NADA Consumer Classic Collectible and Special Interest Car Appraisal Guide

During the 1960s, the automobile finally secured its position as an indispensable component of daily life in Britain. Car ownership more than doubled from approximately one car for every 10 people in 1960 to one car for every 4.8 people by 1970. Consumers no longer asked "Do we need a car?" but "What car shall we have?" This well-illustrated history analyzes how both domestic car manufacturers and importers advertised their products in this growing market, identifying trends and themes. Over 180 advertisement illustrations are included.

Alfa Romeo 2000 and 2600

Alfa Romeo

The Autocar

This is the only book that completely lists accurate technical data for all cars imported into the U.S. market from 1946-2000. With many imports approaching the antique status, this book will be a big seller across all generations of car enthusiasts. From the grandiose European carriages of the late Forties to the hot, little Asian imports of the Nineties, every car to grace American roadways from across the Atlantic and Pacific is carefully referenced in this book. & break;& break; Foreign car devotees will appreciate the attention given to capturing precise data on Appearance and Equipment, Vehicle I.D. Numbers, Specification Charts, Engine Data, Chassis, Technical Data, Options and Historical Information. & break;& break; Collectors, restorers and car buffs will love this key book from noted automotive authors, James Flammang and Mike Covello.

Car and Driver

After a period of post-war austerity, in 1957 Alfa Romeo decided it was time to re-enter the market for luxury/executive class cars with a new range designed for the growing number and prosperity of potential customers. Thus, the first models in the new 2000 series emerged, followed by the 2600 series in 1962. That they were not hugely successful, although some 18,540 were manufactured between 1957 and 1966, can be attributed to a number of factors, principally cost. Largely ignored for many years, these cars are now recognized as a significant element in Alfa Romeo's history and this book is a valuable record of their story. Richly illustrated with over 200 colour and black & white photographs, this book introduces the history of the company and its early designs; describes the early Berlina saloon, Spider convertible and Sprint coupe,

and their development into the 2600 series; details the evolution of the 1900-based engine into the 6-cylinder 2600 engine; provides a history of the SZ Sprint Zagato; includes information on prototypes, show specials, specification tables, colour schemes and production numbers and, finally, includes a chapter on owning a 2000 or 2600.

Weber Carburetors

All of Alfa's great sportscars, including the convertibles and coupes, come vividly to life, from the pre-war 6C to today's Spider and GTV, including the Giulietta 750 and Giulia 101. Andrea Sparrow's informative text tells the Alfa Romeo story and details the individual models. David Sparrow's award-winning color photographs deliver a stylish appreciation for Alfa's world-renowned sports cars. A colorful celebration!

Krause Publications' Standard Catalog series is available by specific marque, in individual volumes or a set. Each book

contains in-depth profiles of specific makes by model, factory photos, and up-to-date vehicle pricing. The I-to-conditional pricing system assures readers of accurate values, whether a vehicle is a #1 low-mileage, rust-free beauty or a #6 parts-only heap. "Techs & specs", original factory prices, production and serial numbers, and engine/chassis codes are noted by model, thus helping you determine authenticity accuracy. Historical, technical and pricing information are combined from hundreds of sources. James Flammang values each model according to the popular 1-6 grading system invented by Old Cars magazine.

Guide to the Identification of Alfa Romeo Cars

Vol. for 1947-76 indexes: Car and driver, Motor trend, and Road & track; 1977-81 indexes 15 American automotive journals.

World Cars, 1981

Gregory Cagle was a 10-year-old car fanatic when his family moved from New Jersey to Germany in 1956. For the next five years he photographed unusual, rare and sometimes bizarre automobiles throughout Europe. This book features 105 specimens of auto exotica, captured with Cagle's Iloca Rapid-B 35mm camera—not showpieces in museums but daily drivers in their natural habitats. In the background can be glimpsed, here and there, the mood of postwar Europe. The story behind each photo is told, with dates and locations, information and history about the cars and some of their owners, along with Cagle's personal anecdotes.

World Cars, 1983

Here is a fact and picture-packed book dedicated solely to the Giulia GT in all its forms including the fabulous lightweight GTA racer. Packed with illustrations, the book tells the story of the Giulia from Giugiaro's drawing board to the roads and racetracks of the world. Also included is practical advice from leading experts on buying, restoring and caring for Alfa's classic Coupe. About The Author: John Tipler is a professional motoring journalist who has contributed to a number of leading magazines and has several automotive books in print. John has been Press Officer for John Player Motorsport and also worked in the Press Office at the famous British motor racing circuit Brands Hatch.

Road & Track

Alfa Romeo Giulia Spider

Head gasket repairs, valve adjustments, camshaft timing, carb and SPICA fuel injection tuning, and driveshaft donut replacement are all explained. Experienced, hands-on guidance that'll keep you in the drivers seat.

World Cars 1980

In deciding which models to choose for inclusion in this book selected from Fiat's huge inventory, the author concentrated on three criteria - greatness, size and emotion. Where size is an easy parameter to qualify, greatness is more complicated because it is a combination of both the manufacturer's and the public's opinion. A car that is highly regarded by the public may not have been a commercial success and vice versa. A truly great car is one that works well for both parties. Emotion may be considered to be an element of greatness in that the public's 'love' for a car is a fantastic benefit for a manufacturer and must be treasured. Fiat have made the mistake of 'improving' an icon on several occasions only to find that public opinion went against them. Fortunately Fiat has been magnanimous enough to respond by giving the car buying public more of what it wants. As long as they continue to do so then Fiat's reputation as the world's greatest small car manufacturer is set to continue. The author chose the Topolino as the starting point as the car fulfils all the criteria and it was the first Fiat built in the late 1930s to satisfy the Italian public's new-found desire for mobilisation. The old conventions of car production were turned upside down with the arrival of the 600 which revolutionised car production techniques and maximised on passenger space and performance at minimal cost. These principals continued via a succession of models which include the 500, 850, 126, 127 through to more recent models like the Cinquecento and Seicento. Running in parallel with these 'cheeky' Fiats, this book covers a range of slightly larger cars that were built in huge numbers. Though rather staid in appearance, the 1950s Millecento was family transport for millions of Italians covering three decades, four when the Indian-built cars are included. Similarly the 128, Panda and Uno were 'the' Italian small cars of the '70s, '80s and '90s. Nuova Panda carries the banner to the present day.

Alfa Romeo Montreal

The Radiator

Ten years have passed since the original edition of this book was published, but Alfa Romeo enthusiasts everywhere are more active today than ever in preserving, modifying and racing these excellent cars. Throughout this time, the author in

true Alfista fashion, never stopped looking for and trying new techniques to increase the power, overall performance and reliability of Alfas and their engines. This book is the result of much research, and also first-hand experience gained through many Alfa rear wheel drive model projects, from the 105 series to the last of the 75 models. There is a lot of completely new information regarding TwinSpark Cylinder head mods, big-brake mods, LSD adjustment procedure, electrical system improvements, plus many flow-bench diagrams, dyno plots, and much more.

Buying a car is an expensive business and mistakes can prove costly. Wouldn't it be great if you could take an expert with you? With the aid of this book's step-by-step guidance from a marque specialist, you can! The unique points system will help to place the car's value in relation to condition while extensive photographs illustrate the problems to look out for.

Alleggerita

There is something special about Alfa Romeo cars which can't be defined precisely but is, perhaps, best described as a vitality that creates a symbiosis between driver and machine: a oneness that no other marque seems to replicate. Alfa's Berlinas have always tended to be overshadowed by their spotlight-grabbing Coupé and Spider siblings, but enthusiasts with family car needs have always known that any saloon/sedan with the famous Alfa Romeo badge would deliver pure driving pleasure in equal measure. Here is the full story of Alfa's quirky but characterful Berlinas, from their beginnings in the early 1900s through to the start of a new millennium. Not only does the book describe and picture every model, it also contains useful information on restoring classic Alfa Romeos and details of marque specialists.
