The Symposium 'Meteorite Research' was conceived originally at the second meeting of the UNESCO Working Group on Meteorites, held in Paris October 18-20, 1965, under the chairmanship of Professor J. Orce!' In addition to the Chairman the following were present: Dr. G. Harbottle, Dr. M. H. Hey, Dr. B. H. Mason, Dr. P. M. Millman, Professor K. I. Sztr6kay. Dr. E. M. Fournier d'Albe represented the UNESCO

Secretariat. Recommendation No.4 from the minutes of this meeting reads as follows: "The Working Group, in view of the need to strengthen international cooperation in meteorite research, asks that the International Atomic Energy Agency be requested to consider the possibility of organizing, in 1968, an interdisciplinary conference on meteorites, in collaboration with UNESCO and the appropriate international scientific organizations." After approval in principle of this recommendation had been secured from various international agencies and unions, plans for the symposium were consolidated at the third and final meeting of the Working Group, held in Paris October 12-14, 1966, the members in attendance being the same as for the second meeting.

For the aficionado of farm equipment, or the scion of an old farming family nostalgic for the old days, or the grown-up boy who still loves a classic piece of old-time machinery, the vintage tractor can be a thrilling find like no other. This book tells dozens of stories of such discoveries, of the treasured old tractor parked in a

shed since 1927, of the pristine model unearthed at an estate sale, of the broken-down old beauty stashed in a barn where generations of children have made their secret hideaways. These are the classic tractors that are often as hard to find as a needle in a haystack—but far more fun to discover, as all of these delightful stories make abundantly clear.

Planetary Materials

Power Farming in Australia and New Zealand and Better Farming Digest

Volume 36 of *Reviews in Mineralogy* presents a comprehensive coverage of the mineralogy and petrology of planetary materials. The book is organized with an introductory chapter that introduces the reader to the nature of the planetary sample suite and provides some insights into the diverse environments from which they come. Chapter 2 on Interplanetary Dust Particles (IDPs) and Chapter 3 on Chondritic Meteorites deal with the most primitive and unevolved materials we have to work with. It is these materials that hold the clues to the nature of the solar nebula and the processes that led to the initial stages of planetary formation. Chapter 4, 5, and 6 consider samples from evolved asteroids, the Moon and Mars

respectively. Chapter 7 is a brief summary chapter that compares aspects of melt-derived minerals from differing planetary environments.

A complete visual reference for meteorite classification, this atlas combines high resolution optical microscope images with detailed descriptions. It provides a systematic account of meteorites and their most important classification parameters, making it an essential resource for meteorite researchers. Each chapter starts with a description of the meteorite class, with a summary of the mineralogical, chemical and isotopic characteristics of the group. The full-color images are taken in plane- and cross-polarized light and reflected light, and arranged to highlight textural variations in meteorites. Specimens are grouped to show the effects of increasing thermal alteration and shock, as well as variations in chondrule size and type. Chapters on iron meteorites, pallasites and mesosiderites

are included, photographed as mounts in reflected light, to show the range of textural variations that accompany these meteorites. Images from the book can be downloaded from www.cambridge.org/9780521840354.

After years of working to change schools from within-testifying before Congress and addressing audiences around the world about how to make schools better places for children-John Holt founded Growing Without Schooling magazine in 1977 to support self-directed education and learning outside of school. Each issue is a lively exchange among readers and Holt, packed with useful advice, resource recommendations, and all sorts of legal, pedagogical, and parenting ideas from people who pioneered what we now call homeschooling. John Holt (1983-1985) is the author of *How Children Learn* and *How Children Fail*, which together have sold over a million and a half copies, and eight other books about children and learning. His work has been translated into more than 40 languages. Once a leading figure in school reform, John Holt became increasingly interested in how children learn outside of school. The magazine he founded, *Growing Without Schooling (GWS)*, reflects his philosophy, which he called unschooling. GWS was published from 1977 to 2001 and is the first magazine devoted to homeschooling and self-directed education.

"Joan Rivers adores jewelry. She loves to shop for it, wear it, and design it. She also loves to talk about it, which is just what she does throughout this glittering volume.

Her passion for jewelry - as romantic keepsake, fashion accessory, and personal statement - informs every page of *Jewelry* by Joan Rivers. She describes the pieces that she has always admired, particularly those that have influenced her own designs. She tells the fascinating stories of her favorite jewelry designers, from the fabulous Faberge to the phenomenal Bulgari brothers. She devotes a chapter to accessorizing with jewelry, offering countless tips on how to turn that plain outfit into a totally chic ensemble by knowing what jewelry to select, and demonstrating the different looks that jewelry can achieve in a series of fashion photographs taken exclusively for this book." "All of Joan River's love and knowledge of jewelry is reflected in the pieces she designs for her own line of costume jewelry - the Joan Rivers Classics Collection - hundreds of which are reproduced here in specially commissioned, full-color photographs. And she takes us behind the scenes to show us how her jewelry is crafted, from initial sketches to finished product."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc.
