Shakespeare an Archer

Way back in the second century BC, on the remote north-western frontier of China, a tribe of mounted archers overran the land of another. Though a commonplace event in those days, this incident initiated a nomad migration which threw the whole of Central Asia into turmoil and led to the fall of a remarkable Greek kingdom in distant northern Afghanistan. Dr. Torday has painstakingly pieced together the trail and identity of the warlike tribes involved, using the evidence of contemporary Chinese annals, Greek authors, scattered coins, a few surviving names and some legends which have been recorded. We learn who the Huns really were, why the wolf and the bird who fed Romulus and Remus were also known in Siberia, how the horn came to be a symbol of might all over contemporary Eurasia, why the earliest Sarmatian tribes called themselves "men of the river" and how an early Indo-European language came to be spoken at the edge of the Taklamakan

desert. Mounted Archers is the first monograph to cover the history of this migration from China to the Hindu Kush, and from its antecedents to the time when the migrants came to rule all the land from the Aral Sea to the mouth of the Ganges. It is a work on a scale every bit as epic as the journey it recreates.

Is there a cure for farmer's lung—and would Joe Grundy take it if he could? Who fell to his untimely death from the roof of Lower Loxley Hall one stormy January night? On which day of the week can you hear a folk version of the famous theme played by The Yetties, instead of the classic orchestral arrangement? It's been more than 60 years since the familiar dum-di-dum-di-dum-di-dum of "Barwick Green" first brought The Archers to our airwaves, and in that time millions of listeners have followed the everyday lives of country folk in Ambridge. This new companion, which brings together facts and trivia about characters, controversies, and country customs in one handy volume, will delight avid addicts and nervous newbies alike.

The Legal 500

Although deconstruction has become a popular catchword, as an intellectual movement it has never entirely caught on within the university. For some in the academy, deconstruction, and Jacques Derrida in particular, are responsible for the demise of accountability in the study of literature. Countering these facile dismissals of Derrida and deconstruction, Herman Rapaport explores the incoherence that has plagued critical theory since the 1960s and the resulting legitimacy crisis in the humanities. Against the backdrop of a rich, informed discussion of Derrida's writings -- and how they have been misconstrued by critics and admirers alike -- The Theory Mess investigates the vicissitudes of Anglo-American criticism over the past thirty years and proposes some possibilities for reform.

The role of global capital in relation to human social systems has assumed enormous proportions in liberalised, deregulated markets. States attempt to nationalise it, financial centres spring up in its wake, and INGOs attempt to deal with its de-territorialising, supranational characteristics. A global adjudication system (arbitration) has been introduced to safeguard and buttress its flow. The power of Islamic capital has generated numerous sites of legal contestation and negotiation, ranging from gateway financial centres, international law firms and transnational financial institutions, all of which interact in the production of Islamic financial law (IFL). The process of producing IFL illustrates complex fields of action driven by power dynamics, neoliberal paradigms and the institutional momentum of the global economy. The municipal legal systems under study in this book (the United Kingdom, Bahrain, United Arab Emirates and the Dubai International Financial Centre) illustrate globalisation's acceleration of legal, economic and social production.

Bankruptcy Law: Principles, Policies, and Practice puts bankruptcy law in context, illuminating the evolution of the Bankruptcy Code with an exploration of current and historical non-bankruptcy remedies. The book continually approaches each topic through the goals of creditors and debtors, exploring how each is served in various parts of the Code. Extensive questions and numerous problems focus student attention on the mechanics of the bankruptcy process. But they do so through the lens of history and policy, and they explain why the law is the way it is. The Third Edition has been revised extensively throughout to reflect changes in the law and its underlying philosophy, as well as significant new case law developments. In addition, a new chapter adds coverage of bankruptcy jurisdiction. The authors' aim in designing the casebook was to provide a very accessible medium for introducing students to bankruptcy law in a sophisticated manner. As the title indicates, the emphasis is on the relationship between the core principles essential to an understanding of the law, the policies animating those principles, and the challenges presented by the effectuation of those principles and policies in bankruptcy practice. In its methodology, Bankruptcy Law: Principles, Policies, and Practice relies on a variety of expository tools--textual discussion, comprehension questions, problems, cases and thought / discussion questions--all with a careful eye toward building upon previous materials and concepts. This eBook features links to Lexis Advance for further legal research options.
