#1 New York Times Bestseller In *Being Mortal*, bestselling author Atul Gawande tackles the hardest challenge of his profession: how medicine can not only improve life but also the process of its ending. Medicine has triumphed in modern times, transforming birth, injury, and infectious disease from harrowing to manageable. But in the inevitable condition of aging and death, the goals of medicine seem too frequently to run counter to the interest of the human spirit. Nursing homes, preoccupied with safety, pin patients into railed beds and wheelchairs. Hospitals isolate the dying, checking for vital signs long after the goals of cure have become moot. Doctors, committed to extending life, continue to carry out devastating procedures that in the end extend suffering. Gawande, a practicing surgeon, addresses his profession's ultimate limitation, arguing that quality of life is the desired goal for patients and families. Gawande offers examples of freer, more socially fulfilling models for assisting the infirm and dependent elderly, and he explores the varieties of hospice care to demonstrate that a person's last weeks or months may be rich and dignified. Full of eye-opening research and riveting storytelling, *Being Mortal* asserts that medicine can comfort and enhance our experience even to the end, providing not only a good life but also a good end.

The only NLN-PAX study guide based on the evidence-based method of Cognitive Recall, with a customizable study schedule. Designed specifically for the NLN PAX, this study guide includes: A customizable plan to fit your unique study schedule 2 FULL practice tests with guided answer explanations 300+ total practice and example questions Concise coverage of all domains and topics, including review items WHAT IS COGNITIVE RECALL? Cognitive Recall is the science of implementing the optimal space of time between learning something, then reviewing it, and later quizzing yourself on it. Scientists say studying effectively is not a function of how long or how often you study - it's the order, schedule, and timing of your studies.

Traditional study guides tend to be nothing more than extended versions of repeated cram sessions, which is neither efficient or effective. Cramming is the opposite of Cognitive Recall learning, evidenced by the extremely short-lived benefits. The memories from a cram session have been shown to fade away after only a few hours. That's not an option if you are serious about passing the NLN-PAX. CUSTOMIZED STUDY SCHEDULE Designed around the ideal timeframe of 30-days, our system can be easily extended or reduced to fit your specific schedule and test date. This PAX Guide has the functionality of a customizable calendar telling you not only what to focus on, but when to focus on it.

Since its formation in 1932, Saudi Arabia has been ruled by two interdependent families. The Al Sa'uds control politics and the descendants of Ibn Abd al-Wahhab impose Wahhabism—a violent, fanatical perversion of the pluralistic Islam practiced by most Muslims. Stephen Schwartz argues that Wahhabism, vigorously exported with the help of Saudi oil money, is what incites Palestinian suicide bombers, Osama bin Laden, and other Islamic terrorists throughout the world. Schwartz reveals the hypocrisy of the Saudi regime, whose moderate facade conceals state-sponsored repression and terrorism. He also raises troubling questions about Wahhabi infiltration of America's Islamic community and about U.S. oil companies sanitizing Saudi Arabia's image for the West. This sharp analysis and eye-opening expose illuminates the background to the September 11th terrorist attacks and offers new approaches for U.S. policy toward its closest ally in the Middle East.

### **Barron's Nursing School Entrance Exams, 4th Edition**
