Jimmy Coates: Assassin?

“A poignant expression of the durability, grace, and potential of the human spirit” set in a post-nuclear dystopia where words are worth killing for (Jean M. Auel, author of the Earth’s Children series). By the late twenty-first century, civilization has nearly been destroyed by overpopulation, economic chaos, horrific disease, and a global war that brought a devastating nuclear winter. On the Oregon coast, two women—writer Mary Hope and painter Rachel Morrow—embark on an audacious project to help save future generations: the preservation of books, both their own and any they can find at nearby abandoned houses. For years, they labor in solitude. Then they encounter a young man who comes from a group of survivors in the South. They call their community the Ark. Rachel and Mary see the possibility of civilization rising again. But they realize with trepidation that the Arkites believe in only one book—the Judeo-Christian bible—and regard all other books as blasphemous. And those who go against the word of God must be cleansed from the Earth . . . In this “thought-provoking” novel of humanity, hope, and horror, M.K. Wren displays “her passionate concern with what gives life meaning (Library Journal).

Truck Full of Ducks

Recently declassified information makes it possible for the first time to tell part of the story behind the Cold War intelligence operations of the U.S. Military Liaison Mission (USMLM) to the Commander of the

Soviet Army in Communist East Germany. Intelligence collection often led to dangerous encounters with the Soviet and East German armies. On occasion, Allied officers and non-commissioned officers were seriously injured. Before it all ended with the collapse of the Iron Curtain, one French sergeant and one American officer had been killed. Potsdam Mission traces the development of the author into a Soviet/Russian specialist and U.S. Army intelligence officer. The author then relates his own intelligence collection forays into East Germany by taking the reader on trips that include several harrowing experiences and four arrests/detentions by the Soviets. Finally, the author describes the challenges and rewards of interpreting at USMLM and comments on the important role played by the Mission in Cold War intelligence.

Unlike any other OB textbook in the market, Neubert, Dyck, Medcof and Waller's, *Organizational Behaviour* empowers students to look at OB through two lenses: the traditional, core concepts that focus on how to make a company profitable, and the sustainable, collaborative, creative, and ethical decision making lens that students and many employers of today are looking for in business. By inviting students to compare and contrast short-term profitability and long-term sustainability, *Organizational Behaviour*

helps students build the critical thinking skills needed to positively affect organizations, people, and communities.

This remarkable book provides a portrait of the lesser-known peoples of Sarawak, New Zealand: the Land Dayaks. Written by an anthropologist who came to know these people during a two-year stay in their remote village, the study--introduced by a folktale imparted to the author by the leading spirit-medium in the village--is a masterly analysis based on sound anthropological techniques and informed with understanding, affections, and humor. Geddes describes the life of the Land Dayaks--their traditions, beliefs, and their attitudes toward things around them--and reveals not only their differences from, but also their similarities to the greater world of humanity outside their community. Originally published in 1957, this study has lost none of its freshness or fascination.

I, Hogarth

The great eighteenth century portraitist comes to life in this "gritty, bawdy and funny" rags to riches novel told in the voice of the artist himself (The New York Times). William Hogarth was London's artist par excellence, and his work—especially his satirical series of "modern moral subjects"—supplies the most enduring vision of the ebullience, enjoyments, and social iniquities of the eighteenth century. And in I, Hogarth, he tells a ripping good yarn. From a childhood spent in a debtor's prison to his death in

the arms of his wife, Hogarth recounts the incredible story of how he maneuvered his way into the household of prominent artist Sir James Thornhill, and from there to become one of England's best portrait painters. Through his marriage to Jane Thornhill, his fight for the Copyright Act, his unfortunate dip into politics, and his untimely death, "the voice in which Dean's Hogarth tells his own story is rich and persuasive . . . Like stepping into a Hogarth painting" (The New York Times). "A brilliant exercise in imagination and storytelling." —Kirkus Reviews (starred review)

Essential Facts and Tables

Not just a history of the world, this is also a history for the world. Packed full of fascinating information, it is written in the same lively and accessible style that charmed the readers of Cyril Aydon's previous books *Charles Darwin* and *A Book of Scientific Curiosities*. It follows the fortunes and misfortunes of the human race, from the time when our ancestors took their first tentative steps out of Africa, to the day when human beings set foot on the moon; from the domestication of the first donkey to the cloning of Dolly the sheep; and from the building of the pyramids to the designing of the World Wide Web. Informed by the most recent historical and archaeological research, the book focuses not on the conventional small change of kings and queens, battles, and political maneuvers, but on developments that have really shaped the lives of human beings around the globe: the Neolithic revolution in agriculture, the invention of

writing, the rise and fall of empires, the birth of great religions, the industrial revolution. This book asks whether we have really changed, or are we just stone-age people living in a space age we have made but cannot control.
