Logging & Sawmilling Journal

Jinkers & Whims

Lettering & Type: Creating Letters and Designing Typefaces

Memoranda

25 Years of Hardwood Silviculture

Timber Bulletin

"Jinkers and whims traces the development of the methods and machines used to harvest the forests of Western Australia over the last 150 years, from first settlement to the present day, from horse and steam power to modern mechanical harvesters. It describes the bush workings and logging operations that underpinned WA's sawmilling industry-once the third largest industry in the state behind wheat and wool. It is also a tribute to the skill and innovation of the bushmen and engineers who brought about the changes and who designed and built those weird and wonderful machines that were unique to the industry and to this part of the world."--Back cover.

Manual de mecanización de los aprovechamientos forestales

El texto que presentamos bajo el título "Manual de mecanización de los aprovechamientos forestales" proporciona información imprescindible para la aplicación de los importantes avances tecnológicos de los últimos años a la gestión forestal sostenible. Es, por tanto, una herramienta necesaria tanto para los técnicos que planifican y dirigen las operaciones forestales como para los operarios que desarrollan esas tareas. Igualmente, se convierte en un texto muy indicado para apoyar y complementar la formación de los estudiantes universitarios de disciplinas forestales y medioambientales, y también para los de estudios profesionales relacionados con el sector forestal, muy especialmente los correspondientes al Certificado de Profesionalidad AGAR 0108: Aprovechamientos Forestales. También complementa y amplía los libros de esta misma editorial (bajo el sello Paraninfo, perteneciente al mismo Grupo Editorial) sobre mecanización y aprovechamientos correspondientes a las Unidades Formativas UF 0267, UF 0269, UF 0270, UF 0273, UF 0274. El libro proporciona información detallada sobre la maquinaria portátil y automotriz empleada en el monte, describe sus características y técnicas de uso, propone normas de organización de los trabajos que se realizan con ellas y analiza las consecuencias de esos trabajos sobre el entorno. También se recogen y explicitan las principales normativas que los regulan, haciendo especial hincapié en los aspectos medioambientales y de seguridad y salud. Se incluyen recomendaciones de mantenimiento y utilización de motosierras, desbrozadoras, tractores forestales, autocargadores, cosechadoras y procesadoras, se analizan en detalle sus componentes y su mecánica y se desglosa su empleo en aprovechamientos madereros para trabajar correctamente. Todos los contenidos se enfocan y desarrollan de forma eminentemente práctica, buscando que sean de fácil aplicación y se acompañan de fotografías, dibujos, ilustraciones y gráficos que complementan con claridad lo expuesto en el texto.

Proceedings - Annual Hardwood Symposium of the Hardwood Research Council

Global Perspectives on Sustainable Forest Management

International Journal of Forest Engineering

Timber Harvesting

Pulpwood Production and Saw Mill Logging

Canadian Mining Journal's Reference Manual & Buyer's Guide

A guide to type design and lettering that includes relevant theory, history, explanatory diagrams, exercises, photographs, and illustrations, and features interviews with various designers, artists, and illustrators.

The Southern Lumberman

Tells how clutches & transmissions work - gear, friction, & hydrostatic. Gives basics of service & repair of major types of drives, transmission, transaxles, & clutches used in compact equipment. Includes troubleshooting guides. It provides the reader with a list of skills & knowledge that should be learned with each chapter. CONTENTS: Basic principles, clutches, mechanical transmissions, hydrostatic transmissions, belt & chain drives, differentials, final drives, power take-offs, service & maintenance & troubleshooting.

The Northern Logger and Timber Processor

Forest Industries

This book is dedicated to global perspectives on sustainable forest management. It focuses on a need to move away from purely protective management of forests to innovative approaches for multiple use and management of forest resources. The book is divided into two sections; the first section, with thirteen chapters deals with the forest management aspects while the second section, with five chapters is dedicated to forest utilization. This book will fill the existing gaps in the knowledge

about emerging perspectives on sustainable forest management. It will be an interesting and helpful resource to managers, specialists and students in the field of forestry and natural resources management.
