Is there a vigilante on the Metropolitan Police Department? Who is playing avenger and cleaning up the streets of violent offenders and predators that slipped through the criminal justice system? Meet Antonio Briscoe, a highly intelligent, over achiever and police officer who is tired of seeing the system fail, one criminal after another. Briscoe takes justice into his own hands in the new novel 18th & M. But is he protecting the Washington, D.C. community or has he lost perspective? Will he get caught or will his special training and military background keep him flying under the radar? This captivating novel is energetic and suspenseful, a "movie-like" read that delves into the life and mind of Briscoe, as well as the criminal justice system. Page after page, you learn Briscoe is more than a police officer - he is a weapons specialist with special ops training and is haunted by horrific images of the evil he has done.

Most of us know that we can perform athletically at higher levels. We know we can be better. We notice that we seem to be stuck in patterns of similar mistakes. Many of us are on an endless search for changes in technique and technology, searching for the missing key ingredients to success. If we're paying close attention to how we train and compete, we notice that we sabotage and limit

ourselves. We may also suspect that we unconsciously sabotage ourselves because we find ourselves doing things that we know are counterproductive, but can't seem to get out of our own way. We also can't usually figure out why we undercut our ability. The most significant challenges we usually face are the mental ones and not the physical ones. The key problem that many of us have is that we don't know how to stop sabotaging ourselves. Even if we recognize how we are sabotaging ourselves, we may not be able to stop. Intellectual knowledge is helpful, but it isn't sufficient to make deep and powerful changes. We've tried everything we know and it isn't enough. We need something deeper and more powerful. There's a deeper way of knowing and a deeper self-knowledge that we find when we develop a meditation practice. We find our center where we are in touch with our deep wisdom and passion. When we live, train, and compete from our center, we find more clarity about our strengths and weaknesses. We learn that the barriers that appear to be holding us back are actually invitations to develop, change, improve, and tap into the deep strength that we find inside in order to follow through on what will help us more forward as athletes and people. This book of daily meditations for athletes has 366 meditations, one for each day of the calendar year. Each month has a different theme. Each meditation has some thoughts for your reflection and has a unique affirmation at the end, which you use for your meditation. You mindfully read the reflection and then meditate on the affirmation. You'll learn straightforward and powerful methods for meditating on the right things in the right ways. The Second Edition is simpler to use and more powerful to practice. It has an updated Introduction, including an assessment to help athletes figure out what parts of their mental game need work. A number of the meditations have been updated for clarity and simplicity. The affirmations are simpler, which makes meditation easier. There is now a chapter on confidence and a new chapter on being a powerful athlete. The meditation techniques in the Introduction and the Meditation Scripts chapter are updated. The sanctuary meditation technique is more integrated throughout the book. The language in the book is more conversational. The essence of a strong mental approach to high performance is the ability to manage our thinking, emotions, and physical states in order to perform at our highest levels. We learn to manage our thinking, emotions, and physical states by practicing the right kinds of meditation. All athletes want to perform "in the zone" more than they do currently. Performing in the zone is a meditative state. To learn to perform in the zone more often, athletes can learn to meditate on the right things in the right ways. Now you can develop your mental game in as little as 15 minutes per day.

"This collection of essays marking the twenty-fifth anniversary of the publication of Michael Omi and Howard Winant's *Racial Formation in the United States* demonstrates the importance and influence of the concept of racial formation. The range of disciplines, discourses, ideas, and ideologies makes for fascinating reading, demonstrating the utility and applicability of racial formation theory to diverse contexts, while at the same time presenting persuasively original extensions and elaborations of it. This is an important book, one that sums up, analyzes, and builds on some of the most important work in racial studies during the past three decades."—George Lipsitz, author of *How Racism Takes Place*

"*Racial Formation in the Twenty-First Century* is truly a state-of-the-field anthology, fully worthy of the classic volume it honors—timely, committed, sophisticated, accessible, engaging. The collection will be a boon to anyone wishing to understand the workings of race in the contemporary United States." —Matthew Frye Jacobson, Professor of American Studies, Yale University

"This stimulating and lively collection demonstrates the wide-ranging influence and generative power of Omi and Winant's racial formation framework. The contributors are leading scholars in fields ranging from the humanities and social sciences to legal and policy studies. They extend the framework into new terrain, including non-U.S. settings, gender and sexual relations, and the contemporary warfare state. While acknowledging the pathbreaking nature of Omi and Winant's intervention, the contributors do not hesitate to critique what they see as limitations and omissions. This is a must-read for anyone striving to make sense of tensions and contradictions in racial politics in the U.S. and transnationally."—Evelyn Nakano Glenn, editor of *Shades of Difference: Why Skin Color Matters*

As a leading Confederate general, Braxton Bragg (1817–1876) earned a reputation for incompetence, for wantonly shooting his own soldiers, and for losing battles. This public image established him not only as a scapegoat for the South's military failures but also as the chief whipping boy of the Confederacy. The strongly negative opinions of Bragg's contemporaries have continued to color assessments of the general's military career and character by generations of historians. Rather than take these assessments at face value, Earl J. Hess's biography offers a much more balanced account of Bragg, the man and the officer. While Hess analyzes

Bragg's many campaigns and battles, he also emphasizes how his contemporaries viewed his successes and failures and how these reactions affected Bragg both personally and professionally. The testimony and opinions of other members of the Confederate army--including Bragg's superiors, his fellow generals, and his subordinates--reveal how the general became a symbol for the larger military failures that undid the Confederacy. By connecting the general's personal life to his military career, Hess positions Bragg as a figure saddled with unwarranted infamy and humanizes him as a flawed yet misunderstood figure in Civil War history.

This revised and expanded edition of a classic textbook provides a concise introduction to basic concepts of acoustics and digital speech processing that are important to linguists, phoneticians, and speech scientists. The second edition includes four new chapters that cover new experimental techniques in acoustic phonetics made possible by the use of computers. Assuming no background in physics or mathematics, Ladefoged explains concepts that must be understood in using modern laboratory techniques for acoustic analysis, including resonances of the vocal tract and the relation of formants to different cavities; digital speech processing and computer storage of sound waves; and Fourier analysis and Linear Predictive Coding, the equations used most frequently in the analysis of speech sounds. Incorporating recent developments in our knowledge of the nature of speech, Ladefoged also updates the original edition's discussion of the basic properties of sound waves; variations in loudness, pitch, and quality of speech sounds; wave analysis; and the hearing and production of speech. Like its predecessor, this edition of *Elements of Acoustic Phonetics* will serve as an invaluable textbook and reference for students and practitioners of linguistics and speech science, and for anyone who wants to understand the physics of speech.

Jalil Muntaqim is a former member of the Black Panther Party and the Black Liberation Army. For over forty years, Jalil has been a political prisoner, and one of the New York Three (NY3), in retaliation for his political activism. *Escaping the Prism Fade to Black* is a collection of Jalil's poetry and essays, written from behind the bars of Attica prison. Combining the personal and the political, these texts afford readers with a rare opportunity to get to know a man who has spent most of his life-over forty years-behind bars for his involvement in the Black Liberation Movement of the 1960s and early 1970s. Jalil's poetry deals with a range of themes-spirituality, history, and the struggle for justice; depression, humor, and sexual desire; the pain and loneliness of imprisonment, the ongoing racist oppression of New Afrikan people in the United States, and the need to find meaning in one's life. At the same time, his political essays show him to be as eager as ever to intervene in and grapple with the events of today, always with an eye to concretely improving the lives of the oppressed. *Escaping the Prism Fade to Black* also includes an extensive examination of the U.S. government's war against the Black Liberation Army in general, and Jalil and the New York Three in particular, by renowned scholar-activist Ward Churchill. In this highly detailed essay, "The Other Kind: On the Integrity, Consistency, and Humanity of Jalil Abdul Muntaqim," Churchill traces this story from the FBI's murderous COINTELPRO repression of the Black Panther Party, through the NEWKILL operation which led to the NY3's incarceration, to the more recent Phoenix Taskforce which orchestrated the re-prosecution of Jalil and other veteran Black activists, in the case of the San Francisco 8. With illustrations by revolutionary prisoner-artists Zolo Agona Azania and Kevin "Rashid" Johnson, as well as various outside artist-activists.

Graffiti now appears in galleries and museums worldwide. Artists who were once hoodied, hidden and nocturnal are out in the open, working in broad daylight from cherry-picker platforms. In East Ended you see every code of cool fashion and attitude, alongside scenes of poverty and people on the streets trading in anything but the cool. Gentrification has brought a numbing sameness. Yet look carefully and you'll spot the cheeky protest posters - political critique to climate change resistance - purposefully plastered over and defacing the ads. The voice of the streets is reclaiming its walls.
