Through My Eyes

These are more than dreams and visions: they're a calling. Six people. Five mind-numbing visions. Four ancient and mysterious artifacts. Two exotic locations. And one greedy man who will stop at nothing, not even murder, to achieve his goal. Rev. Adam Bridger and his wife, Dr. Rachel Tremaine are once again in the center of an adventure not of their making. And joining them are four total strangers who, along with Rachel, have seen visions that most mortals can't imagine. They have been called on a mission that will forever change the world--if they survive.

language it develops all the basic skills such as pronunciation, character writing, word use and structures, while placing strong emphasis on the development of communicative skills. The complete course consists of Textbook Level 1, Workbook level 1 - including free CDs, Textbook level 2 and workbook level 2 -including free CDs. All books are available separately in simplified as well as traditional characters and take the students from complete beginner to post-intermediate level. Textbook Level 2 incorporates the innovative features of Level 1 including the separation of vocabulary from characters, a "basic to complex" introduction of grammatical structures, a comprehensive companion workbook with extensive practice in all language skills and functions, and a Teachers' Manual. Level 2 adds a "Narrative" Component to support the learner as they move from spoken Mandarin to formal written Chinese, and from the comprehension and production of short sentences to paragraphs and essays. Level 2 of this Course in Modern Mandarin bridges the gap that characterizes the transition between basic level Chinese courses and more advanced work. The Narrative Component includes: Model narratives that introduce formal written Chinese with explanations of the features of each narrative. Focus on narrative function including description, comparison, explanation, persuasion, and hypothesis. Reading and writing assignments that guide students to internalize model structures, to read for information, and to compose original essays for specific purposes. The course is also fully supported by an interactive companion website which contains a wealth of additional resources for both teachers and students.

Financial Development, Economic Crises and Emerging Market Economies

Recurrent crises in emerging markets and in advanced economies in the last decades cast doubt about the ability of financial liberalization to meet the aims of sustainable economic growth and development. The increasing importance of financial markets and financial efficiency criterion over economic decisions and policies since the 1980s laid down the conditions of the development process of emerging market economies. Numerous crises experienced thereafter gave rise to flourishing work on the links between financialization and economic development. Several decades of observations and lessons can now be integrated into economic and econometric models to give more sophisticated and multivariable approaches to financial development with respect to growth and development issues. In the markets-based and private-enterprise dominated world economy, two conditions for a successful growth-enhancing financial evolution can at least be brought fore: macroeconomic stability and consistent supervision. But even after the 2007-2008 global crisis, economists do not agree on the meaning of those conditions. For liberal and equilibrium-market economists, good finance and supervision mean market-friendly structures while for institutionalists, post-Keynesian and Marxist economists, good finance and supervision must lie in collectively designed and managed public structures. Drawing heavily on the tumultuous crises of the 1990s-2000s, this book argues that those experiences can shed light on such a crucial issue and lead economic theory and policy to go beyond the blindness of efficient free markets doctrine to economic catastrophes. It also points to

new challenges to global stability in the wake of reconfiguration of international financial arena under the weight of major emerging market economies.

"Philosophy," wrote Wittgenstein, "simply puts everything before us, and neither explains nor deduces anything." Hanfling takes seriously Wittgenstein's declaration of what he was doing, emphasizing Wittgenstein's rejection of theory and explanation in favor of 'description alone.' He demonstrates the importance of Wittgenstein's philosophy to long-standing problems about language, knowledge, the mind, and philosophy itself. The book exposes common misunderstandings about Wittgenstein, and examines in detail the celebrated 'private language' argument.
