Few war films made about the 1939-45 period are complete without sight of a boxy little Kübelwagen light utility vehicle being smartly driven by a German officer. Designed by Ferdinand Porsche and built by Volkswagen, the 'Kübel' was to the Germans what the Jeep was to the Allies and was used widely by the Wehrmacht and the Waffen-SS. When production ceased at the end of the war, 50,435 Kübelwagen had been built. Of simple but sturdy construction, the VW Type 82 Kübelwagen (which translates as 'bucket car' because of its similarity to a metal

bathtub on wheels) was based closely on the legendary VW Beetle. Its winning design features included air cooled engine (the absence of a radiator meant the engine was less vulnerable to bullet damage), a light-weight, flat and smooth under-body that allowed the car to slide over the surface when its wheels were sinking into sand, mud or snow, independent suspension, portal gear hub reduction and self-locking differential. Because the body was not a load-bearing part of the structure of the vehicle it could easily be modified to special purposes. Several dozen variants of the 'Kübel' were developed and built during the war including its cousin the Schwimmwagen. The VW Type 128 and 166 Schwimmwagen (which means floating or swimming car) were amphibious four-wheel drive off-roaders. Like the Kübel, they were used widely by the Wehrmacht and the Waffen-SS during the Second World War. The Type 166 Schwimm is the most numerous mass-produced amphibious car in history (14,265 between 1942 and 1944). Erwin Komenda, Ferdinand Porsche's first car body designer, developed an all-new unitized body-tub structure for the Schwimmwagen swimming car. When crossing water a screw propeller could be lowered from the rear deck engine cover and coupled to the engine's crankshaft to provide drive. The 'Schwimm' also shared many of the Kübel's mechanicals. The appeal of the Kübel lived on long after the war's end when a derivative version, the Volkswagen Type 181, was manufactured by VW from 1968 to 1983. This was a two-wheel drive, four-door, convertible, off-road military vehicle, which had been developed for the German Army but was also sold to the civilian market as the Kurierwagen in Germany, the Trekker in the UK,

the Thing in the US, and the Safari in Mexico. In recent years both the Kübel and Schwimm have acquired something of a cult status among military vehicle collectors worldwide, particularly in Europe (eg, Germany, Poland Czech Republic, Switzerland), the UK and US. There are literally dozens of Kübelwagen and Schwimmwagen enthusiast/owner/interest groups! About 150 original Type 166 Schwimmwagens remain today.

The Jeep was the primary light four-wheel-drive vehicle of the US Army and allies during the Second World War and the post-war period. It was originally designed to meet a 1940 US Army specification, and over 600,000 examples were built in both Ford and Willys forms. The Jeep saw service all over the world, and a healthy number of restored authentic military examples can still be seen today in the hands of enthusiasts. This book provides a brief history of this iconic vehicle, and a fascinating behind-the-scenes insight into what is involved in restoring, operating and maintaining a Jeep today, 70 years after the prototype first appeared.
