Wounds of History

Wounds of History takes a new view in psychoanalysis using a trans-generational and social/political/cultural model looking at trauma and its transmission. The view is radical in looking beyond maternal dyads and Oedipal triangles and in its portrayal of a multi-generational world that is no longer hierarchical. This look allows for greater clinical creativity for conceptualizing and treating human suffering, situating healing in expanding circles of witnessing. The contributors to this volume look at inherited personal trauma involving legacies of war, genocide, slavery, political persecution, forced migration/unwelcomed immigration and the way attachment and connection is disrupted, traumatized and ultimately longing for repair and reconnection. The book addresses several themes such as the ethical/social turn in psychoanalysis; the repetition of resilience and wounds and the repair of these wounds; the complexity of attachment in the aftermath of trauma, and the move towards social justice. In their contributions, the authors remain close to the human stories. Wounds of History will be of interest to psychoanalysts, psychologists and other mental health professionals, as well as students or teachers of trauma studies, Jewish and gender studies and studies of genocide.

The author reviews various theories on image repair, and extends prior research on the topic to include work on persuasion or attitude change. Five contexts for image repair are examined: corporate, political, sports/entertainment, international, and third party (when one person or organization tries to repair the image of another). New case studies include the British Petroleum oil spill in the Gulf of Mexico, Anthony Weiner, Lance Armstrong, Apple's apology to China over the iPhone, and Prime Minister David Cameron's apology for Bloody Sunday. iPad 2: The Missing Manual

Christians are awakening to the legacy of racism in America like never before. While public conversations regarding the realities of racial division and inequalities have surged in recent years, so has the public outcry to work toward the long-awaited healing of these wounds. But American Christianity, with its tendency to view the ministry of reconciliation as its sole response to racial injustice, and its isolation from those who labor most diligently to address these things, is underequipped to offer solutions. Because of this, the church needs a new perspective on its responsibility for the deep racial brokenness at the heart of American culture and on what it can do to repair that brokenness. This book makes a compelling historical and theological case for the church's obligation to provide reparations for the oppression of African Americans. Duke Kwon and Gregory Thompson articulate the church's responsibility for its promotion and preservation of white supremacy throughout history, investigate the Bible's call to repent and make restitution, and offer concrete examples of the work of reparation at the local level. They lead readers toward a moral imagination that views reparations as a long-overdue and necessary step in our collective journey toward healing and wholeness.

Meet the Grogans Before there was Marley, there was a gleefully mischievous boy navigating his way through the seismic social upheaval of the 1960s. On the one side were his loving but comically traditional parents, whose expectations were clear. On the other were his neighborhood pals and all the misdeeds that followed. The more young John tried to straddle these two worlds, the more spectacularly, and hilariously, he failed. Told with Grogan's trademark humor and affection, *The Longest Trip Home* is the story of one son's journey into adulthood to claim his place in the world. It is a story of faith and reconciliation, breaking away and finding the way home again, and learning in the end that a family's love will triumph over its differences.
