular problem. The importance of creating as accurate a process as possible for incapability determinations is underscored by the consequences of incorrectly identifying recipients either as incapable when they can manage their benefits or as capable when they cannot. Failure to identify beneficiaries who are incapable of managing their funds means abandoning a vulnerable population to potential homelessness, hunger, and disease. Informing Social Security's Process for Financial Capability Determination considers capability determination processes used by other similar benefit programs, abilities required to manage, and direct the management of, benefits, and effective methods and measures for assessing capability. This report evaluates SSA's capability determination process for adult beneficiaries and provides recommendations for improving the accuracy and efficiency of the agency's policy and procedures for making these determinations.

## **AACN Essentials of Critical Care Nursing, Fourth Edition**

The outlook for energy use worldwide presented in the International Energy Outlook 2016 (IEO2016) continues to show rising levels of demand over the next three decades, led by strong increases in countries outside of the Organization for Economic Cooperation and Development (OECD),<sup>3</sup> particularly in Asia. Non-OECD Asia, including China and India, account for more than half of the world's total increase in energy consumption over the 2012 to 2040 projection period. By 2040, energy use in non-OECD Asia exceeds that of the entire OECD by 40 quadrillion British thermal units (Btu) in the IEO2016 Reference case (Figure ES-1). In the IEO2016 Reference case, total world energy consumption rises from 549 quadrillion Btu in 2012 to 815 quadrillion Btu in 2040, an increase of 48%. Most of the world's energy growth will occur in the non-OECD nations, where relatively strong, longterm economic growth drives increasing demand for energy. Non-OECD energy consumption increases by 71% between 2012 and 2040 compared with an increase of 18% in OECD nations. Energy use in the combined non-OECD region first exceeded that of the OECD in 2007 and by 2012, non-OECD countries accounted for 57% of total world energy consumption. By 2040, almost two-thirds of the world's primary energy will be consumed in the non-OECD economies. Economic growth-as measured in gross domestic product (GDP)-is a key determinant in the growth of energy demand. The world's GDP (expressed in purchasing power parity terms) rises by 3.3%/year from 2012 to 2040. The fastest

rates of growth are projected for the emerging, non-OECD countries, where combined GDP increases by 4.2%/year. In OECD countries, GDP grows at a much slower rate of 2.0%/year over the projection as a result of their more mature economies and slow or declining population growth trends. The strong projected economic growth rates in the non-OECD drive the fast-paced growth in future energy consumption among those nations.

For practitioners at all levels of experience, Assessment in Student Affairs provides a single-volume, practical resource on using assessment to develop and improve all facets of student affairs. It includes detailed guidance for student affairs staff on how to assess student needs, student satisfaction, campus environments, campus cultures, and student outcomes. And it explains how senior staff can employ assessment findings in strategic planning, policy development, and day-to-day decision making.

### **The Federal Reporter**

## **ERIC Educational Documents Index**

This book offers a broad overview of many issues related to assessment in higher education, with specific application for understanding the impact of service-learning and civic engagement initiatives. This revised edition includes an additional chapter that explores recent changes in the assessment landscape and offers examples and resources for designing assessment strategies for community engagement in higher education. The original text includes narrative addressing assessment issues and strategies; a detailed discussion of learning from multiple research projects performed over the past two decades about impact on multiple constituencies –students, faculty, communities, and institutions; and a discussion of strategies for data collection, analysis, synthesis, and reporting. Specific assessment instruments for use with each constituency are provided, including suggestions for administration, preparation, and data analysis. This volume will be helpful for individuals seeking a comprehensive resource on assessment issues in higher education.

### **Innovations in Federal Statistics**

An ambitious, comprehensive reimagining of 21st century higher education *Improving Quality in American Higher Education* outlines the fundamental concepts and competencies society demands from today's college graduates, and provides a vision of the future for students, faculty, and administrators. Based on a national, multidisciplinary effort to define and measure learning outcomes—the Measuring College Learning project—this book identifies 'essential concepts and competencies' for six disciplines. These essential concepts and competencies represent efforts towards articulating a consensus among faculty in biology, business, communication, economics, history, and sociology—disciplines that account for nearly 40 percent of undergraduate majors in the United States. Contributions from thought leaders in higher education, including Ira Katznelson, George Kuh, and Carol Geary Schneider, offer expert perspectives and persuasive arguments for the need for greater clarity, intentionality, and quality in U.S. higher education. College faculty are our best resource for improving the quality of undergraduate education. This book offers a path forward based on faculty

perspectives nationwide: Clarify program structure and aims Articulate high-quality learning goals Rigorously measure student progress Prioritize higher order competencies and disciplinarily grounded conceptual understandings A culmination of over two years of efforts by faculty and association leaders from six disciplines, this book distills the national conversation into a delineated set of fundamental ideas and practices, and advocates for the development and use of rigorous assessment tools that are valued by faculty, students, and society. Improving Quality in American Higher Education brings faculty voices to the fore of the conversation and offers an insightful look at the state of higher education, and a realistic strategy for better serving our students.

### **Healthcare in Uganda. Service Quality and Patient Satisfaction in Hospitals**

Infrastructure is a fundamental driver of economic growth and social development. Yet, unmet investment needs coexist with 'white elephants' and 'bridges to nowhere', while major construction projects face huge cost overruns and citizen

protest. The governance of infrastructure is already complex, involving a wide array of stakeholders and strategies. Drawing on novel survey data and case studies from around the world, The Governance Report 2016 examines the capacity of public administration to manage infrastructure investments, highlights governance innovations, and provides guidance for public governance of infrastructure. The Report offers information, analysis, and tools for policymakers, practitioners, and academics interested in infrastructure and other large-scale projects.

### **Forest Resource Assessment Policy**

This eBook is designed to provide the reader with accurate analyses of the AML/CTF Financial and Legal Intelligence, law and practice in the nations of the world with the most current references and resources. The eBook is organized around five main themes: 1. Money Laundering Risk and Compliance; 2. The Law of Anti-Money Laundering and Compliance; 3. Criminal and Civil Forfeiture; 4. Compliance and 5. International Cooperation. Each chapter is made up of five parts. Part I, "Introduction," begins with the analysis of money laundering risks and compliance with the recommendations of the Financial Action Task Force (FATF), and then concludes with the country's rating based on the International Narcotics Control Strategy Report (INCSR) of the U.S. State Department. Part II, "Anti-Money Laundering and Combating Terrorist Financing (AML/CTF)" and Part III, "Criminal

and Civil Forfeiture," evaluate the judicial and legislative structures of the country. Given the increasing global dimension of AML/CTF activities, these sections give special attention to how a country has created statutes, decisions, policies and the judicial enforcement procedures needed to combat money laundering and terrorist financing. Part IV, "Compliance," examines the most critical processes for the prevention and detection of money laundering and terrorist financing. This section reflects on the practical elements that should be in place so that financial institutions can comply with AML/CTF requirements; these are categorized into the development and implementation of internal controls, policies and procedures. Part V, "International Cooperation," reviews the compilation of international laws and treaties between countries working together to combat money laundering and terrorist financing. As these unlawful activities can occur in any given country, it is important to identify the international participants who are cooperating to develop methods to obstruct these criminal activities.

## **Assessments of Real Estate and Personal Property in Cook County, Illinois, for the Tax Years 1931-1932-1933**

Since the publication of the Institute of Medicine (IOM) report Clinical Practice Guidelines We Can Trust in 2011, there has been an increasing emphasis on assuring that clinical practice guidelines are trustworthy, developed in a transparent fashion, and based on a systematic review of the available research evidence. To align with the IOM recommendations and to meet the new requirements for inclusion of a guideline in the National Guidelines Clearinghouse of the Agency for Healthcare Research and Quality (AHRQ), American Psychiatric Association (APA) has adopted a new process for practice guideline development. Under this new process APA's practice guidelines also seek to provide better clinical utility and usability. Rather than a broad overview of treatment for a disorder, new practice guidelines focus on a set of discrete clinical questions of relevance to an overarching subject area. A systematic review of evidence is conducted to address these clinical questions and involves a detailed assessment of individual studies. The quality of the overall body of evidence is also rated and is summarized in the practice guideline. With the new process, recommendations are determined by weighing potential benefits and harms of an intervention in a specific clinical context. Clear, concise, and actionable recommendation statements help clinicians to incorporate recommendations into clinical practice,

with the goal of improving quality of care. The new practice guideline format is also designed to be more user friendly by dividing information into modules on specific clinical questions. Each module has a consistent organization, which will assist users in finding clinically useful and relevant information quickly and easily. This new edition of the practice guidelines on psychiatric evaluation for adults is the first set of the APA's guidelines developed under the new guideline development process. These guidelines address the following nine topics, in the context of an initial psychiatric evaluation: review of psychiatric symptoms, trauma history, and treatment history; substance use assessment; assessment of suicide risk; assessment for risk of aggressive behaviors; assessment of cultural factors; assessment of medical health; quantitative assessment; involvement of the patient in treatment decision making; and documentation of the psychiatric evaluation. Each guideline recommends or suggests topics to include during an initial psychiatric evaluation. Findings from an expert opinion survey have also been taken into consideration in making recommendations or suggestions. In addition to reviewing the available evidence on psychiatry evaluation, each guideline also provides guidance to clinicians on implementing these recommendations to enhance patient care.

Academic Paper from the year 2020 in the subject Health - Health system, Uganda Christian University, course: BBA, language: English, abstract: This study focuses on the health care service quality and patient satisfaction in Uganda. Chapter One covers the background to the study, statement of the problem, objectives of the study, research questions, scope of the study, significance of the study, justification, the conceptual framework and definition of key terms and concepts. Chapter Two discusses the relevant literature that has been reviewed in the area of healthcare service quality and patient satisfaction. It also highlights various researchers and authors that have emphasized more on the topic in accordance with the research objectives. The chapter covers the theoretical review, literature on the variables under study, existing gaps in literature, amongst others. Chapter Three gives the methodology that will be used to accomplish the research objectives and questions. It gives direction to follow to get answers to the area of concern. This chapter presents the Research Design, Area of Study, Study Population, Sample Size and Sampling Techniques, Data Collection methods and techniques, Quality Control Methods, measurement of variables, Data Analysis

Techniques, Ethical Considerations, and Limitations to the study are briefly discussed. We found the hospital has no running water; the theatre is dysfunctional while electricity only visits. A nurse gave me two options: either to pick drugs after two days because the drugs were out of stock or buy them from private clinics. These and many more are some of the challenges faced by patients who access a number of hospitals in Uganda. Who will heal Uganda's ailing health care system, remains a key question yet to be answered.

### **Academically Adrift**

Federal government statistics provide critical information to the country and serve a key role in a democracy. For decades, sample surveys with instruments carefully designed for particular data needs have been one of the primary methods for collecting data for federal statistics. However, the costs of conducting such surveys have been increasing while response rates have been declining, and many surveys are not able to fulfill growing demands for more timely information and for more detailed information at state and local levels. Innovations in Federal Statistics examines the opportunities and risks of using government administrative and private sector data sources to foster a paradigm shift in federal statistical programs that would combine diverse data sources in a secure manner to enhance federal statistics. This first publication of a two-part series discusses the challenges faced by the federal statistical system and the foundational elements needed for a

new paradigm.
