Take No Prisoners

Praise for Cynan Jones: "[A] piercing novella. . . . Like Cormac McCarthy, Jones can make the everyday sound fraught and biblical." —Kirkus Reviews, starred review "Jones's perfectly pitched novel will appeal to anyone looking beyond sheer thrills." —Library Journal "This slim volume has all the gravity of a black hole, and reading it is like standing on the event horizon. . . . It's like a more beautiful Cormac McCarthy; a darker W.H. Auden." —Elliot Bay Book Company "There's nothing bucolic about this elemental, extraordinary tale of good and evil." —Shelf Awareness "Jones deftly explores his characters' motives, particularly the hope they cling to despite the risks they take." —Booklist "It's as if the novel is the slowed-down spinning of a bullet through the grooves of a barrel, waiting to be released into the world." —Vol. 1 Brooklyn "Darkly luminous . . . [Jones] builds tension in an ultimately gripping and important story that transcends its own bleakness." —Library Journal When a net is set, and that's the way you choose, you'll hit it. Hold, a Welsh fisherman, Grzegorz, a Polish migrant worker, and Stringer, an Irish gangster, all want the chance to make their lives better. One kilo of cocaine and the sea tie them together in a fatal series of decisions. Cynan Jones was born near Aberaeron on the west coast of Wales in 1975. He is the author of four short novels, most recently *The Dig* (Coffee House Press, 2014), which won a Jerwood Fiction Uncovered Prize in 2014 and the Wales Book of the Year Fiction Prize 2015. His work has been translated into several languages, and short stories have aired on BBC Radio and appeared in a number of anthologies and publications including

Granta. Everything I Found on the Beach is the second of three United States releases of his work by Coffee House Press.

Sweet Son of Pan

This book is dedicated to the adoption of broadband microwave reflectometry (BMR)-based methods for diagnostics and monitoring applications. This electromagnetic technique has established as a powerful tool for monitoring purposes; in fact, it can balance several contrasting requirements, such as the versatility of the system, low implementation cost, real-time response, possibility of remote control, reliability, and adequate measurement accuracy. Starting from an extensive survey of the state of the art and from a clear and concise overview of the theoretical background, throughout the book, the different approaches of BMR are considered (i.e., time domain reflectometry - TDR, frequency domain reflectometry - FDR,

and the TDR/FDR combined approach) and several applications are thoroughly investigated. The applications considered herein are very diverse from each other and cover different fields. In all the described procedures and methods, the ultimate goal is to endow them with a significant performance enhancement in terms of measurement accuracy, low cost, versatility, and practical implementation possibility, so as to unlock the strong potential of BMR.

Everything I Found on the Beach

Introduction to Probability Models, 8th Edition, continues to introduce and inspire readers to the art of applying probability theory to phenomena in fields such as engineering, computer science, management and actuarial science, the physical and social sciences, and operations research. Now revised and updated, this best-selling book retains its hallmark intuitive, lively writing style, captivating introduction to applications from diverse disciplines, and plentiful exercises and worked-out examples. The 8th Edition includes five new sections and numerous new examples and exercises, many of which focus on strategies applicable in risk industries such as insurance or actuarial work. The five new sections include: * Section 3.6.4 presents an elementary approach, using only conditional expectation, for computing the expected time until a sequence of independent and identically distributed random variables produce a specified pattern. * Section 3.6.5 derives an identity involving compound Poisson random variables and then uses it to obtain an elegant recursive formula for the probabilities of compound Poisson random variables whose incremental increases are nonnegative and integer valued * Section 5.4.3 is concerned with a conditional Poisson process, a type of process that is widely applicable in the risk industries * Section 7.10 presents a derivation of and a new characterization for the classical insurance ruin probability. * Section 11.8 presents a simulation procedure known as coupling from the past; its use enables one to exactly generate the value of a random variable whose distribution is that of the stationary distribution of a given Markov chain, even in cases where the stationary distribution cannot itself be explicitly determined. Other Academic Press books by Sheldon Ross: *Simulation* 3rd Ed., ISBN: 0-12-598053-1 *Probability Models for Computer Science*, ISBN 0-12-598051-5 *Introduction to Probability and Statistics for Engineers and Scientists*, 2nd Ed., ISBN: 0-12-598472-3 * Classic text by best-selling author * Continues the tradition of

Fiction. Multimedia. Art+Design by Stephen Farrell. This special, limited edition is a must-have for book collectors. The original, groundbreaking novel of identity in the biotech age comes in a clear, polystyrene slipcase reminiscent of the lab. The custom slipcase also holds the voice of the book: an audio CD of readings especially created for this edition and set to music by Alloy Orchestra, renowned creator of contemporary scores for silent movies. Additional music and performances by Paul Johnson, Maria Tomasula, Chris Jara, and Scott Appleby. Scroll down for a look inside this hybrid image-text novel, and sample sound clips from the CD. Up until now, everyone alive on earth was bound to one another through African Eve, our last common ancestor: a woman who, 5,000 generations ago, passed her genes and language to sons and daughters who did the same as they gradually populated the world. Today, however, Square, Circle and the other inhabitants of Flatland have the opportunity to step outside this lineage. To rearrange the bodies of animals, plants, and even themselves. VAS: AN OPERA IN FLATLAND is the story of Square's decision to undergo an operation that will leave him sterile for the good of his wife, Circle, for the good of their daughter, Oval, and for the good of society, including the unborn descendants he will never have. VAS is, in other words, the story of finding one's identity within the double-helix of language and lineage- and Square's struggle to see beyond the common pages of ordinary, daily life upon which he is drawn.

TPM in Process Industries

Britain, in the mid 21st century. A new prime minister, Lev Solokov is elected. In spite of his Russian surname, he is the

charismatic politician who, on the surface, appears to be just what Britain needs. But he's not what Gavin needs. Gavin is a Pustoy, a human who, among countless others, Solokov's researchers has declared a soulless, subhuman race. Solokov joins a dark lineage of genocidal tyrants that have gone before him. In synthesizing his own race to persecute others, perhaps he has succeeded in a horror more insidious than any of his forebears, especially as he appears to have done so with both overwhelming public blessing and encouragement. Or at least he would have, if not for the increasing din of the Pustoy protesting outside his offices. Chosen at random owing to his position as a forefront campaigner for the rights of the Pustoy, Gavin is framed for a crime he didn't commit and is forced to go on the run, and so Solokov in one fell swoop kills any budding sympathy the people may have had for the Pustoy, and would appear to have silenced one of his loudest protestors. Just who are the Pustoy of this world? The persecutors or the persecuted? Will Gavin remain a hunted scapegoat? Is Solokov acting for the greater good; are the Pustoy really devoid of a soul? More importantly, how far away is this future, really? Phillippe Blenkiron's conceptual poetry collection demands these questions of the reader, whilst offering an unflinching examination of the human psyche, exploring the clouded moral hues between black and white, between right and wrong, that exist inside all of us. For fans of "1984," "Brave New World," and other greats of dystopian fiction, Philippe Blenkiron's debut poetry collection is shocking, unsettling, and closer to real-life than we dare admit

This book is only possible through the will of God. The inspirational messages given to us at times are very evident in this story and are meant for all. God can and will work through anyone whose heart is open and whose mind is still enough to hear that gentle voice speak to them. It is then that we realize how much our heavenly Father loves each one of us and wants us all to have a close relationship with Him. My name is Elisabeth, and this is my journey with the Lord. I was given this opportunity to share a part of my life with you. Alma, my sister, is truly blessed and has accompanied me through this journey. Some of the pictures and most of the inspirational messages associated with the pictures were given to Alma for us to use in this book. The pictures are all a gift from God. For this we humbly thank Him and our Blessed Mother, for allowing us to be a part of God's plan.

Write for Him is the story of how God brought together an online community of girls, bound together by a hobby of writing. The 25 young ladies featured in this book represent 10 different countries and many different backgrounds. They put their trust in God to overcome addictions, put away distorted views of God, learn how to cope with losing a parent, deal with bullies, face their fears about the future, and trade the messages of this world for the Truth. When they wrote these devotionals, fictional stories, testimonies, poems, and quizzes, they ranged in age from 11 to 24. Each writer desires to glorify God and encourage others by sharing a part of her life. We pray that the reflection of the faith, love, and hope of these girls will inspire in you a passion for God's Word, so we can continue to grow together into the women God desires for us to become.

Would you believe it if someone told you that you were one of the last two prophets mentioned in the book of Revelation? It is the End of Days. The power of the Antichrist and his grip on humanity grows stronger with each passing day, enabling him to deceive the world and entice humanity into joining him in his corruption, and in his eternal punishment. With the help of the False Prophet, the Beast persuades many to fall down and worship him, also forcing them to take his mark. When someone tells John March that he has been chosen by God to become the last of the two prophets mentioned in the book of Revelation, he doesn't believe it. After a visitation by an angel followed by a miraculous sign however, he becomes convinced that it is true and decides to embrace his calling, despite learning that doing so will lead to his untimely death. March begins his mission by proclaiming God's message: that the End of Days is at hand, to beware the growing power and influence of the Beast, and to know that the Second Coming of Jesus Christ is imminent. Supernatural disasters, including a worldwide drought, rivers of blood, massive earthquakes, and a devastating asteroid, testify that the end of the world is at hand. Join John March on his journey to becoming, The Last Prophet.
