The new Stevens and Windermere novel from Owen Laukkanen, author of the dazzlingly acclaimed The Professionals—“one of the best debuts of the year” (Mystery Scene). Accountant Carter Tomlin has a secret. He’s lost his job, the bills are mounting, and his perfect life is hanging by a thread. Desperate, he robs a bank. Then he robs another. Reuniting for the first time after their first case, FBI Special Agent Carla Windermere homes in on Tomlin from one direction, while Minnesota state investigator Kirk Stevens picks up the trail from another. Because Carter Tomlin likes robbing banks. And it’s not because of the money anymore. Tomlin has guns and a new taste for violence. And he’s not quitting anytime soon. Praise

for Owen Laukkanen "Puts readers in mind of what a collaboration between John Sandford and Elmore Leonard would be like a master storyteller."--Bookreporter.com "Really terrific."--Lee Child "Fans of crime thrillers shouldn't miss this one or anything else with Laukkanen's name on the cover."--Kirkus Reviews (starred review)

The entry into force of the Lisbon Treaty has brought about a proliferation of "integration principles". In addition to the environmental integration principle, which has been part of the EU legal framework for some time, the Lisbon Treaty introduced the principles of gender equality integration, social policy integration, non-discrimination integration, consumer protection integration as well as animal welfare integration. Furthermore, a general principle of integration policy objectives is contained in Article 7 TFEU, requiring that the Union must ensure consistency between its policies and activities, taking all relevant policy requirements listed under the TFEU into account in the adoption of any legislative measure. These integration principles must be pursued, or at least taken into account, when decisions are being taken in almost any area of EU policy-making. However, there is considerable uncertainty regarding the normative implications of the various integration principles as well as their legal value and practical relevance for EU policymaking. This book addresses the implications of the proliferation of sectorial integration principles and the introduction of a universal requirement of policy consistency in terms of the division of competences between the Union and the Member States as well as the scope for judicial review of the EU legislative process. In particular, it explores whether the introduction of various integration principles has led to an extension of Union competences and whether it has limited the scope for judicial review by extending the discretionary power of the Union institutions.

This book proposes a revisionist approach to democratic politics. Yaron Ezrahi focuses on the creative unconscious collective imagination that generates ever-changing visions of legitimate power and authority, which compete for enactment and institutionalization in the political arena. If, in the past, political authority was grounded in fictions such as the divine right of kings, the laws of nature, historical determinism and scientism, today the space of democratic politics is filled with multiple alternative social imaginaries of the desirable political order. Exposure to electronic mass media has made contemporary democratic publics more aware that credible popular fictions have greater impact on shaping our political realities than do rational social choices or moral arguments. The pressing political question in contemporary democracy is, therefore, how to select and enact political fictions that promote peace and how to found the political order on checks and balances between alternative political imaginaries of freedom and justice.

This collection of essays brings together an international roster of contributors to provide historical insight into women's agency and activism in education throughout from the seventeenth to the twentieth century. Topics discussed range from the strategies adopted by individual women to achieve a personal education and the influence of educated women upon their social environment, to the organized efforts of groups of women to pursue broader feminist goals in an educational context. The collection is designed to recover the variety of the voices of women inhabiting different geographical and social contexts while highlighting commonality and continuity with reference to creativity, achievement, and the management and transgression of structures of gender inequality.

Corrosion Engineering: Principles and Solved Problems covers corrosion engineering through an extensive theoretical description of the principles of corrosion theory, passivity and corrosion prevention strategies and design of corrosion protection systems. The book is updated with results published in papers and reviews in the last twenty years. Solved corrosion case studies, corrosion analysis and solved corrosion problems in the book are presented to help the reader to understand the corrosion fundamental principles from thermodynamics and electrochemical kinetics, the mechanism that triggers the corrosion processes at the metal interface and how to control or inhibit the corrosion rates. The book covers the multidisciplinary nature of corrosion engineering through topics from electrochemistry, thermodynamics, mechanical, bioengineering and civil engineering. Addresses the corrosion theory, passivity, material selections and designs Covers extensively the corrosion engineering protection strategies Contains over 500 solved problems, diagrams, case studies and end of chapter problems Could be used as a text in advanced/graduate corrosion courses as well self-study reference for corrosion engineers

"Aleksii Gan's "Constructivism" was the first theoretical treatise of post-revolutionary Russia's emergent Constructivist movement. Published in 1922, this iconoclastic blast of revolutionary zeal was a declaration of war on traditional Bourgeois art. By defining its three core principles: tectonics, faktura & construction, Gan recasts artist and architect as Constructors, no longer fretting about aesthetic or speculative problems in art but focusing instead on the fusion of art with everyday life to create a system of design where "everything will be conceived in a technical and functional way" - a fitting contribution to the great task of building the new communist society Gan, the "Mass Constructor", was a key figure among Russia's post-revolutionary avant-garde, working across theatre, architecture, graphics and cinema. Agitator, publisher, activist and promoter, he was a close friend of Rodchenko and Stepanova and was the foremost theoretician of Moscow's Working Group of Constructivists"--Page [4] of cover.

In 1954, at the age of sixteen, Marilyn Bell became the first person to swim across Lake Ontario. It brought her fame and adulation; her life seemed charmed. Enter Shirley Campbell, another young swimmer whose accomplishments were poised to rival Bell's, but in falling short in her own attempts to cross the Great Lake, she found herself spiraling out of control into a life of addiction, petty crime, and personal tragedies. Tanis Rideout weaves the tales of these two remarkable women together in a series of stunning, lyrical poems. It is a story of courage and triumph, but also one of adversity and redemption. This is an exhilarating book of poetry, at once tender and terrifying; like a cold dip in Lake Ontario, it will engulf you and leave you breathless. Arguments with the Lake confirms Rideout's arrival as a major new talent in Canadian letters.
