Gate Crashers: The Offensive Church makes the case that God desires to work through the church to do abundantly beyond all that we ask or think, according to the power that works within us, not because we deserve it, but for the praise, honor, and glory of his own name (Eph 3:20-21). Although much modern experience within the ranks of the professing church would cast doubt on this, the Scriptures reveal God's amazing plan and model for his church. While it may be true that our present system of church has drifted away from God's perfect design, the good news is that we can get back on track by submitting to his perfect will! Are you ready to get onboard the Offensive Church and become a gate crasher?

Unbinding Isaac

Getting the Message Through, the companion volume to Rebecca Robbins Raines' Signal Corps, traces the evolution of the corps from the appointment of the first signal officer on the eve of the Civil War, through its stages of growth and change, to its service in Operation DESERT SHIELD/DESERT STORM. Raines highlights not only the increasingly specialized nature of warfare and the rise of sophisticated communications technology, but also such diverse missions as weather reporting and military aviation. Information dominance in the form of superior communications is considered to be sine qua non to modern warfare. As Raines ably shows, the Signal Corps--once considered by some Army officers to be of little or no military value--and the communications it provides have become integral to all aspects of military operations on modern digitized battlefields. The volume is an invaluable reference source for anyone interested in the institutional history of the branch.

Molecular Science for Drug Development and Biomedicine

This was a duel between the stalwart of the Wehrmacht armored divisions the Panzerkampfwagen III and the American's as yet untested M3 Grant. In reality both would prove unequal to the task as they floundered amidst the rugged hills and ravines of the Tunisian landscape. This book charts the design and development of these two disparate rivals their vastly different armament and armor as well as their tactical concepts. Analysing the strengths and weaknesses of these two opponents, this book explores the successes and failures of the Grant and Panzer III as they clashed at the critical battles of North Africa. Moreover it is an insight into the lives of the tank crews themselves as they struggled with the twin horrors of tank warfare and the fight for survival amidst some of the most inhospitable terrain on earth.

Time

This collection investigates the culture and history of the Low Countries in the sixteenth and seventeenth centuries from both international and interdisciplinary perspectives. The period was one of extraordinary upheaval and change, as the combined impact of Renaissance, Reformation and Revolt resulted in the radically new conditions – political, economic and intellectual – of the Dutch Republic in its Golden Age. While many aspects of this rich and nuanced era have been studied before, the emphasis of this volume is on a series of interactions and interrelations: between communities and their varying but often cognate languages; between different but overlapping spheres of human activity; between culture and history. The chapters are written by historians, linguists, bibliographers, art historians and literary scholars based in the Netherlands, Belgium, Great Britain and the United States. In continually crossing disciplinary, linguistic and national boundaries, while keeping the culture and history of the Low Countries in the Renaissance and Golden Age in focus, this book opens up new and often surprising perspectives on a region all the more intriguing for the very complexity of its entanglements.

Tracing the history of the western from the advent of the talkies in 1929 to the end of the genre's golden age (1962), this book provides a year-by-year account of cultural and industry trends, Hollywood careers, and technical innovations. Hanfling (a writer for Nostalgia Westerns, deceased) places the western in its cultural context, considering its relation to and impact on American society in the middle part of the twentieth century. c.
