Death Touch

The martial arts world is rife with tales of ancient masters who could cause instant or delayed death or illness by attacking secret points on the human body. But to

the Western mind, the concept of striking acupuncture points to disrupt the internal energy, or chi, seems like hocus-pocus. Thus, many serious martial artists dismiss the ancient art of dim-mak (also known as kyusho jitsu), which is literally translated as "death touch," as nothing more than fiction. However, if one can accept the idea that a dim-mak point is an avenue for attacking the nervous system, then it becomes easier to understand how striking specific points or groups of points can devastate the organs and the cardiovascular system. In this book, Dr. Michael Kelly, an osteopathic physician and experienced dim-mak practitioner, explains dim-mak's effects based on medical science. In layman's terms, Dr. Kelly reveals the physiological basis for what is clearly a very real and dangerous method of fighting. In the process of unraveling the mystery of this legendary art, Dr. Kelly makes the true genius of its founders brutally, and painfully, apparent.

Learn how to target the weaknesses of an attacker and effectively exploit them in order to defend yourself. The 36 Deadly Bubishi Points gives detailed explanations on how the pressure points of traditional Chinese medicine found in the Bubishi, the venerable "Bible of Karate," are used in attacking an opponent and how to defend yourself against such attacks. This book closely examines these vital points and the science behind them. While much has been written about the vital points

and their medicinal importance, thanks to the popularity of practices such as acupuncture, martial research on the subject has been lacking. Cardwell discusses the vital points from the perspective of an experienced martial artist—including how the body's vital points are related to the 8 extraordinary vessels and 12 meridians which circulate energy throughout the body. Through detailed step-by-step instructions and over 96 photographs and illustrations, *The 36 Deadly Bubishi Points* shows how this knowledge can be employed in self-defense. Respond to an attacker by employing these ancient methods in modern, violent situations.

Lian Gong Mi Jue: Secret Methods of Acquiring External and Internal Mastery

Combining Master Erle Montaigne's expertise with that of one of Australia's foremost acupuncturists, this remarkable work addresses the healing and martial sides of dim-mak under one cover for the first time ever. Every point on each of the 12 main energy meridians is examined in depth.

Treasured for centuries by karate's top masters, the *Bubishi* is a classic Chinese work on philosophy, strategy, medicine, and technique as they relate to the martial

arts. Referred to as the "bible of karate" by famous master Chojun Miyagi, for hundreds of years the Bubishiw was a secret text passed from master to student in China and later in Okinawa. All of karate's legendary masters have studied it, applied its teachings, or copied passages from it. No other classic work has had as dramatic an impact on the shaping and development of karate as the Bubishi. Karate historian and authority Patrick McCarthy spent over ten years researching and studying the Bubishi and the arts associated with it. The first English translation of this remarkable martial arts manual includes numerous explanations and notes. McCarthy's work also includes groundbreaking research on Okinawan and Chinese history, as well as the fighting and healing traditions that developed in those countries, making it a gold mine for researchers and practitioners alike. For the final word on the true origins and spirit of classic Okinawan martial arts, one need look no further. This karate book is one of the best karate training supplements available.

Black Belt

Secret training manuals, magic swords, and flying kung fu masters—these are staples of Chinese martial arts movies and novels, but only secret manuals have a basis in reality. Chinese martial arts masters of the past did indeed write such works, along with manuals for the general public. This collection introduces Western readers to the rich and diverse tradition of these influential texts, rarely

available to the English-speaking reader. Authors Brian Kennedy and Elizabeth Guo, who coauthor a regular column for Classical Fighting Arts magazine, showcase illustrated manuals from the Ming Dynasty, the Qing Dynasty, and the Republican period. Aimed at fans, students, and practitioners, the book explains the principles, techniques, and forms of each system while also placing them in the wider cultural context of Chinese martial arts. Individual chapters cover the history of the manuals, Taiwanese martial arts, the lives and livelihoods of the masters, the Imperial military exams, the significance of the Shaolin Temple, and more. Featuring a wealth of rare photographs of great masters as well as original drawings depicting the intended forms of each discipline, this book offers a multifaceted portrait of Chinese martial arts and their place in Chinese culture.

The Men Who Stare at Goats

Contrary to popular myth, the original purpose of dim mak was not the training of assassins. It was an intensive study of the medical arts that incorporated the martial arts, and its ultimate goal was to heal, not to destroy. True to the intent of the ancient Chinese masters, here is an undiluted, holistic study of dim mak as both a martial and a healing art. Included are a historical overview of dim mak and Traditional Chinese Medicine, discussions of the physiological mechanism and medical risks of acupoint strikes, an indepth introduction to the classical 36 Chamber training program traditionally used to teach dim mak; detailed analyses

of the medical and martial applications of each of the acupoints on the 12 main meridians, complete with detailed diagrams outlining each meridian system and its acupoint locations; and an introduction to herbal pharmacology, which was an integral part of traditional dim mak training. Appendices serve as quick reference guides to the activation method and results of selected point strikes. For academic study only.

The Book of Dim Mak

Devoted to the most enigmatic and little-known aspect of training of Shaolin monks. Training methods allow supernatural abilities to develop, far beyond abilities of an ordinary man. The book was written with the blessing and direct participation of the Head of the Shaolin Monastery Reverend Miao Xing, nicknamed "The Golden Arhat," one of the best Shaolin fighters of all times. These secret practices traditionally called "72 arts of Shaolin" or the essence of the Shaolin Combat Training.

Active Training

Today as in the ancient time special exercises aimed at acquiring "Internal Mastery"(GONG FU) are one of the most important elements of Shaolin monks

training. Those exercises is the core of the Shaolin martial training, they are the key to the true summit of mastery. An old proverb says: "If you exercise only the technique (style) but ignore special training you will be a nobody till your old days." "Special training" implies particular exercises for developing both WAI ZHUANG - "the External Power" and NEI ZHUANG - "the Internal Power." Those exercises (training procedures) are collected under a common title - LIAN GONG, literally "Exercising to Acquire Mastery."

The book "CHIN NA FA" was written by Liu Jin Sheng in collaboration with Zhao Jiang. The first edition of the book was issued in July of 1936 as a manual for the Police Academy of Zhejiang province. The book was printed by the publishing house Shan Wu in Shanghai..".If you are in command of this technique, you can sway the destiny of the enemy. You can kill your enemy, cause unbearable pain, tear his muscles and sinews, break his bones or make him unconscious for some time and completely disable him to resist. Even a woman or a physically weak man who mastered this technique can curb a strong enemy. This technique demands

deftness and skill, not brute force. It is necessary to train oneself daily to make the body flexible and nimble, but "hardness" must be hidden inside this "softness."/Author Liu Jin Sheng.The Police Academy of Zhejiang province.1-st of May of the 24-th year of the Chinese Republic (1935)/

Contrary to popular myth, the original purpose of dim mak was not the training of assassins. It was an intensive study of the medical arts that incorporated the martial arts, and its ultimate goal was to heal, not to destroy. The revised and expanded edition of The Book of Dim Mak (originally titled The Ancient Art of Life and Death) was written by black belts for black belts. It is an instructor-level reference on the study and practice of dim mak. Every traditional kata had three levels of skill and learning, and dim mak was no exception. The first level was learning the mechanics of the form. The second tier dealt with unveiling the intent of the form, often referred to as the "inner courtyard." Essentially, it involved identifying all the dim mak target sequences, as well as intense physical development required to build the necessary skill and precision. The third tier was the "master level," where the 36 chambers came into play. The grandmaster invited the student to advance from the inner courtyard knowledge and study directly with him. Within the ensuing 36 chamber training, the student learned all the dim mak applications completely (both offensive and defensive). When the

student graduated, he was considered an instructor of the system, as well as a traditional physician. This new edition contains expanded sections on the history of dim mak and the science of applied trauma, as well as all-new parts on the governing vessel (including unpublished material on GV 12 from the late Erle Montaigne) and the conception vessel. Those seeking a balanced, professional perspective on dim mak will find this comprehensive guide an indispensable resource.

The Two Dragons of Dim Mak

Sensei Senzo Tanaka of the Japanese Kokuryukai, was heavily involved in the training of many famous martial artists, including Chicago's infamous Count Dante, who participated in Oriental Death Matches and reportedly killed three men with his bare hands. He was scheduled to fight again in 1975 but his untimely death allowed his protege Frank Dux to attend and become the first American to win the event. His epic battle to honor his teachers was made famous in the movie Bloodsport. In the movie he is asked to prove he is a student of Senzo Tanaka and therefore eligible to fight in the closed Kumite matches by demonstrating his skill at Dim Mak, the delayed death touch. He does this by shattering a brick with a technique known as the Tibetan Burning Palm. . But, it was not Sensei Tanaka who taught Frank Dux the Tibetan Burning Palm. It was Grandmaster Lawrence Day. Sensei Tanaka told then Sensei Day to teach Frank Dux this technique so that he would be allowed to participate in the event.

Active Training has become a classic book in the field of training and development and a standard text on graduate-level HRD programs. It turned instructional design on its head by shifting the emphasis away from the instructor and on to the learner. A lot has happened in the training field in the last 10 years since the previous edition was written and this new edition -- the third significant update in 25 years -- adds sections to comprehensively cover new learning technologies and applications, including social media, m-learning, and creating affordable media; addresses the evolving role of trainers, including onboarding, leading change, coaching managers, mentoring, internal consulting, and building teams; tackles new business realities and challenges, including doing more with less, globalization, and working with multi-generational workforces; and offers best practices for new trainer tasks, skills, and knowledge, including working with the C-suite, engaging and retaining employees, developing leaders, vendor management, and working with SMEs. Revisions include updated workplace examples, new and revised templates and worksheets, updated theory and research sections, and expanded guidelines on evaluating and training ROI, extending the value of training programs, and managing Active Training programs to show state-of-the art applications. What will continue to set these books apart is the relevance of dozens of new examples, the wisdom and impact of fresh practical tips, and the rigor and expertise supporting dozens of exercises and techniques.

The Ancient Art of Life and Death

In 1998 while changing after a kali training session, a friend approached Kevin Secours with a videocassette and asked, "You ever seen the Russian martial arts?"

Looking at the Cyrillic label on the video, Secours asked, "Any good?" "It's interesting," the friend replied. "Weird as hell but interesting." Little did Secours know that tape would be his introduction to a 16-year (and counting) journey into the unorthodox world of the Russian martial arts, including years of high-level training under top Russian masters. On the video Secours saw mobility exercises unlike anything he had ever experienced. As he was to learn, the uniqueness of the Russian martial arts stemmed from the uniqueness of the country itself. The Cold War in the 1950s, during which the superpowers battled for supremacy, was the final forge that refined the Russian martial arts into what they are today. In anticipation of global warfare, the Soviet government commissioned combat researchers to travel throughout the world to study different approaches. They tested these methods and integrated the best concepts with their own native traditions. This period of development led to the creation of distinct Soviet martial arts, including Sport Sambo, Combat Sambo, and Samoz, which was later modified and became known simply as Systema (literally "the System"). Approaching Systema from a decidedly Western perspective, Secours pressure-tested the strengths and benefits of every concept and technique, and ultimately took only what served him. He built his Combat Systema curriculum on a scientific approach to bio-mechanics, breath training, and combat psychology. In *The Complete Book of Combat Systema*, he keeps things practical, provable, and profitable for you to incorporate what works into your self-defense training.

Mental Training of a Warrior

Karate-Do Kyo-han; The Master Text

Bizarre military history: In 1979, a crack commando unit was established by the most gifted minds within the U.S. Army. Defying all known laws of physics and accepted military practice, they believed that a soldier could adopt the cloak of invisibility, pass cleanly through walls, and—perhaps most chillingly—kill goats just by staring at them. They were the First Earth Battalion, entrusted with defending America from all known adversaries. And they really weren't joking. What's more, they're back—and they're fighting the War on Terror. An uproarious exploration of American military paranoia: With investigations ranging from the mysterious "Goat Lab," to Uri Geller's covert psychic work with the CIA, to the increasingly bizarre role played by a succession of U.S. presidents, this might just be the funniest, most unsettling book you will ever read—if only because it is all true and is still happening today.

Railroad Magazine

This is a guide to pressure point striking for the average martial artist. Sang H Kim

demystifies the lore of vital point striking and shows you realistic applications of vital point strikes for self-defence and combat sports. For those new to the concept of vital points, he begins by examining the Eastern theory of acupoints, meridians and ki (qi) and the Western scientific concepts of the nervous and circulatory systems, pain threshold and pain tolerance, and the relationship between pain and fear. This synthesis of accepted Eastern and Western theories helps the reader understand what makes vital point striking work and why it can be not only useful in fighting, but deadly. Based on this introduction, you will learn about 202 vital points for use in fighting including the name, point number, location, involved nerves and blood vessels, applicable techniques, sample applications, and potential results for each point. The points are illustrated in detail on an anatomically correct human model, with English, Chinese, and Korean names as well as point numbers for easy reference. In addition to identifying the vital points, Sang H. Kim gives you detailed information about the type of techniques that work for vital point striking including a discussion of fighting zones and ranges, plexus strikes, stance and footwork, bodily weapons, striking directions and angles and dozens of applications for common empty hand, grappling, groundfighting, knife and gun attacks. Based on over thirty years experience in the martial arts and in-depth research, Sang H. Kim has created one of the most complete books available on the art and science of vital point striking.

With over 40 years of experience Paul Brecher gives clear and insightful explanations of the Chinese Martial, Healing and Spiritual Arts. In this book he brings together all his knowledge and experience of Taoist Martial Arts. To help you to bring Yin Yang balance to your health and your life and make progress on your martial arts journey. Training in the Chinese Martial Arts brings three great benefits, good health, martial skill and understanding Tao - The Way. BOOK REVIEW by Paul Caswell This martial arts text covers all aspects of training, the theoretical, the historical and the technical. It is a rich and essential tool for anyone wanting to learn Old Yang Style Tai Chi Chuan, Pa Kua Chang and Wu Tang Shan

Nei Jia Chuan. There are no fancy stories, self-publicizing images or unnecessary material. Just excellent quality teaching notes, written simply and easy to follow. Don't be fooled in thinking that this is a how-to manual. It is a tool designed to build deeper learning and supplement good old-fashioned hard work done in class and at home. As a former student of Paul's in the late 90's I only wish that I had this manual available to me as a student. I remember trying to write my own detailed notes for the Cannon Fist Form and some of the Wu Tang forms. It took me more time than necessary; it took me away from training and into writing about training. This text that Paul has produced now means that students do not need to waste time making unnecessary training notes. Everything in his system is in this text. It fills in many gaps, answers many questions and acts as both a reminder for learning that has taken place, and a signpost for future learning paths. This book has shown me how much I had learned in my time with Paul but also how much I had not learned. Don't be fooled into thinking that Paul is a mere tai chi instructor turned writer, metaphorically pontificating from his hand carved wooden throne, slowly caressing his long white beard, observing his students from a far in the training hall and thus with disdain. In many ways, this text reflects Paul's characteristics both as a teacher, a healer and a man. He epitomizes the Yin Yang symbol. He (and thus the text) is a vast font of internal martial and healing art knowledge, but he does not want to hold onto this information and slowly give it to you like masters of old. This text should be likened to an encyclopedia of all he teaches. No secrets, no special techniques. But it is only a compliment to regular

training with Paul. This training manual demonstrates that Paul is tenacious and utterly committed to his training and thus developing his students. He smiles when he trains and does not take himself too seriously. This training manual is just that, a manual, not a doctrine to be worshipped. Paul is a formidable yet humble martial artist, he believes in what he does, what he teaches. More importantly, just like the material in this text, he can expertly and clearly demonstrate material in class. Paul is a writer second and a martial artist first. He can subtly evade your attacks, penetrate your defenses and make you wonder why you did not feel anything until his fingertips are millimeters from your eyes and throat whilst smiling as you realize what has just happened. I would whole-heartedly recommend this book to anybody with an interest in the Chinese Martial Arts and those on the path learning Paul's material, beginner or advanced. Note the emphasis on the word martial. This text, like Paul is a shining example of the chuan, the fist, the kung fu, the hard work being both an integral and primary aspect of the Chinese Internal Martial Arts. Paul Caswell 2009
