CNN host and best-selling author Fareed Zakaria argues for a renewed commitment to the world's most valuable educational tradition. The liberal arts are under attack. The governors of Florida, Texas, and North Carolina have all pledged that they will not spend taxpayer money subsidizing the liberal arts, and they seem to have an unlikely ally in President Obama. While at a General Electric plant in early 2014, Obama remarked, "I promise you, folks can make a lot more, potentially, with skilled manufacturing or the trades than they might with an art history degree." These messages are hitting home: majors like English and history, once very popular and highly respected, are in steep decline. "I get it," writes Fareed Zakaria, recalling the atmosphere in India where he grew up, which was even more obsessed with getting a skills-based education. However, the CNN host and best-selling author explains why this widely held view is mistaken and shortsighted. Zakaria eloquently expounds on the virtues of a liberal arts education—how to write clearly, how to express yourself convincingly, and how to think analytically. He turns our leaders' vocational argument on its head. American routine manufacturing jobs continue to get automated or outsourced, and specific vocational knowledge is often outdated within a few years. Engineering is a great profession, but key value-added skills you will also need are creativity, lateral thinking, design, communication, storytelling, and, more than anything, the ability to continually learn and enjoy

learning—precisely the gifts of a liberal education. Zakaria argues that technology is transforming education, opening up access to the best courses and classes in a vast variety of subjects for millions around the world. We are at the dawn of the greatest expansion of the idea of a liberal education in human history.

In *Tide Players*, acclaimed *New Yorker* contributor and author Jianying Zha depicts a new generation of

movers and shakers who are transforming modern China. Through half a dozen sharply etched and nuanced profiles, *Tide Players* captures both the concrete detail and the epic dimension of life in the world's fastest-growing economy. Zha's vivid cast of characters includes an unlikely couple who teamed up to become the country's leading real-estate moguls; a gifted chameleon who transformed himself from Mao's favorite "barefoot doctor" during the Cultural Revolution to a publishing maverick; and a tycoon of home-electronic chain stores who insisted on avenging his mother, who had been executed as "a counter-revolutionary criminal." Alongside these entrepreneurs, Zha also brings us the intellectuals: a cantankerous professor at China's top university; a former cultural minister turned prolific writer; and Zha's own brother, a dissident who served a nine-year prison term for helping to found the China Democracy Party. Deeply engaging, lucid, and poignant, Zha's insightful "insider-outsider" portraits offer a picture of a China that few Western readers have seen before. *Tide Players* is essential reading for anyone seeking to understand today's China.

The Speaker

The most powerful force in the world economy today is the redefinition of the relationship between state and marketplace - a process that goes by the name of privatization though this term is inadequate to express its far-reaching changes. We are moving from an era in which governments sought to seize and control the 'commanding heights' of the economy to

an era in which the idea of free markets is capturing the commanding heights of world economic thinking. Basic views of how society ought to be organized are undergoing rapid change, trillions of dollars are changing hands and so is fundamental political power. Great new wealth is being created - as are huge opportunities and huge risks. Taking a worldwide perspective, including Britain, where the process began with Mrs Thatcher, Europe and the former USSR, China, Latin America and the US, THE COMMANDING HEIGHTS shows how a revolution in ideas is transforming the world economy - why it is happening, how it can go wrong and what it will mean for the global economy going into the twenty-first century.

In High Tide at Pelican Pointe, we once again begin our story in the quaint little town of Park Place, nestled in the heart of the Olde English District of South Carolina. We find the good Reverend Rock Clark and his very pregnant wife, Liz, making preparations to take a much needed beach vacation, leaving the busyness of his growing congregation behind. They've been gifted ten days in Miss Edie's Pelican Pointe beach house with three days alone before the rowdy Clark clan joins them for their annual pilgrimage to the sea. Even though the Clarks add a lot of fun and adventure to the vacation, Liz is a little overwhelmed by all the drama and activity of a large family, but she soon fits right in and grows to love them all. She and Rock will need their support when the story takes a sudden turn from a few days of peace and tranquility by the sea to the dark and sinister happenings on the west end of the island. Hold on to your beach hats, because for Rev Rock and Liz, there's trouble in paradise.

One of the great enigmas in the Bible is that concerning John the Baptizer. While the physical aspects of who he was are quite apparent from the Scriptures, the spiritual aspects are ambiguous. We know that he was the one who was ordained to "Prepare the way of the Lord," "to make ready a people prepared for the Lord." There is, however, another aspect of John's identity that is often overlooked. On at least two separate occasions Jesus indicated that John was more than just someone who was born to be His forerunner. This short study not only examines many of the details of John's life, but also attempts unravel the mystery about who he really was. Finally, by using the example of John the Baptist, this book also looks at how the Faithful God fulfills His promises and purposes despite having to deal with unbelieving man.

"I too am not a bit tamed—I too am untranslatable / I sound my barbaric yawp over the roofs of the world."—Walt Whitman, "Song of Myself," *Leaves of Grass*

The American Yawp is a free, online, collaboratively built American history textbook. Over 300 historians joined together to create the book they wanted for their own students—an accessible, synthetic narrative that reflects the best of recent historical scholarship and provides a jumping-off point for discussions in the U.S. history classroom and beyond. Long before Whitman and long after, Americans have sung something collectively amid the deafening roar of their many individual voices. The Yawp highlights the dynamism and conflict inherent in the history of the United States, while also looking for the common threads that help us make sense of the past. Without losing sight of politics and power, The American Yawp incorporates transnational perspectives, integrates diverse voices, recovers narratives of resistance, and explores the complex process of cultural creation. It looks for America in crowded slave cabins, bustling markets, congested tenements, and marbled halls. It navigates between maternity wards, prisons, streets, bars, and boardrooms. The fully peer-reviewed edition of The American Yawp will be available in two print volumes designed for the U.S. history survey. Volume I begins with the indigenous people who called the Americas home before chronicling the collision of Native Americans, Europeans, and Africans. The American Yawp traces the development of colonial society in

the context of the larger Atlantic World and investigates the origins and ruptures of slavery, the American Revolution, and the new nation's development and rebirth through the Civil War and Reconstruction. Rather than asserting a fixed narrative of American progress, *The American Yawp* gives students a starting point for asking their own questions about how the past informs the problems and opportunities that we confront today.

James Abram Garfield (November 19, 1831 - September 19, 1881) was the 20th president of the United States, serving from March 4, 1881 until his death by assassination six and a half months later. He was the first sitting member of Congress to be elected to the presidency, and remains the only sitting House member to gain the White House.[1] Garfield entered politics as a Republican in 1857. He served as a member of the Ohio State Senate from 1859 to 1861. Garfield opposed Confederate secession, served as a major general in the Union Army during the American Civil War, and fought in the battles of Middle Creek, Shiloh, and Chickamauga. He was first elected to Congress in 1862 to represent Ohio's 19th District. Throughout Garfield's extended congressional service after the Civil War, he firmly supported the gold standard and gained a reputation as a skilled orator. Garfield initially agreed with Radical Republican views regarding Reconstruction, but later favored a moderate approach for civil rights enforcement for freedmen.
