The Language of Things

Volkswagen GTI Golf-Jetta Service Manual, 1985-1992

We live in a world drowning in objects. But what do they tell us about ourselves? In *The Language of Things*, Deyan Sudjic charts our relationship - both innocent and knowing - with all things designed. From the opulent excesses of the catwalk, or the technical brilliance of a laptop computer, to the subtle refinement of a desk lamp, he shows how we can be manipulated and seduced by our possessions. Sudjic delivers an exhilarating insider's history of design as he introduces us to the world's most original innovators and reveals the hidden meanings in their work. How did the design of a pistol influence a car? Why did a chair make a cafe the most fashionable place in Paris? What can we learn from a banknote, a police uniform or a typeface? And why can't any of us decide what size to wear our trousers? In an age when the word 'designer' has become synonymous with the cynical and manipulative, Sudjic examines the qualities behind successful design and explores the conflicting tensions between high art and mass production. Brilliant and courageous, *The Language of Things* defines the visual vocabulary of our time and gives us a powerful new way of seeing the world.

Royal Aircraft Factory S.E.5

This rakish fighter became known as the 'mount of aces', being the type on which the most successful fighter pilots of Britain and her Empire went to war throughout the last 18 months of World War 1. It was the Spitfire of the Western Front: delivering greater speed, range, firepower and all-round performance than the vast majority of its opposition. Often working in partnership with the more pugnacious Sopwith Camel, the S.E.5 and S.E.5a ensured that no enemy aircraft was safe even a long way behind their own lines as the Royal Flying Corps gradually won air superiority over the trenches.
