look back and share that similar feeling. University is about learning to explore, discovering who you are and who you want to be and creating the foundation for a lifetime of successes. University is the place where I learnt to make the most of opportunities and became who I wanted to be. It made me aware that just attending university isn't a silver bullet to success, not unless you take control. The university experience will provide endless possibilities and opportunities, but it's up to you to take the first step. You will face a roller coaster of emotions. You'll feel excited and scared, challenged and stimulated, but when all is said and done, YOU determine how you want to look back on this experience. Starting university can be the most sensational experience of your life, but it can also be the most overwhelming. In fact, it can be downright scary if you do not equip yourself with a plan on how to navigate through university. That is why I wrote this guide. My goal is to not only share my experience and lessons learned, but, to channel this into a helpful guide that may help you adapt rapidly and efficiently to ensure that you make the most of your higher education experience. This guide will not define success for you. You define success and you can start by creating personal goals. Take some time and think about where you want to be in a couple of years, when you graduate, and 10 years from now. You could have educational goals, career goals, salary aspirations, a list of activities to learn, family and other types of goals. Try writing these goals down and revisit them every couple months to see how you're doing. By taking the first step of writing them down, it shows that you are committed to making these goals a reality. This guide will discuss topics ranging

The must-read summary of Dan S. Kennedy's book: "How to Succeed in Business by Breaking all the Rules: A Plan for Entrepreneurs". This complete summary of the ideas from Dan S. Kennedy's book "How to Succeed in Business by Breaking all the Rules" points out that most business books give "rules for success". However, the research suggests that in fact, people should do the opposite: you can actually achieve more by ignoring conventional wisdom than you'll ever achieve simply by following the masses. Eschewing these conventional wisdoms takes bravery, arrogance, and an understanding that you alone are responsible for your own destiny, but the rewards can exceed your greatest expectations. This summary

highlights some myths propagated by business books and demonstrates their flaws. Positive thinking, for example, isn't the cure-all many believe it to be, especially if it breeds blind optimism and stops people from doing their research. Creativity should be valued, but it's important to realise that you need to make money - sometimes it's best to base your ideas on ones in the past. Even the most inventive films, such as Star Wars, are founded on old ideas (in this case, Westerns). Prevailing wisdom says that winners never quit, but actually, winners know when to jettison things that aren't working. ### **How to Succeed in Your Master's and Doctoral Studies**

This work includes Foreword by David Nicholson - Chief Executive, National Health Service of England. In the past, there has been too little emphasis and investment made in developing leaders in healthcare. People have become leaders without being prepared or trained or supported in the role. Individuals need to understand the context, the concept and models of good leadership, the practical steps to becoming a good leader, and how to sustain the various components of a well

functioning and effective organisation, whether that is a large NHS trust or hospital department, a clinical group or practice team. This guide has been written by a range of writers from organisational consultancy and NHS backgrounds who are all experienced in developing and supporting leaders, planning and providing education, and change management. It is specially designed for independent learning, with answers to frequently asked questions, self-assessment exercises and helpful tips. "How to Succeed as a Leader" is ideal for all healthcare professionals in (or aspiring to) leadership roles. It also provides inspiration for academics and workplace educators, managers and leaders in government, strategic health authorities and workforce deaneries. 'There is constant reorganisation and a changing culture in our health service. Good leadership is essential to address the changes required and take others with you so that the service can function effectively. There has been an amateurish approach to leadership in the NHS in the past, where people have become leaders without being prepared or trained for the role or supported in it. This book is all about presenting you with a practical approach to becoming a competent leader, to prepare you to lead in a positive way and realise your responsibilities as a leader.' From the Preface.
