Practical Ethics in Sport Management

In *Ethics: The Essential Writings*, philosopher Gordon Marino skillfully presents an accessible, provocative anthology of both ancient and modern classics on matters moral. The philosophers represent 2,500 years of thought—from Plato, Kant, and Nietzsche to Alasdair MacIntyre, Susan Wolf, and Peter Singer—and cover a broad range of topics, from the timeless questions of justice, morality, and faith to the hot-button concerns of today, such as animal rights, our duties to the environment, and gender issues. Featuring an illuminating preamble, concise introductory essays on the giants of ethical theory, and incisive chapter headnotes to the modern offerings, this Modern Library edition is a perfect single-volume reference for students, teachers, and anyone eager to engage in reflection on ethical questions, including “What is the basis for our ethical views and judgments?” Gordon Marino is professor of philosophy and director of the Hong Kierkegaard Library at St. Olaf College in Northfield, Minnesota. A recipient of the Richard J. Davis Ethics Award for excellence in writing on ethics and the law, he is the author of *Kierkegaard in the Present Age*, co-editor of *The Cambridge Companion to Kierkegaard*, and editor of the Modern Library’s *Basic Writings of Existentialism*. His essays have appeared in *The New York Times*. From the Trade Paperback edition.

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to

the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Moral Theory and Moral Judgments in Medical Ethics

The 101st Airborne Division (Air Assault) has a long and rich heritage. As the world's only functional Air Assault Division, the 101st Airborne has pioneered the development of Air Assault tactics, techniques and procedures (TTPs). These tactics were quantifiably demonstrated in 1991 during Operation Desert Storm and most recently during Operation Enduring Freedom and Operation Iraqi Freedom. We are currently at war with dangerous and adaptive terrorist forces in complex environments. In response, the Division continually refines its TTPs, exploiting our unique capabilities to defeat our nation's enemies. This reference publication, The Gold Book June 2014, re-establishes the baseline for the planning and execution of Air Assault operations.

Principles of Biomedical Ethics

principles. A second solution to this problem is to develop a scale for weighing the significance of the conflicting principles in a given case and for concluding which action should be adopted because it is supported by the weightier considerations in that case. Such a solution seems more realistic than the lexical ordering approach, but the development of such a scale is a problematic task. Still other, more complex solutions are possible. Which is the best solution to this problem of conflicting principles of bioethics? We need a moral theory to answer that question. This is the first reason for concluding that the principles of bioethics are not the true foundations of justified judgment in bioethics. What is the problem of the

unclear scope and implications of the principles of bioethics and how can an appeal to moral theory help deal with that problem? The scope of a bioethical principle is the range of cases in which it applies. The implications of a bioethical principle are the conclusions to be derived from that principle in those cases in which it applies. It is clear from a review of the discussions in bioethics that there are major unclarities about the scope and implications of each of the principles. Consider, for example, the principle of autonomy.

Klaus Bockmuehl (1931-1989), former Professor for Systematic Theology at Regent College, Vancouver, published outstanding theological ethical works. The questions that Bockmuehl explored have not lost any relevance: How do we know what God's will is in a particular situation? Is Scripture sufficient for ethical decisions or should we listen to God? Does God even speak today? Is there a distinctive Christian ethic? Bockmuehl's central contribution can be found in his emphasis on the seminal role the Holy Spirit plays within Christian ethics, not only as the one who realizes the reign of God in the life of the individual but also as the one guiding the individual in a particular situation. This book is the first in-depth study of Bockmuehl, introducing readers to his theology and ethics, including a short biographical overview, delineating and appraising how he understands the role of the Holy Spirit in Christian ethics. It is not a book without criticism and its own creative contribution. Annette Glaw concludes her fascinating study with a proposal for a relational concept of the Holy Spirit as the loving presence of God in Christian ethics.

The Horsemen

There's no such thing as business ethics. How can that be? Because a single standard applies to both your business and personal life-and it's one we all know and trust: the Golden Rule. Now bestselling author John C. Maxwell shows you how this revered ideal works everywhere, and how, especially in business, it brings amazing dividends. There's No Such Thing As "Business" Ethics offers: * Stories from history, business, government, and sports that illustrate how talented leaders invoked this timeless principle * Examples of difficult business decisions-layoffs,

evaluations, billing clients, expansion-and how the Golden Rule applies to each * The five most common reasons people compromise their ethics-and how you can prevail over such moral obstacles * How applying the Golden Rule to business builds morale, increases productivity, encourages teamwork, lowers employee turnover, and keeps clients coming back. John C. Maxwell not only reveals the many ways the Golden Rule creates the perfect environment for business success, but does it with great wisdom, warmth, and humor. Backed by flawless research and the ideas of history's best thinkers, this engaging book brilliantly demonstrates how doing the right thing fosters a winning situation for all, with positive results for employees, clients, investors, and even your own state of mind. Business runs much more smoothly, profits increase, and you know that you've set the groundwork for years of future prosperity and it's all thanks to the tried-and-true Golden Rule.

CPA's Multistate Guide to Ethics and Professional Conduct 2008

In this comprehensive introduction to animal ethics, Lori Gruen weaves together poignant and provocative case studies with discussions of ethical theory, urging readers to engage critically and empathetically reflect on our treatment of other animals. In clear and accessible language, Gruen provides a survey of the issues central to human-animal relations and a reasoned new perspective on current key debates in the field. She analyses and explains a range of theoretical positions and poses challenging questions that directly encourage readers to hone their ethical reasoning skills and to develop a defensible position about their own practices. Her book will be an invaluable resource for students in a wide range of disciplines including ethics, environmental studies, veterinary science, women's studies, and the emerging field of animal studies and is an engaging account of the subject for general readers with no prior background in philosophy.

The Nicomachean Ethics

ÊIf my present reader happens to be a Boy Scout or a scout-master who wants the scouts to build a tower for exhibition purposes, he can do so by following the directions here given, but if there is real necessity for haste in the erection of this tower, of course we cannot build one as tall as we might where we have more time. With a small tower all the joints may be quickly lashed together with strong, heavy twine, rope, or even wire; and in the wilderness it will probably be necessary to bind the joints with pliable roots, or cordage made of bark or withes; but as this is not a book on woodcraft we will suppose that the reader has secured the proper material for fastening the joints of the frame of this signal-tower and he must now shoulder his axe and go to the woods in order to secure the necessary timber. First let him cut eight straight polesÑthat is, as straight as he can find them. These

poles should be about four and one half inches in diameter at their base and sixteen and one half feet long. After all the branches are trimmed off the poles, cut four more sticks each nine feet long and two and a half or three inches in diameter at the base; when these are trimmed into shape one will need twenty six or seven more stout sticks each four and one half feet long for braces and for flooring for the platform.

Ethics in Public Management

The most important subject you should study isn't found in school but inside this book. There is a growing percentage of Americans who think the country is on the wrong path. This raises two questions. Firstly, what path are we taking that is leading us to social and financial disasters? And even more importantly, what path should we be taking? Our history shows that occasionally we will face emergencies like the recent financial crisis. Our response is to spend money to bail out the sinking ship. But shouldn't we also fix the hole in the bottom of the ship once and for all? Politicians on either side are out of touch and leading us down a dead end path. Are oppressive taxes, deficit spending and massive bureaucracy the legacy we want to leave our children and grand children? The nation whose respect for freedom was the ideal of the modern world is now seeing that freedom eroded day by day. But this tragedy does not have to be. We can change course and reclaim what our founding fathers left us. History will indeed record the choice we make. Why not be the best we could be? Author John H.Zaugg is a lifelong student of the true American ideals and values and a supporter of personal liberty for all. He lives in Denver, Colorado. <http://SBPRA.com/JohnHZaugg>

Ethics

Animals and Ethics 101

101 Ethical Dilemmas

Animals and Ethics 101 helps readers identify and evaluate the arguments for and against various uses of animals, such: - Is it morally wrong to experiment on animals? Why or why not? - Is it morally permissible to eat meat? Why or why not? - Are we morally obligated to provide pets with veterinary care (and, if so, how much?)? Why or why not? And other challenging issues and questions. Developed as a companion volume to an online "Animals & Ethics" course, it is ideal for classroom use, discussion groups or self study. The book presupposes no conclusions on these controversial moral questions about the treatment of animals, and argues for none either. Its goal is to help the reader better engage the issues and arguments on all sides with greater clarity, understanding and argumentative rigor. Includes a bonus chapter, "Abortion and Animal Rights: Does Either Topic Lead to the Other?"

Khan's Cases

Would you rather your child was smart or good? Academic achievement is not the only important aspect of raising children. We also need to think consciously as to how we develop the next generation to be ethical thinkers and decent members of society. Ethical thinking has brought the world many things: democracy, freedom of speech and the end of slavery together with Monty Python, bikinis on Bondi Beach and Free Range Eggs. It is vital to the continued development of our world. The main place children learn basic morals and ethics is not from school or religion but from their parents in the home. Conversation is vital, and **Ethics 101** Conversations to have with your Kids prompts discussion by posing 101 ethical questions and their logical progressions. The questions are perfectly pitched to the world of the 10 to 15 year old: from friendships, sport, parties and bullying, through to animal rights and climate change.
