Xinjiang, China's far northwestern province where the majority of the population are Muslim Uyghurs, was for most of its history contested territory. On the Silk Road, a region of overlapping cultures, the province was virtually independent until the late nineteenth century, nominally part of the Qing Empire, with considerable interest taken in it by the British and the Russians as part of their Great Game rivalry in Asia. Ruled by warlords in the early twentieth century, it was occupied in 1949-50 by the People's Liberation Army, since when attempts have been made to integrate the province more fully into China. This book outlines the history of Xinjiang. It focuses on the key city of Kashgar, the symbolic heart of Uighur society, drawing on a large body of records in which ordinary people provided information on the period around the communist takeover. These records provide an exceptionally rich source, showing how ordinary Uyghurs lived their everyday lives before 1949 and how those lives were affected by the arrival of the Chinese Communist Party and its army. Subjects covered by the book include Eastern Turkestan independence, regional politics, local government, the military, taxation, education and the press.

ATTENTION!!! ATTENTION!!! This is the first romance book I wrote, so it was a little stretch for me to do it. It took a while. Now, the filling of the book is I'm not going tell. I'll let you, the readers find out. I will divulge one bit of info. Readers of thirteen and up should read it. It's a bit graphic. Those in that age bracket, are pretty equipped for it.

Adventure Rising

Babel, Alan Burns's fourth critically acclaimed novel, contains all the hallmarks of the aleatoric style he helped to define--shot through with seemingly random newspaper headlines, poems, snatches of conversation and anecdote, which

both heighten and undermine meaning, and characterized by extreme contrasts of mood and style and startling surrealist juxtapositions of images and ideas. By turns comic and tragic, tender and brutal, religious and blasphemous, the narrative rockets from London to the United States to Vietnam to interstellar space, familiar events are constantly fragmented and reset into new patterns, and ultimately Babel becomes a cautionary tale about the tragedy arising from attempting to build Utopia.

Magnetic Current

Hydrogen Fuel Cells for Road Vehicles addresses the main issues related to the application of hydrogen fuel cell technology in the road transportation sector. A preliminary treatment is given on fuel resources and atmospheric pollution concerns which are closely related to the current technology (internal combustion engine) used for moving people and goods. The authors deal, in particular, with the problems that can hinder a widespread hydrogen market (production, storage and distribution), as well as giving an analysis of fuel cell technologies available for utilization of this energy carrier in the automotive field. Hydrogen Fuel Cells for Road Vehicles also examines the concerns faced during the design and realization of a PEM fuel cell system with optimal size and efficiency, evidencing the impact of the individual auxiliary components on energy losses and dynamic stack performance. The book ends with the analysis of two practical case studies on fuel cell propulsion systems. Hydrogen Fuel Cells for Road Vehicles is a useful text for researchers, professionals and advanced students in the fields of automotive and environmental engineering.
