In Italian Readers of Ovid from the Origins to Petrarch, Julie Van Peteghem examines Ovid's influence on Italian poetry from its beginnings, through Dante, to Petrarch, situating it within the history of reading Ovid in medieval and early modern Italy.

The European Union and Human Security

Essay from the year 2010 in the subject English Language and Literature Studies - Literature, grade: 1,0, University of Flensburg (Englisches Institut), course: Projektarbeit Anglistik, language: English, abstract: The Road is set in an apocalyptic scenario in which most of humankind and the environment seems to have been destroyed by an unspecified catastrophe. Still the few survivors, including the two main characters, have to eat something in order to stay alive. They nourish themselves from whatever edible they find on their way as they travel along a road in the hope of finding a warmer and more liveable place in the ruined country. But as the story develops they learn that not all survivors of the disaster are willing to live from the mostly insipid leftovers of the destroyed civilization but have instead developed an unholy desire for fresh human meat. In this project work I would like to deal with the role of food in McCarthy's novel and furthermore examine the parts that display cannibalism. Therefore I divide my project into two main parts of analysis. Firstly I'm going to highlight how and for which reasons McCarthy uses the topic of normal food in his novel. Which stylistic devices does the author use to emphasize the role of food and how does McCarthy integrate the topic into the novel? And what role plays the absence of food? Secondly I would like to focus on the cannibals. How are they described, what role do they play in the book and how is their appearance used by McCarthy to evoke fear and tension throughout the novel? In addition to that I'm trying to find out

whether the author may have had any examples in mind when he conceived those bestialized creatures. Has he been influenced by other writers, real cannibalistic occurrences in extreme situations or within history? Where did his get his preference for violent topics from?"

Italian Readers of Ovid from the Origins to Petrarch

Feminism and the Politics of Travel After the Enlightenment

This book rethinks Victorian biography and some of its major practitioners from the perspectives of Bakhtinian and Foucauldian discourse theory. A re-reading of the writings of Thomas Carlyle, particularly "Sartor Resartus" and Oliver Cromwell's "Letters and Speeches", provides the basis for the central argument of the book: that the biographical writings of late-19th-century figures such as John Morley, Frederick Harrison, Leslie Stephen, and J.R. Seeley need to be seen as an argument against Carlyle's writing practices, and as an attempt to impose cultural discipline on reading practices. The book contends that biography is a key genre for understanding debates between 19th-century intellectuals about the circulation and use of "literary" and "historical" discourse. As such, it is also a timely intervention in the current debate about the emergence of the disciplines of "literature" and "history" in the 19th century.

Preserving New York is the largely unknown inspiring story of the origins of New York City's nationally acclaimed landmarks law. The decades of struggle behind the law, its intellectual origins, the men and women who fought for it, the forces that shaped it, and the buildings lost and saved on the way to its ultimate passage, span from 1913 to 1965. Intended for the interested public as well as students of

New York City history, architecture, and preservation itself, over 100 illustrations help reveal a history richer and more complex than the accepted myth that the landmarks law sprang from the wreckage of the great Pennsylvania Station. Images include those by noted historic photographers as well as those from newspaper accounts of the time. Forgotten civic leaders such as Albert S. Bard and lost buildings including the Brokaw Mansions, are unveiled in an extensively researched narrative bringing this essential episode in New York's history to future generations tasked with protecting the city's landmarks. For the first time, the story of how New York won the right to protect its treasured buildings, neighborhoods and special places is brought together to enjoy, inform, and inspire all who love New York.

The roots of modern capitalism go back to the Italian banking system of the late Middle Ages and the Renaissance. In the fifteenth century, the Medici Bank succeeded in overshadowing its competitors, the Bardi and the Peruzzi, who were the giants of the fourteenth century, and grew into a vast establishment with branches in most of the large cities of Western Europe. A study of its operations is

essential to an understanding of the economic conditions in Europe in the fifteenth century. From a careful study of pertinent documents, including a set of *libri segreti* (confidential ledgers) discovered in 1950, Professor de Roover has reconstructed the details of the bank's organization and operating methods; its loan policies, which reflected the Church's doctrine on usury; its trading and industrial investments; its roles within the Florentine gild system and tax structure; and its activities as financial agent of the Church. He covers every aspect of the bank's history, from its early years under the management of Giovanni di Bicci de' Medici to its collapse with the expulsion of the Medici from Florence. "An invaluable contribution to the economic history of the period. A splendid book."—Harry A. Miskimin, *The American Economic Review* "The most important work in English on a medieval or Renaissance bank."—*The Economist* "The best book ever written on the medieval banking system."—John T. Noonan, Jr., *Harvard Law Review* "The most authoritative treatment of its subject in any language."—Rondo Cameron, *The Accounting Review*

He's become an accomplished researcher seeking out interesting historical figures before he magically bends time and injects himself into the lives of these real but long-since-dead people. In *Lottie* Bob tells us of his love affair with the most colorful woman in the old West and in *My Evening with the Family* he describes his night with a group of hippies before they became infamous household names. And, don't miss *My Date with the Butcher*, Bob's story about his meeting with Pancho Villa's most trusted lieutenant, General Pablo Lopez.

The Galindez Case

An understanding of the developments in classical analysis during the nineteenth century is vital to a full appreciation of the history of twentieth-century mathematical thought. It was during the nineteenth century that the diverse mathematical formulae of the eighteenth century were systematized and the properties of functions of real and complex variables clearly distinguished; and it was then that the calculus matured into the rigorous discipline of today, becoming in the process a dominant influence on mathematics and mathematical physics. This Source Book, a sequel to D. J. Struik's *Source Book in Mathematics, 1200-1800*, draws together more than eighty selections from the writings of the most influential mathematicians of the period. Thirteen chapters, each with an introduction by the editor, highlight the major developments in mathematical thinking over the century. All material is in English, and great care has been taken to maintain a high standard of accuracy both in translation and in transcription. Of particular value to historians and philosophers of science, the Source Book should serve as a vital reference to anyone seeking to understand the roots of twentieth-century mathematical thought.

Social network analysis applications have experienced tremendous advances within the last few years due in part to increasing trends towards users interacting with each other on the internet. Social networks are organized as graphs, and the data on social networks takes on the form of massive streams, which are mined for a variety of purposes. Social Network Data Analytics covers an important niche in the social network analytics field. This edited volume, contributed by prominent researchers in this field, presents a wide selection of topics on social network data mining such as Structural Properties of Social Networks, Algorithms for Structural Discovery of Social Networks and Content Analysis in Social Networks. This book is also unique in focussing on the data analytical aspects of social networks in the internet scenario, rather than the traditional sociology-driven emphasis prevalent in the existing books, which do not focus on the unique data-intensive

characteristics of online social networks. Emphasis is placed on simplifying the content so that students and practitioners benefit from this book. This book targets advanced level students and researchers concentrating on computer science as a secondary text or reference book. Data mining, database, information security, electronic commerce and machine learning professionals will find this book a valuable asset, as well as primary associations such as ACM, IEEE and Management Science.

There are investment aspects of the North American Free Trade Agreement (NAFTA) which considerably enhance the opportunities for foreign investment among the signatories, while at the same time improving the security of such investment. NAFTA reflects the Parties' recognition that liberalization of host country investment restrictions is as important as the elimination of trade barriers. With the assistance of such high caliber contributors as Roberto Mayorga, Kent S. Foster, Preston Brown, and Dr. Jorge Witker, the book analyses both the advantages and disadvantages of this policy upon the investment climate within the countries of the various signatories. This book is the second volume in Kluwer's NAFTA Law and Policy Series, publishing high-quality studies on different aspects of NAFTA, including legal analysis and commentary on the Agreement. Among the numerous areas that are to be covered in the series are topics as diverse as agriculture, dispute settlement, environment, intellectual property rights, investment, and labour.

This eye-opening, insightful exploration of Sufism, the spiritual tradition that has supported Islam for more than a thousand years, shows why it offers a promising foundation for reconciliation between the Western and Muslim worlds. Many Americans today identify Islam with maniacal hatred of the West. *The Other Islam* transforms this image and opens the way to finding common ground in our troubled times. Sufism, a blend of the mystical and rational tendencies within Islam, emerged soon after the revelation of Muhammad. A reforming movement against the increasing worldliness of Muslim society, it focuses on Islam's spiritual dimension. Described as "Islam of the Heart," Sufism has attracted adherents among both Sunni and Shi'a Muslims, as well as Jews, Christians, Hindus, and Buddhists. In *The Other Islam*, Stephen Schwartz traces the origins and history of Sufism, elucidates its teachings, and illustrates its links to the other religions. He comments on such celebrated Sufi poets and philosophers as Rumi and Al-Ghazali, and narrates their influence on the Kabbalah, on the descendants of the Jewish philosopher Maimonides, and on Christian mystics like Saint John of the Cross and Saint Teresa of Ávila as well as the American transcendentalists. Furthermore, Schwartz presents a fresh survey of Sufism in today's Islamic world, anticipating an intellectual renaissance of the faith and alternatives to fundamentalism and tyranny in Iraq, Saudi Arabia, Turkey, and Iran.

This edited book examines European external interventions in human security, in order to illustrate the evolution and nature of the European Union as a global political actor. In 2003, the EU deployed its first external mission under the European Security and Defence Policy (ESDP) with a military force to the former Yugoslav Republic of Macedonia. Since then it has instigated over 18 civilian and military missions to deal with humanitarian crises all over the world. This book presents a series of eight case studies of external interventions by the EU covering the Balkans, Africa, the Middle East, Afghanistan and Indonesia, to illustrate the nature of the EU as a global actor. Using the concept of human security to assess the effectiveness of these missions in meeting the EU's aim of being a 'force for good in the world', this study addresses two key issues: the need for an empirical assessment of EU foreign and security policies based on EU intervention in conflict and post-conflict situations and the idea of 'human security' and how this is applied in European foreign policy. This book will be of great interest to students of European Security, EU politics, human security, post-conflict reconstruction, and IR in general. Mary Kaldor is Co-Director of the Centre for the Study of Global Governance, London School of Economics and Political Science (LSE). Prior to this she worked at Sussex University as Jean Monnet Reader in Contemporary European Studies. Mary Martin is a Research Fellow at the Centre for the Study of Global Governance, the London School of Economics. From 2006-2009 she was co-ordinator of the Human Security Study Group. She was formerly a foreign correspondent and European editor for *The Daily Telegraph* and *Guardian* newspapers.

Since its formation in 1932, Saudi Arabia has been ruled by two interdependent families. The Al Sa'uds control politics and the descendants of Ibn Abd al-Wahhab impose Wahhabism—a violent, fanatical perversion of the pluralistic Islam practiced by most Muslims. Stephen Schwartz argues that Wahhabism, vigorously exported with the help of Saudi oil money, is what incites Palestinian suicide bombers, Osama bin Laden, and other Islamic terrorists throughout the world. Schwartz reveals the hypocrisy of the Saudi regime, whose moderate facade conceals state-sponsored repression and terrorism. He also raises troubling questions about Wahhabi infiltration of America's Islamic community and about U.S. oil companies sanitizing Saudi Arabia's image for the West. This sharp analysis and eye-opening expose illuminates the background to the September 11th terrorist attacks and offers new approaches for U.S. policy toward its closest ally in the Middle East.

Frank Bergon's astonishing portrayals of people in California's San Joaquin Valley reveal a country where the culture of a vanishing West lives on in many twenty-first-century Westerners, despite the radical technological transformations around them. All are immigrants, migrants, their children, or their grandchildren whose lives intertwine with the author's, including several races and ethnicities: Chicanos, Mexicans, African Americans, Italians, Asians, Native Americans, Scots-Irish descendants of Steinbeck's Okies, and Basques of the author's own heritage. Bergon presents a powerful array of rural and small-town Westerners who often see themselves as part of a region and a way of life most Americans aren't aware of or don't understand, their voices unheard, their stories untold. In these essays, Westerners from the diverse heritage of the San Joaquin Valley include California's legendary Fred Franzia, the maker of the world's best-selling Charles Shaw wines dubbed "Two-Buck Chuck," and Darrell Winfield, a Dust Bowl migrant and lifelong working cowboy who for more than thirty years reigned as the iconic Marlboro Man. Their voices help us understand the complexities of today's rural West, where Old West values intersect with New West realities. This is the West (and America today)—a region in conflict with itself.

Redeeming Sex

This case study of a politically reformed, middle-sized Midwestern city provides a model of fiscal stress that contrasts sharply with that of America's vast metropolitan centers. Dr. Rubin examines the interaction of social, political, and economic causes of the city's predicament. She then goes on to analyze the specific factors that solved the city's problems over a six-year period. Finally, she offers a self-correcting mechanism that would allow a city to save itself from financial trouble without direct state or federal assistance. This study suggests that local political factors were even more important than national factors in contributing to the city's fiscal stress. It also brings into question the theory that generosity to the poor creates urban fiscal stress and that giving less to the poor will solve urban financial problems.

Vertical Readings in Dante's Comedy is a reappraisal of the poem by an international team of thirty-four scholars. Each vertical reading analyses three same-numbered cantos from the three canticles: Inferno i, Purgatorio i and Paradiso i; Inferno ii, Purgatorio ii and Paradiso ii; etc. Although scholars have suggested before that there are correspondences between same-numbered cantos that beg to be explored, this is the first time that the approach has been pursued in a systematic fashion across the poem. This collection – to be issued in three volumes – offers an unprecedented repertoire of vertical readings for the whole poem. As the first volume exemplifies, vertical reading not only articulates unexamined connections between the three canticles but also unlocks engaging new ways to enter into core concerns of the poem. The three volumes thereby

provide an indispensable resource for scholars, students and enthusiasts of Dante. The volume has its origin in a series of thirty-three public lectures held in Trinity College, the University of Cambridge (2012-2016) which can be accessed at the 'Cambridge Vertical Readings in Dante's Comedy' website.
