Success! in Clinical Laboratory Science

Praise for the first edition: “This is an excellent teaching guide and resource manual for instructors, gerontological nursing students, and practicing nurses and social workers who wish to learn more about geriatric concerns and care. It will be kept by nursing students long after they graduate as a guide to resources that will be valuable throughout their nursing careers. As a home care nurse working mainly with the geriatric community, I found the resources helpful in my practice. As an instructor, I found the book to be a very useful guide for teaching geriatrics.”
Score: 90, 4 Stars —Doody’s Medical Reviews “[This] is a unique volume that effectively addresses the lack of gerontology case studies for use with undergraduate nursing students. Case studies are a pedagogically powerful approach to active learning that offer opportunities to apply content to clinical practice.” —The Gerontologist “The case narrative approach of this book promotes active learning that is more meaningful to students (and practicing nurses) and more likely to increase the transfer of evidence into practice. An excellent resource for faculty (staff educators) to facilitate critical learning skills.” —Liz Capezuti, PhD, RN, FAAN Dr. John W. Rowe Professor in Successful Aging Co-Director, Hartford

Institute for Geriatric Nursing New York University College of Nursing Vivid case examples help guide nurses in developing appropriate interventions that include complementary and alternative health therapies and provide a basis for evaluating outcomes. Exercises interspersed throughout each case study include numerous open-ended and multiple-choice questions to facilitate learning and critical thinking. The text is unique in that some of the presented cases focus on psychosocial issues such as gambling addiction, hoarding behavior, emergency preparedness, and long-distance caregiving. Cases also depict geriatric clients who are living healthy, productive lives to counter myths and negative attitudes about older adults. Scenarios demonstrating ethical dilemmas prepare students to appropriately respond to “gray area” situations. The text is geared for AACN and NLN accreditation and is organized according to the needs of actual clinical settings. With cases that take place in the home and community or within primary, acute, and long-term care facilities, this book will be useful for courses specific to gerontology nursing or across any nursing curriculum. New to the Second Edition: A completely new section of Aging Issues Affecting the Family New cases addressing health care disparities, aging in place, and prevention of catheter-associated urinary tract infection Additional contemporary case studies The addition of Quality for Safety in Nursing Education (QSEN) initiatives A greater focus on prioritization and delegation of client’s needs infused throughout exercises

terminology specifically tailored to ICD-10-CM and ICD-10-PCS guidelines supply you with an excellent foundation for learning the medical terminology related to ICD-10-CM. Learn all the anatomy and physiology necessary to be able to understand medical reports and code accurately in ICD-10-CM/PCS. Pathology terms organized by ICD-10 disease and disorder categories let you learn terms in the same order they are presented in the coding manual. Guideline Alert! boxes highlight ICD-10-PCS coding information when relevant to medical terminology. Special Notes boxes present ICD-10 features that affect your understanding of the terminology presented. Root operation tables illustrate the root operations in PCS and their associated suffixes. Body Part key provides a complete list of body parts and how they should be coded in ICD-10. Pathology and procedure terminology tables list the word parts for each term, along with the definition so you become familiar with prefixes, suffixes, and combining forms. Exercises interspersed throughout the text encourage you to practice and learn as you move through the material. Be Careful! boxes warn you about similar and potentially confusing word parts and medical terms. Games and activities on accompanying Evolve website offer an easily accessible source for extra interactive practice and learning. Electronic medical record format illustrates the appearance of electronic records now being used in many healthcare settings. NEW! Pharmacology in each body system and a Pharmacology Basics appendix help you recognize drugs and medications in medical reports. NEW! More than 50 new images bring terminology to life. NEW! Additional procedural terms supply a more complete picture of the

number and kind of procedures you will encounter on medical reports. NEW! Normal Lab Values appendix familiarizes you with normal and abnormal lab values so you know when to search a medical record for possible additional diagnoses. NEW! CPHQ Exam Practice Questions are the simplest way to prepare for the CPHQ test. Practice is an essential part of preparing for a test and improving a test taker's chance of success. The best way to practice taking a test is by going through lots of practice test questions. Taking lots of practice tests helps ensure that you are not surprised or disappointed on your test day. Our CPHQ Exam Practice Questions give you the opportunity to test your knowledge on a set of questions. You can know everything that is going to be covered on the test and it will not do you any good on test day if you have not had a chance to practice. Repetition is a key to success and using practice test questions allows you to reinforce your strengths and improve your weaknesses. Detailed answer explanations are also included for each question. It may sound obvious, but you have to know which questions you

missed (and more importantly why you missed them) to be able to avoid making the same mistakes again when you take the real test. That's why our CPHQ Exam Practice Questions include answer keys with detailed answer explanations. These in-depth answer explanations will allow you to better understand any questions that were difficult for you or that you needed more help to understand.

Certified Coding Associate (CCA) Exam Preparation, Seventh Edition

Ivan Goldstein is a 19-year-old green-as-grass soldier heading into his first battle: the Battle of the Bulge, World War II's fiercest engagement between the American army and Hitler's army. A bow gunner on a Sherman tank, Private Goldstein is only hours into his first battle when his tank is hit by an enemy shell, and he is almost killed. Goldstein escapes with his life . . . only to be captured by the Germans. This could be the story of many young men from what has rightly been called "the Greatest Generation," but Goldstein is not any young man. He is an American Jew. And when a German officer learns this, the officer says, "In the morning, take the Jew out and shoot him." What follows is an epic story of survival in the face of seemingly insurmountable odds that is sure to engage everyone interested in the war against the Third Reich.
