First Aid - CPR Training Manual

Advanced First Aid, CPR, and AED

CPR, AED and First Aid training for Caregivers

Advanced First Aid, CPR, and AED

This Australian CPR Training Video follows the guidelines issued by the ARC in December 2010. Designed as a training aid for professional first aid instructors. 'CPR Training' is also suitable for reinforcing and revising CPR techniques. This program uses a mix of demonstration and state-of-the-art animation to explain why, when and how to perform CPR. The animation is used to show the 'hidden' elements of the process, like how oxygen is extracted from a breath and transported to the brain. This innovative resource has been produced in consultation with first aid training professionals to make sure all elements are correct. There's also a bit of 'light-heartedness' to ensure the audience enjoy watching the program and as a consequence enjoy learning and revising CPR. This program: shows the checks that precede CPR gives real time and slow-motion demonstrations of compressions and rescue breaths demonstrates the use of AEDs explains DRS ABCD CPR Training

reinforces and complements the information given by instructors. It is also an excellent resource for revision. The program is popular with both audience and trainers, and so becomes a valuable asset in the delivery of memorable, quality CPR Training. It makes CPR courses more enjoyable and effective. CPR instructors applaud the clarity of description and the way CPR Training holds the audience's attention from start to finish. Those who watch CPR Training remember how to do CPR.

CPR/AED for the Professional Rescuer

Original Boy Scout Handbook is the official handbook of the Boy Scouts of America. It is a descendant of Baden-Powell's original handbook, Scouting for Boys, which has been the basis for Scout handbooks in many countries, with some variations to the text of the book depending on each country's codes and customs. The original edition of the handbook was based on Baden-Powell's work. Ernest Thompson Seton combined his Woodcraft manual, the Birch Bark Rolls, with Baden-Powell's Scouting for Boys. Subsequent works were done by other authors. William "Green Bar Bill" Hillcourt wrote the 6th, 7th, and 9th editions. Frederick L. Hines wrote the 8th, and Robert Birkby the 10th, 11th and 12th editions. The first Official Handbook, subtitled A Handbook of Woodcraft, Scouting, and Life-craft was published from July 1910 until March 1911 and appeared in eight distinct variations. It was written by Ernest Seton and drew greatly on Baden-Powell's Scouting for Boys, it included information on the organization of Scouting, signs and signaling, and camping, as well as Scouting games and a description of several Scouting honours. Notably, this book did not place emphasis on first aid, knife and axe use, or map and compass work, as later editions would. Because this edition was intended solely as a temporary guide until an authoritative handbook could be made, it is now known as the 1910 Original Edition Handbook. Basic Life Support Instructor Manual

This New American Red Cross CPR/AED for the Professional Rescuer Participant's Manual and course reflect changes based on the 2005 Consensus on Science for CPR and Emergency Cardiovascular Care (ECC) and the Guidelines 2005 for First Aid. Changes to this program and manual include simplifications to many of the CPR skill sequences, which helps improve retention. There have also been changes to help improve the quality of CPR. The integration of CPR skills into the operation of AEDs had changed to help improve survival from sudden cardiac arrest. Professional rescuers are now trained to use AEDs on adults and children. Information has been updated and added to this program to help professional rescuers administer epinephrine, aspirin and fixed-flow-rate oxygen. The skills learned in this course include adult, child and infant rescue breathing, conscious and unconscious choking, CPR, two-rescuer CPR and adult and child AED. Additional training can be added to this course including bloodborne pathogens training and emergency oxygen administration. While the skills and knowledge that professional rescuers use are increasing, this training will help you meet your most important responsibility as a professional rescuer- the responsibility to save lives.
