This book is a combination of schematic flowcharts that visually plot basic rules of contract law and selected cases that apply such rules. The flowchart approach helps students sort out in a visual manner the more difficult contract rules of law in an organized way.

Acing Civil Procedure

Contracts: Cases, Discussion, and Problems, Fourth Edition is known for its strikingly clear, straightforward text that illuminates cases as well as concepts and theory. The book focuses on modern cases to expose students to contemporary contract law, but it also includes many important or iconic older cases. The cases are set in context by extensive author-written explanatory text. Insightful questions draw attention to difficult and crucial aspects of the law and prompt vigorous class discussion. Numerous problems, ranging from simple to complex, supplement cases and introduce topics taught most effectively through problems. The casebook's traditional organization begins with formation and then corresponds to the sequence followed by the Restatement (2nd) of Contracts and treatises. Its concise, efficient presentation results in an optimum length for the course. Procedural issues are highlighted when presented by the cases and transactional issues such as drafting, client counseling, and negotiation are raised through the use of questions and small exercises throughout the text. Strengthening the text's focus on contemporary methods of contracting, modern issues in standard contracts are explored along with contracts entered into electronically. International and comparative material offers alternative approaches for students to consider, such as those taken by the United Nations Convention on Contracts for the International Sale of Goods (CISG) and the UNIDROIT Principles of International Commercial Contracts.

Emanuel Law Outlines for Environmental Law

Published in association with the Intellectual Property Institute, this title provides a focal point for discussion of policy issues in intellectual property law and their effects on industry. It provides emphasis on interdisciplinary issues of policy, drawing together legal, economic, industrial, technical, managerial and statistical viewpoints

Contracts

The previous editions of Torts were highly regarded for their clarity of explanation and engaging writing style, and this new fourth edition fully retains each of these qualities. The text has been extensively revised and updated, and there is a new chapter on privacy. The enhanced layout includes end of chapter summaries and self-test exercises and an extensive bibliography. This is therefore an ideal companion to the subject for both law undergraduates and GDL/CPE students.

Quality Control in Fact-Finding

Where is reality to be found: at the surface of things or behind it? Max Willem, a young art student in Montreal at the end of the 1960s, becomes obsessed with outward appearances - with makeup, costume, and masks of all kinds. For him, outward reality, and in particular that of the opposite sex, is composed of many veils of illusion and artifice through which he must see if he is to feel fully alive. At the same time, Max discovers his exceptional talent for art forgery. Moving to New York, he becomes a tool in the hands of a powerful international ring dealing in forged art, and suffers from the loss of his own artistic integrity. Himself seduced as much a seducer, how can Max escape and redeem his artistic soul? In *The Art of Deception*, Sergio Kokis has written a novel about mystification and illusion. His exuberant narrative provides a caustic insight into the undersides of art and of love.

Evolution and Posttraumatic Stress

Our political system in America is broken, right? Wrong. The truth is, the American political system is working exactly how it is designed to work, and it isn't designed or optimized today to work for us—for ordinary citizens. Most people believe that our political system is a public institution with high-minded principles and impartial rules derived from the Constitution. In reality, it has become a private industry dominated by a textbook duopoly—the Democrats and the Republicans—and plagued and perverted by unhealthy competition between the players. Tragically, it has therefore become incapable of delivering solutions to America's key economic and social challenges. In fact, there's virtually no connection between our political leaders solving problems and getting reelected. In *The Politics Industry*, business leader and path-breaking political innovator Katherine Gehl and world-renowned business strategist Michael Porter take a radical new approach. They ingeniously apply the tools of business analysis—and Porter's distinctive Five Forces framework—to show how the political system functions just as every other competitive industry does, and how the duopoly has led to the devastating outcomes we see today. Using this competition lens, Gehl and Porter identify the most powerful lever for change—a strategy comprised of a clear set of choices in two key areas: how our elections work and how we make our laws. Their bracing assessment and practical recommendations cut through the endless debate about various proposed fixes, such as term limits and campaign finance reform. The result: true political innovation. *The Politics Industry* is an original and completely nonpartisan guide that will open your eyes to the true dynamics and profound challenges of the American political system

and provide real solutions for reshaping the system for the benefit of all. THE INSTITUTE FOR POLITICAL INNOVATION The authors will donate all royalties from the sale of this book to the Institute for Political Innovation.

Questions & Answers

3D Math Primer for Graphics and Game Development covers fundamental 3D math concepts that are especially useful for computer game developers and programmers. The authors discuss the mathematical theory in detail and then provide the geometric interpretation necessary to make 3D math intuitive. Working C++ classes illustrate how to put the techniques into practice, and exercises at the end of each chapter help reinforce the concepts. This book explains basic concepts such as vectors, coordinate spaces, matrices, transformations, Euler angles, homogenous coordinates, geometric primitives, intersection tests, and triangle meshes. It discusses orientation in 3D, including thorough coverage of quaternions and a comparison of the advantages and disadvantages of different representation techniques. The text describes working C++ classes for mathematical and geometric entities and several different matrix classes, each tailored to specific geometric tasks. Also included are complete derivations for all the primitive transformation matrices.

Understanding Property Law

This carefully designed workbook helps students master legal citation through a series of exercises coordinated with Understanding and Mastering The Bluebook. Starting at beginner level, the workbook introduces students to basic citation forms, then builds on this foundation through a step-by-step series of targeted exercises that both reinforce the basics and introduce new rules. Each exercise presents a caption from an authority and all the necessary information to prepare a full or short form citation. The workbook concentrates on the citations used most in the classroom and in practice. Workbook exercises are grouped to correspond with chapters in Understanding and Mastering The Bluebook, with one or more sets of exercises of ten questions each. The more complex citation forms, such as cases and statutes, are divided into multiple ten-question sets, each targeting a specific subset of rules. A review exercise is provided for cases and statutes which can be used as additional practice or as a quiz. The workbook is planned to give students the practice they need to master citation, while easing the burden on teachers to create exercises and provide detailed feedback. Space is provided in the workbook for students to write the citations, with the pages perforated for easy tear out.

Murray on Contracts

The Art of Deception

The definitive and authoritative international law text, updated to reflect key case law, international practice and treaty developments.

When Cultures Collide, Third Edition

'How the Law Works is a gem of a book, for law students and for everyone else. It is a must read for anyone interested in how society is shaped and controlled via law.' Dr Steven Vaughan, solicitor, Senior Lecturer, Birmingham Law School 'How the Law Works is a comprehensive, witty and easy-to-read guide to the law. I thoroughly recommend it to non-lawyers who want to improve their knowledge of the legal system and to potential students as an introduction to the law of England and Wales.' HH Judge Lynn Tayton QC Reviews of the first edition: 'A friendly, readable and surprisingly entertaining overview of what can be a daunting and arcane subject to the outsider.' The Law Teacher 'An easy-to-read, fascinating book . . . brimful with curios, anecdote and explanation.' The Times How the Law Works is a refreshingly clear and reliable guide to today's legal system. Offering interesting and comprehensive coverage, it makes sense of all the curious features of the law in day to day life and in current affairs. Explaining the law and legal jargon in plain English, it provides an accessible entry point to the different types of law and legal techniques, as well as today's compensation culture and human rights law. In addition to explaining the role of judges, lawyers, juries and parliament, it clarifies the mechanisms behind criminal and civil law. How the Law Works is essential reading for anyone approaching law for the first time, or for anyone who is interested in an engaging introduction to the subject's bigger picture.

Property Asset Management

The fundamentals of project management with a wide assortment of business applications. "Project Management" takes a decision-making, business-oriented approach to the management of projects, which is reinforced throughout the text with current examples of project management in action. And because understanding project management is central to operations in various industries, this text also addresses project management within the context of a variety of successful organizations, whether publicly held, private, or not-for-profit.

The Time Trap

Posttraumatic Stress Disorder remains one of the most contentious and poorly understood psychiatric disorders. Evolution and Posttraumatic Stress provides a valuable new perspective on its nature and causes. This book is the first to examine PTSD from an evolutionary perspective. Beginning with a review of conventional theories, Chris Cantor provides a clear and succinct overview of the history, clinical features and epidemiology of PTSD before going on to introduce and integrate evolutionary theory. Subjects discussed include: The evolution of human defensive behaviours A clinical perspective of PTSD Defence in overdrive: evolution, PTSD and parsimony This original presentation of PTSD as a defensive strategy describes how the use of evolutionary theory provides a more coherent and successful model for diagnosis, greatly improving understanding of usually mystifying symptoms. It will be of great interest to psychiatrists, psychotherapists, psychologists, and anthropologists.

Property asset management requires both day-to-day oversight of rental properties and an ability to maximize the potential

of the portfolio through forward thinking and practical planning. Successful property managers must be flexible and proactive whilst maintaining a robust knowledge of technical, financial and legal aspects of the leasing system. Property Asset Management is a practical guide to the key principles of successful property management, perfect for both student and practitioner alike. In this book, Douglas Scarrett and Jan Wilcox demonstrate how to successfully manage properties for the varying needs of clients ranging from individual property owners to large international commercial ventures. As well as the basic theory, Property Asset Management discusses the process of active management, the strategic objectives, performance measurement, and the key financial and operational information needed for high quality and comprehensive reporting to clients. This fourth edition has new chapters on corporate real estate and financial management, and has been extensively rewritten to incorporate recent developments in property management. Software screenshots are used to illustrate salient points and readers are provided with a thorough overview of the latest legal aspects of land ownership and tenancy arrangements. With everything you need for successful property asset management, this book both caters for the needs of RICS accredited and business courses and serves as a handy guide for everyday practice.

Paper Towns

A great checklist presents the series of questions that must be asked and answered in order to identify and resolve the range of legal issues presented in an examination question. Acing Civil Procedure gives you this resource by providing checklists for all of the topics generally covered in the basic first-year civil procedure course. Book jacket.

Strategies and Techniques of Law School Teaching

This Fourth Edition helps readers develop the wide-ranging knowledge and analytical skills they need to succeed in today's burgeoning and dynamic hotel industry. This comprehensive volume encourages critical thinking by providing different points of view through contributions from sixty leading industry professionals and academics. Within a coherent theoretical structure, this updated edition enables readers to formulate their own ideas and solutions.

Global Waves of Debt

Moving beyond the outline format used by most students, this book uses a checklist format to lead students through the questions they need to ask and answer to fully analyze the legal questions they are trying to resolve. It assembles the different issues, presenting a clear guide to procedural analysis that students can draw upon when writing their exams. Other study aids provide sample problems, but this book offers a systematic approach to problem solving.

The Politics Industry

This book describes a pathway for sustainable phosphorus management via the Global Transdisciplinary Processes for Sustainable Phosphorus Management project (Global TraPs). Global TraPs is a multi-stakeholder forum in which scientists from a variety of disciplines join with key actors in practice to jointly identify critical questions and to articulate what new knowledge, technologies and policy processes are needed to ensure that future phosphorus use is sustainable, improves food security and environmental quality and provides benefits for the poor. The book offers insight into economic scarcity and identifies options to improve efficiency and reduce environmental impacts of anthropogenic phosphorus flows at all stages of the supply and use chain.

Project Finance

This book discusses how fact-finding mechanisms for alleged violations of international human rights, humanitarian and criminal law can be improved. There has been a significant increase in the use of international, internationalised and domestic fact-finding mechanisms since 1992, including by the United Nations human rights system, international

commissions of inquiry, truth and reconciliation commissions, and NGOs. They are analysed and assessed in detail by 19 authors under the common theme 'Quality Control in Fact-Finding'. The authors include Richard J. Goldstone, Martin Scheinin, LIU Daqun, Charles Garraway, David Re, Simon De Smet, FAN Yuwen, Isabelle Lassée, WU Xiaodan, Dan Saxon, Chris Mahony, Dov Jacobs, Catherine Harwood, Lyal S. Sunga, Wolfgang Kaleck, Carolijn Terwindt, Ilia Utmelidze and Marina Aksenova. Serge Brammertz has written the Preface, and LING Yan a Foreword. The book emphasises quality awareness and improvement in non-criminal justice fact-work. This quality control approach recognises, inter alia, the importance of leadership in fact-finding mechanisms, the responsibility of individual fact-finders to continuously professionalise, and the need for fact-finders to be mandate-centred. It is an approach that invites the consideration of how the quality of every functional aspect of fact-finding can be improved, including work processes to identify, locate, obtain, verify, analyse, corroborate, summarise, synthesise, structure, organise, present, and disseminate facts. The book also considers regulatory approaches to enhance quality and professionalisation.

A new book for a new generation of engineering professionals, Visualization, Modeling, and Graphics for Engineering Design was written from the ground up to take a brand-new approach to graphic communication within the context of engineering design and creativity. With a blend of modern and traditional topics, this text recognizes how computer modeling techniques have changed the engineering design process. From this new perspective, the text is able to focus on the evolved design process, including the critical phases of creative thinking, product ideation, and advanced analysis techniques. Focusing on design and design communication rather than drafting techniques and standards, it goes beyond the what to explain the why of engineering graphics. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Self-Build Homes connects the burgeoning interdisciplinary research on self-build with commentary from leading international figures in the self-build and wider housing sector. Through their focus on community, dwelling, home and identity, the chapters explore the various meanings of self-build housing, encouraging new directions for discussions about self-building and calling for the recognition of the social dimensions of this process, from consideration of the structures, policies and practices that shape it, through to the lived experience of individuals and households. Divided into four parts – Discourse, Rationale, Meaning; Values, Lifestyles, Imaginaries; Community and Identity; and Perspectives from Practice – the volume comes at a time of renewed focus from policy managers and practitioners, as well as prospective builders themselves, on self-build as a means for producing homes that are more stylised, affordable and appropriate for the specific needs of households. It responds to recent advances in housing and planning policy, while also bringing this into conversation with interdisciplinary perspectives from across the social sciences on housing, home and homemaking. In this way, the book seeks to update understandings of self-build and to account for housing as a distinctly social process.
