Instant Nursing Assessment

(5E 1991; *Select List Nursing) Emphasis on nsg mgmt & care/ use of nursing process/prioritization of nursing diagnosis.

Textbook of Medical-surgical Nursing

Instant assessment techniques to provide nurses with immediate, relevant clinical information on the most important aspects of patient assessment for the respiratory system.

Instant Nursing Assessment

Using a unique collaborative care approach to adult health nursing, *Medical-Surgical Nursing: Patient-Centered Collaborative Care*, 8th Edition covers the essential knowledge you need to succeed at the RN level of practice. Easy-to-read content includes evidence-based treatment guidelines, an enhanced focus on QSEN competencies, and an emphasis on developing clinical judgment skills. This edition continues the book's trendsetting tradition with increased LGBTQ content and a new Care of Transgender Patients chapter. Written by nursing education experts Donna Ignatavicius and M. Linda Workman, this bestselling text also features NCLEX® Exam-style challenge questions to prepare you for success on the NCLEX Exam. Cutting-edge coverage of the latest trends in nursing practice and nursing education prepares you not just for today's nursing practice but also for tomorrow's. **UNIQUE!** Collaborative care approach organizes all medical, surgical, nursing, and other interventions within the framework of the nursing process, mirroring the nurse's role in the coordination/management of care in the real world of medical-surgical nursing. **UNIQUE!** A focus on nursing concepts relates concepts learned in *Nursing Fundamentals* with the disorders you will study in *Medical-Surgical Nursing*. Easy to read, direct-address writing style makes this one of the most readable medical-surgical nursing textbooks available. **UNIQUE!** A focus on QSEN emphasizes patient safety and evidence-based practice with Nursing Safety Priority boxes including Drug Alerts, Critical Rescues, and Action Alerts. **UNIQUE!** Emphasis on clinical judgment teaches you to develop skills in clinical reasoning and clinical decision-making when applying concepts to clinical situations, with Clinical Judgment Challenge questions throughout the chapters. An emphasis on prioritization stresses the most important patient problems and nursing interventions, with patient problems presented in a single prioritized list of nursing diagnoses and collaborative problems. **UNIQUE!** NCLEX preparation tools include chapter-opening Learning Outcomes and chapter-ending Get Ready for the NCLEX Examination! sections organized by NCLEX® Client Needs Categories, plus NCLEX Examination Challenge questions, with an answer key in the back of the book and on the Evolve companion website. Practical learning aids include NCLEX Examination Challenges, Clinical Judgment Challenges, Best Practice for Patient Safety & Quality Care charts, common examples of drug therapy, concept maps, laboratory profiles, and more. A clear alignment with the language of clinical practice reflects the real world of nursing practice with NANDA diagnostic labels where they make sense, and non-NANDA diagnostic labels when these are more common descriptions of patient problems. Student Resources on an Evolve companion website help you prepare for class, clinicals, or lab with video and audio clips, animations, case studies, a concept map creator, NCLEX exam-style review questions, and more. **UNIQUE!** Concentration on essential knowledge for the RN level of medical-surgical nursing practice focuses your attention on need-to-know content to pass the NCLEX Examination and practice safety as a beginning nurse.

Clinical Handbook for Brunner & Suddarth's Textbook of Medical-Surgical Nursing

Essentials of Pediatric Nursing

A world list of books in the English language.

Gerontologic Nursing - E-Book

Medical and Health Care Books and Serials in Print

The unique guidance in this newly revised edition includes start-to-finish, step-by-step instructions for more than 500 procedures, including 10 recently developed procedures such as the protocol for responding to latex allergies. All procedures include equipment use, patient positioning, special considerations, possible complications, and documentation guidelines. Graphic logos highlight concerns and adaptations for geriatric and pediatric patients, as well as patient-teaching tips. Contents include fundamental procedures; infection control; specimen collection and testing; physical treatments; drug administration; intravascular therapy; and cardiovascular, respiratory, neurologic, gastrointestinal, renal, urologic, orthopedic, skin, eye, ear, nose, maternal-neonatal, pediatric, and geriatric care.

Rapid Nursing Interventions

The Simulation Learning System (SLS) integrates simulation technology into your medical-surgical nursing course by providing realistic scenarios and supportive learning resources that correspond to Lewis: Medical-Surgical Nursing, 8th Edition. The SLS offers targeted reading assignments and critical thinking exercises to prepare you for the simulation experience; access to patient data with a shift report and fully-functional electronic medical record (EMR); post-simulation exercises including charting and documentation activities in the EMR, reflective journaling, and concept mapping; and review resources including animations, videos, and textbook references. Simulation with the SLS is a complete learning experience that bridges the gap between lecture and clinicals to prepare you for the real world of nursing. STUDENT ACCESS ONLY - INSTITUTIONAL LICENSE REQUIRED.

Rapid Nursing Interventions

Cardiovascular Care Made Incredibly Easy

Instant assessment techniques to provide nurses with immediate, relevant clinical information on the most important

aspects of patient assessment for the reproductive system.

Essentials of Medical-surgical Nursing

The Nurse Practitioner

This unique, spiral-bound handbook is compact, portable, and written with busy home health nurses in mind! Organized by body system, it offers instant advice on assessment and care planning for the disorders home health nurses are likely to encounter. Providing assessment guides for all body systems, the home environment, and the client's psychological status, it includes full care plans for over 50 illnesses and conditions most commonly encountered in the home. Each plan lists nursing diagnoses, short- and long-term expected outcomes, nursing interventions, and client caregiver interventions. Care plans are organized by body systems to allow for quick retrieval of information. Both short-term and long-term outcomes are included in the care plans to aid evaluation of the care provided. Detailed assessment guidelines are provided for all body systems to facilitate complete and comprehensive client examinations. Guidelines for environmental and safety assessments aid in the appraisal and improvement of clients' living conditions. Client and caregiver interventions are outlined in the care plans to promote active client participation in self-care. The convenient pocket size makes transportation and use convenient to home health nurses. Appendices on documentation guidelines, laboratory values, medication administration, home care resources, and standard precautions provide quick access to useful home care information. Related OASIS items are identified in the assessment section, and ICD-9 diagnostic codes in the care plans section assist with proper home care documentation. Visit frequency and duration schedules are suggested within each care plan to assist nurses in evaluating and planning care. NANDA nursing diagnoses are consistent with the latest 2001-2002 nomenclature. An increase in suggested therapy referrals within the care plans and in a new appendix helps nurses identify indicators for specialized services. A fully updated Resources Appendix includes websites for easy access to home health service information.

Forthcoming Books

Are you looking for a new way of learning skills? Do you want to learn how to problem solve and think conceptually? Stein and Hollen's *Concept-Based Clinical Nursing Skills: Fundamental to Advanced* covers over 250 nursing skills in an innovative concept-based format with excellent illustrations, concise rationales, and current evidence. Unlike any other text, Stein and Hollen incorporate an overarching framework of seven critical concepts — accuracy, client-centered care, infection control, safety, communication, evaluation, and health maintenance — to drive home the importance of these key themes in

performing nursing skills. Each section balances need-to-know narrative with step-by-step skills, and every chapter includes a detailed case study with a concept map to help you apply knowledge and use clinical judgement in clinical situations involving nursing skills. Over 250 step-by-step nursing skills with over 900 photos and illustrations. Language and concepts reflect those used on the NCLEX. Concept-based approach to skills education pairs well with the Giddens framework. Accuracy, Client-Centered Care, Infection Control, Safety, Communication, Evaluation, and Health Maintenance are reinforced throughout as Critical Concepts to skills performance. Case studies with concept maps depict patients with problems that might be experienced in the clinical setting and are followed by a series of critical thinking questions with every chapter. Application of the QSEN competencies: A question that challenges you to apply a QSEN competency is provided within the critical thinking questions of each case study. Lessons from the Evidence boxes highlight and summarize current research that can contribute to evidence-based clinical practice; Lessons from the Courtroom boxes summarize actual court cases related to the skills in the chapter in order to help you understand legal implications; and Lessons from Experience boxes use a storytelling format to share the experiences of more experienced nurses with students. Application of the nursing process: Nursing diagnoses that include specific examples of client outcomes and nursing interventions are presented within each section of the chapters. Uses an easy-to-understand, conversational writing style. Organized to present fundamental skills first, then intermediate acute care skills, and finally advanced skills often performed in critical care. Critical concepts align with the quality and safety framework of the QSEN competencies. Emphasis on safety and client centered care. Expect the Unexpected boxes use a storytelling format to present unexpected situations that could occur and explore appropriate responses to them. Home Care, Lifespan, and Cultural Considerations provided in each chapter. Performing an Assessment chapter details physical assessment skills. Evolve site for students features skills video clips, skills checklists for all skills, and NCLEX-style review questions.

Medical-surgical Nursing

Gastroenterology nursing practice/nursing process/anatomy physiology & pathophysiology/diagnostic procedures & tests.

Educational Film & Video Locator of the Consortium of College and University Media Centers and R.R. Bowker

Instant assessment techniques to provide nurses with immediate, relevant clinical information on the most important aspects of patient assessment for the neurological system.

Virtual Clinical Excursions 1.0 to Accompany Medical-Surgical Nursing

Instant assessment techniques to provide nurses with immediate, relevant clinical information on the most important aspects of patient assessment for pediatric nursing.

Brunner and Suddarth's Textbook of Medical-surgical Nursing

Instant assessment techniques for Mental Health provide nurses with immediate, relevant clinical information on the most important aspects of patient assessment. Features: Questions to Ask - quick lists of specific questions to ask patients. Tools of the Trade - a list of equipment needed. Assessment Charts - 3 column format, with assessment steps, normal and abnormal findings clearly identified. List of commonly associated nursing diagnoses. Emphasizes ambulator patient care.

Medical-Surgical Nursing

This concise clinical companion to the thirteenth edition of Brunner and Suddarth's Textbook of Medical-Surgical Nursing presents nearly 200 diseases and disorders in alphabetical format, allowing rapid access to need-to-know information on the most common clinical problems nurses are likely to encounter. The content is completely cross-referenced to the main text. Pages are tabbed alphabetically for speedy reference.

Simulation Learning System for Lewis Medical-Surgical Nursing

Volume 1-5, covering entries A-Z, presents information on diseases and disorders, tests and procedures, body systems, health professions, and current health issues.

The Cumulative Book Index

This one-of-a-kind book brings together the broad knowledge nurses need to be confident in cardiovascular care, including cardiovascular anatomy and physiology; assessment; diagnostic testing; hemodynamic monitoring; electrocardiogram performance and interpretation; medications; synchronized cardioversion; care of patients with IABP counterpulsation, ICDs, pacemakers, and VADs; and preoperative and postoperative care for patients with MIDCAB, CABG, and balloon angioplasty.

Cardiac Nursing

Instant assessment techniques to provide nurses with immediate, relevant clinical information on the most important aspects of patient assessment for the neurological system.

Home Health Nursing

Guiding students through a virtual clinical experience, VCE: Red Rock Canyon Medical Center is a teaching hospital that is modeled after a real medical-surgical floor. It contains five patient rooms, a nurses' station, a supervisor's office, two conference rooms, a nurses' lounge, and a waiting room with an elevator. The following patients are seeking treatment in Red Rock Canyon Medical Center: Carmen Gonzalez: This older Hispanic female presents with an infected leg that has become gangrenous. She has Type 2 diabetes mellitus, as well as complications of congestive heart failure and osteomyelitis David Ruskin: Following a car-bicycle accident, this young adult African-American male is admitted with a possible closed head injury and a badly fractured right humerus. He undergoes an open reduction and internal fixations of the right humerus. Sally Begay: This Native American woman enters the hospital and is initially suspected of having a Hanta virus infection. She has a confirmed diagnosis of bacterial lung infection. This client's complications include chronic obstructive pulmonary disease and inactive tuberculosis. Ira Bradley: Ira is a caucasian adult male with late-stage HIV disease who is admitted for an opportunistic respiratory infection. He has complications of oral fungal infection, malnutrition, and wasting. Andrea Wang: This young Asian female entered the hospital after a diving accident in which T6 is crushed, with partial transection of the spinal cord. After a week in the ICU, she has been transferred to the medical-surgical unit, where she is being closely monitored. Includes a guided tutorial which shows students how to work with a patient in the virtual hospital · collect patient data from various sources (reports, charts, medication administration record, short video clips and audio clips of nurse-patient interactions) · record patient data · listen to a report and itemize a patient's problems and high-priority concerns · and sometimes administer medications. Requires students to use their critical thinking skills to set priorities for care, collect data, analyze and interpret data, and reach conclusions about complex problems within a health-illness transition. Encourages active learning and provides opportunities to identify information to collect and process data for evidence-based patient care; work with data entry and retrieval screens; optimize use of available information resources; understand hospital information systems; manage information for decision-making; and maintain and improve core computing skills.. A series of groundbreaking, new workbooks and CD-ROMs, Virtual Clinical Excursions bring learning to life in two different "virtual" hospital settings! Each lesson in Virtual Clinical Excursions has a core textbook reading assignment with corresponding CD-ROM and workbook activities. The exercises in the workbook complement the content in the the parent text and provide a perfect environment in which students may "practice" what they are learning in the text. The workbooks act as maps - guiding students through the CD-ROM as they care for patients in the virtual hospital. Virtual hospital visits on the CD-ROM allow students to access realistic information resources that are essential to patient care.

Instant Nursing Assessment

Medical-Surgical Nursing - E-Book

Medical-Surgical Nursing: An Integrated Approach, 2E examines all aspects of this nursing field, from how and where the health care delivery system is set up, to the nurse's role in care related to IV therapy and diagnostic testing, to legal and ethical responsibilities, communication, and cultural diversity. This revised edition also includes new chapters covering alternative therapies, and responding to emergencies. Case studies, critical thinking questions, and exercises developing care plans encourage students to think beyond the classroom. Full color illustrations, cross-referencing between chapters, and suggested resources are among the many features that will appeal to students. Diagnostic tests are listed alphabetically in chart form making important information about the test, normal values and nursing responsibilities easy to find. Chapter end critical thinking questions help students apply chapter content. "Web Flash" box suggests Internet sites students can consult for additional information. Text includes a glossary, a list of abbreviations and acronyms, a listing of the latest NANDA nursing diagnoses and Standard Precautions

Gerontological Nursing Care

Nursing Procedures

Gerontological Nursing Care is ideal as a textbook or as a reference book. Nineteen prominent leaders in the gerontological nursing community thoroughly address the nursing care needs of older adults in a positive, compassionate manner that promotes wellness. They examine a full range of key issues including spirituality, cultural diversity, sexuality, polypharmacy, falls and other safety problems, sensory alterations, immunologic concerns, Alzheimer's disease, caregiver stress, professional stress, and homelessness. And, a compelling photography program supports the humanistic focus. Concise and easy to read, Gerontological Nursing Care supports a holistic, humanistic approach to the care of older patients from diverse cultural backgrounds in a full range of care settings.

Introductory Medical-surgical Nursing

Critical Care Nursing of the Elderly

A classic in the field of cardiac nursing, this well-recognized text and clinical reference has earned the reputation as "The Red Reference Book" for nurses caring for patients who have cardiac disease. Revised and updated, this edition reflects the

latest procedures and techniques in cardiac nursing. This book incorporates the nursing process and critical thinking strategies, while also providing a foundation for the contents based on theory, anatomy and physiology. The liberal use of figures, tables, and authoritative references, makes this the ideal text for graduate students and a reference for any nurse interested in cardiac nursing. The authors of *Cardiac Nursing, Fourth Edition* lay the groundwork for cardiovascular nursing in Part I by presenting the necessary information about cardiovascular anatomy and physiology. Before the reader can fully comprehend the details of coronary heart disease it is essential to assimilate the information found in Part II, Physiologic and Pathophysiologic Response. Part III, covers the assessment of coronary heart disease and addresses many noninvasive and invasive testing procedures currently available. In Part IV, various disease states and treatments are fully explored. Finally, Part V provides valuable information regarding the latest concepts in health promotion and disease prevention. The straightforward style makes this an easily comprehensible text for both the experienced and novice nurse caring for patients who have, or are at risk for developing, cardiac disease. A Brandon-Hill Recommended Title.

Nursing Foundations

Instant assessment techniques to provide nurses with immediate, relevant clinical information on the most important aspects of patient assessment for gerontologic nursing.

Infirmiere Canadienne

Using a unique collaborative care approach to adult health nursing, *Medical-Surgical Nursing: Patient-Centered Collaborative Care, 8th Edition* covers the essential knowledge you need to succeed at the RN level of practice. Easy-to-read content includes evidence-based treatment guidelines, an enhanced focus on QSEN competencies, and an emphasis on developing clinical judgment skills. This edition continues the book's trendsetting tradition with increased LGBTQ content and a new Care of Transgender Patients chapter. Written by nursing education experts Donna Ignatavicius and M. Linda Workman, this bestselling text also features NCLEX® Exam-style challenge questions to prepare you for success on the NCLEX Exam. Cutting-edge coverage of the latest trends in nursing practice and nursing education prepares you not just for today's nursing practice but also for tomorrow's. UNIQUE! Collaborative care approach organizes all medical, surgical, nursing, and other interventions within the framework of the nursing process, mirroring the nurse's role in the coordination/management of care in the real world of medical-surgical nursing. UNIQUE! A focus on nursing concepts relates concepts learned in *Nursing Fundamentals* with the disorders you will study in *Medical-Surgical Nursing*. Easy to read, direct-address writing style makes this one of the most readable medical-surgical nursing textbooks available. UNIQUE! A focus on QSEN emphasizes patient safety and evidence-based practice with Nursing Safety Priority boxes including Drug Alerts, Critical Rescues, and Action Alerts. UNIQUE! Emphasis on clinical judgment teaches you to develop

skills in clinical reasoning and clinical decision-making when applying concepts to clinical situations, with Clinical Judgment Challenge questions throughout the chapters. An emphasis on prioritization stresses the most important patient problems and nursing interventions, with patient problems presented in a single prioritized list of nursing diagnoses and collaborative problems. UNIQUE! NCLEX preparation tools include chapter-opening Learning Outcomes and chapter-ending Get Ready for the NCLEX Examination! sections organized by NCLEX® Client Needs Categories, plus NCLEX Examination Challenge questions, with an answer key in the back of the book and on the Evolve companion website. Practical learning aids include NCLEX Examination Challenges, Clinical Judgment Challenges, Best Practice for Patient Safety & Quality Care charts, common examples of drug therapy, concept maps, laboratory profiles, and more. A clear alignment with the language of clinical practice reflects the real world of nursing practice with NANDA diagnostic labels where they make sense, and non-NANDA diagnostic labels when these are more common descriptions of patient problems. Student Resources on an Evolve companion website help you prepare for class, clinicals, or lab with video and audio clips, animations, case studies, a concept map creator, NCLEX exam-style review questions, and more. UNIQUE! Concentration on essential knowledge for the RN level of medical-surgical nursing practice focuses your attention on need-to-know content to pass the NCLEX Examination and practice safety as a beginning nurse. NEW! Enhanced focus on QSEN (Quality and Safety Education for Nurses) competencies includes new icons identifying QSEN competency material and new Quality Improvement boxes describing projects that made a dramatic difference in patient outcomes. UPDATED learning features include an expanded emphasis on developing clinical judgment skills; on prioritization, delegation, and supervision skills; on long-term care issues; and on preparation for the NCLEX® Examination and consistency with the 2013 NCLEX-RN® Test Plan. NEW! UNIQUE! Care of Transgender Patients chapter discusses the unique health care needs and issues specific to the transgender community. Improved delineation of NANDA-I nursing diagnoses clearly differentiate NANDA diagnoses from collaborative problems. NEW photos and drawings show patient care skills as well as the latest in nursing education and practice.

Gastroenterology Nursing

Instant Nursing Assessment

Instant Nursing Assessment

As the role of the veterinary nurse changes, there is an increasing need to understand new techniques and cope with public demands. Levels of responsibility are also rising. The BSAVA Manual of Advanced Veterinary Nursing forms part of the

BSAVA Manuals of Veterinary Nursing series (edited by Gill Simpson) is aimed at veterinary nurses who wish to extend their knowledge and skills with information at a level beyond the VN qualification. A problem-based approach to internal medicine is introduced, with techniques for nursing major surgical and critical cases, and the management of a critical care unit. Advanced laboratory and radiography chapters cover techniques and interpretation, including newer imaging techniques. To cater for recent developments, chapters are included on equine nursing and practice management. There is also a section on exotic and wildlife nursing. Although it is not intended to be a comprehensive textbook, this manual will be helpful as an introduction and source of further information for the Diplomas in Advanced Veterinary Nursing. It is an essential manual for professional staff in practice wishing to improve their standard of nursing care as we move into the next millennium. BSAVA, BVNA and FECAVA members can claim their member discount by ordering direct from: British Small Animal Veterinary Association Woodrow House, 1 Telford Way, Waterwells Business Park, Quedgeley, Gloucester, GL2 4AB, Tel: 01452 726709, Fax: 01452 726701, E-mail: publications@bsava.com

Instant Nursing Assessment

BSAVA Manual of Advanced Veterinary Nursing

Instant Nursing Assessment

Covering both disorders and wellness, Gerontologic Nursing provides the essential information you need to provide the best nursing care to older adults. A body-system organization makes information easy to find, and discussions include health promotion, psychologic and sociocultural issues, and the common medical-surgical problems associated with aging adults. Written by expert educator and clinician Sue Meiner, EdD, RN, CS, GNP, this book also emphasizes topics such as nutrition, chronic illness, emergency treatment, patient teaching, home care, and end-of-life care. Comprehensive assessment guidelines identify findings that are normal, deviate from normal, and abnormal. A separate Health Promotion chapter and specialty boxes provide information related to promoting healthy lifestyles and preventing disease. Detailed coverage of pain, infection, cancer, chronic illness, loss, death and dying, and substance abuse explains the complex aspects of aging

and related care. Cultural Influences chapter and Cultural Awareness boxes focus on clients' specific customs and how they affect your nursing care. Client/Family Teaching boxes help you communicate effectively on self-care. Home Care Tips boxes promote practical, effective care for the homebound older client. Emergency Treatment boxes highlight critical care in emergency situations. Nutrition boxes discuss the special nutritional needs and concerns of an aging population. Key points help you remember what you've read, and critical thinking activities help expand learned concepts. Up-to-date content includes the latest on hip and knee replacement, Lyme disease, lactose intolerance, upper respiratory infections, current arthritis therapies and treatments, and expanded information on abuse of older adults. Unique! Nursing Care Plans link NANDA-I nursing diagnoses, NIC priority interventions for specific conditions, and NOC suggested outcomes for guidance in providing appropriate care. Unique! Evidence-Based Practice boxes help you apply the research leading to better outcomes of nursing care. Unique! Nursing Process boxes provide quick and easy access to care information.
