The Mouse Brain in Stereotaxic Coordinates

Ocular Pathology E-Book

Words of wisdom from Charlie Munger—Warren Buffett’s longtime business partner and the visionary Vice Chairman of Berkshire Hathaway—collected and interpreted with an eye towards investing by David Clark, coauthor of the bestselling Buffettology series. Born in Omaha, Nebraska in 1924 Charlie Munger studied mathematics at the University of Michigan, trained as a meteorologist at Cal Tech Pasadena while in the Army, and graduated magna cum laude from Harvard Law School without ever earning an undergraduate degree. Today, Munger is one of America’s most successful investors, the Vice Chairman of Berkshire Hathaway, and Warren Buffett’s business partner for almost forty years. Buffett says “Berkshire has been built to Charlie’s blueprint. My role has been that of general contractor.” Munger is an intelligent, opinionated business man whose ideas can teach professional and amateur investors how to be successful in finance and life. Like The Tao of Warren Buffett and The Tao of Te Ching, The Tao of Charlie Munger is a compendium of pithy quotes including, “Knowing what you don’t know is more useful than being brilliant” and “In my whole life, I have known no wise people who didn’t read all the time—none, zero.” This collection, culled from interviews, speeches, and questions and answers at the Berkshire Hathaway and Wesco annual meetings, offers insights into Munger’s amazing financial success and life philosophies. Described by Business Insider as “sharp in his wit and investing wisdom,” Charlie Munger’s investment tips, business philosophy, and rules for living are as unique as his life story; intelligent as he clearly is; and as successful as he has been.

Textbook of Pathology

This book has been designed to help medical students succeed with their histology classes, while using less time on studying the curriculum. The book can both be used on its own or as a supplement to the classical full-curriculum textbooks normally used by the students for their histology classes. Covering the same curriculum as the classical textbooks, from basic tissue histology to the histology of specific organs, this book is formatted and organized in a much simpler and intuitive way. Almost all text is formatted in bullets or put into structured tables. This makes it quick and easy to digest, helping the student get a good overview of the curriculum. It is easy to locate specific information in the text, such as the size of cellular structures etc. Additionally, each chapter includes simplified illustrations of various histological features. The aim of the book is to be used to quickly brush up on the curriculum, e.g. before a class or an exam. Additionally, the book includes guides to distinguish between the different histological tissues and organs that can be presented to students microscopically, e.g. during a histology spot test. This guide lists the specific characteristics of the different histological specimens and also describes how to distinguish a specimen from other similar specimens. For each histological specimen, a simplified drawing and a photomicrograph of the specimen, is presented to help the student recognize the important characteristics in the microscope. Lastly, the book contains multiple "memo boxes" in which parts of the curriculum are presented as easy-to-remember mnemonics.
