There's nae power on earth can crush the men who can sing on a day like this. A powerful re-imagining of Joe Corrie's neglected classic about a Fife mining community during the General Strike. To raise funds for the soup kitchens feeding the miners and their starving families, Corrie wrote In Time O' Strife in 1926 whilst on strike himself, exposing the brutal lives of a family staring hunger and defeat in the face. Some 87 years later, Graham McLaren has adapted, designed and directed this rarely performed classic play. Created by Graham McLaren (Men Should Weep, A Christmas Carol), the production uses fragments of Corrie's other plays, poems and songs, celebrating his ability as a writer and his contribution to Scottish culture. This edition pairs Corrie's original text with the script created by McLaren's adaptation process.

"Atoms First seems to be the flavor of the year in chemistry textbooks, but many of them seem to be little more than rearrangement of the chapters. It takes a master like McQuarrie to go back to the drawing board and create a logical development from smallest to largest that makes sense to students."---Hal Harris, University of Missouri-St. Louis  
"McQuarrie's book is extremely well written, the order of topics is logical, and it does a great job with both introductory material and more advanced concepts. Students of all skill levels will be able to learn from this book."---Mark Kearley, Florida State University  
This new fourth edition of General Chemistry takes an atoms-first approach from beginning to end. In the tradition of McQuarrie's many previous works, it promises to be another ground-breaking text. This superb new book combines the clear writing and wonderful problems that have made McQuarrie famous among chemistry professors and students worldwide. Presented in an elegant design with all-

Through the eyes of an inventor of new markets, *Good Derivatives: A Story of Financial and Environmental Innovation* tells the story of how financial innovation – a concept that is misunderstood and under attack - has been a positive force in the last four decades. If properly designed and regulated, these “good derivatives” can open vast possibilities to address a variety of global problems. Filled with provocative ideas, fascinating stories, and valuable lessons, it will provide both an insightful interpretation of the last forty years in capital and environmental markets and a vision of world finance for the next forty years. As a young economist at the Chicago Board of Trade, Richard Sandor helped create interest rate futures, a development that revolutionized worldwide finance. Later, he pioneered the use of emissions trading to reduce acid rain, one of the most successful environmental programs ever. He will provide unique insights into the process of creating these new financial products. Covering successes and failures, the story describes the tireless process of inventing, educating and creating support

for these new inventions in places like Chicago, New York, London, Paris and how it is unfolding today in Mumbai, Shanghai and Beijing. The book will tell the story of the creation of the Chicago Climate Exchange and its affiliated exchanges (European Climate Exchange, Chicago Climate Futures Exchange and Tianjin Climate Exchange, located in China). The lessons learned in these markets can play a critical role in effectively addressing global climate change and other pressing environmental issues. The author argues that market-based trading systems are a far more effective means of reducing pollutants than “command-and-control”. Environmental markets may ultimately help to find solutions to issues such as rainforest destruction, water problems and biodiversity threats. Written in an engaging, narrative style, *Good Derivatives* will be of interest to both practitioners and general readers who want to better understand the creative process of financial innovation. In the middle of so much distrust of markets, it is also a recipe of how transparent, well-regulated markets can be a force for good in the environmental, health, and social areas.

### **ROADQUEEN: Eternal Roadtrip to Love**

Wall Street's miasmal garbage washes up on the Jersey Shore when a small time broker falls in love: Is he attracted to the beautiful lady — or her brother's inside information? Held spellbound by a steamy, auburn-haired woman with a dubious past and a get-rich-quick, insider trading scheme, Austin Carr knocks down a beehive of bad-acting Bonacellis, including the ill-tempered "Mr. Vic" Bonacelli, who wants his redhead back, and local mob lieutenant Angelina "Mama Bones" Bonacelli, architect of a strange and excruciating death trap for the fast-talking stockbroker she calls smarty pants. To survive, Austin must unravel threads of jealousy, revenge and new affections, discover the fate of a pseudo ruby called the Big Mojo and slam the lid on a pending United States of America vs. Austin Carr insider trading case. Can Austin and his Jersey Shore mouthpiece possibly out maneuver the savvy U.S. District Attorney from Manhattan? Will anything matter for Austin ever again if Mama Bones flips that switch? Praise for BIG MOJO ... "Darkly comic and always entertaining — with an outrageous cast of characters including a scheming grandmother and a mysterious redhead. Our engaging hero, fueled by honor and passion, does the best he can in a world where the bad guys seem determined to do him in. Gordon Gekko meets Janet

Austin Carr’s that buddy your wife doesn’t like you to hang out with. Fast-talking, wisecracking, and hard-living, he’s the type of guy who swears he’s only ever looking for a good time, and yet every night out with him seems to end in a fight. But you can’t deny he’s got heart — and BIG MOJO is Carr’s most epic adventure yet. It’s got frame-ups. Insider trading. Stolen jewels. Double-crosses. Triple-crosses. Love potions. Gunplay. And enough outsized characters it could only take place in the great state of New Jersey. So pick it up. Give it a read. But maybe tell the missus you’re hanging out with someone else.” — Chris F. Holm, author of the Collector Series “There’s no way you can lose with an Austin Carr novel with a gorgeous redhead, a character with the moniker of “Mama Bones”, a double-crossing business partner, more bad guys than can be seen in one place outside of the White House, and Austin’s smart mouth that surely he learned by reading lots of Robert B. Parker’s character Spenser ... A truly rollicking, fun, action-filled read with more twists than a fevered revival of Hula Hoop fanatics at a Jersey Shore ballroom ... And then, there’s that redhead. Always that redhead ... ” — Les Edgerton, author of The Genuine, Imitation, Plastic Kidnapping and others “The irrepressible Austin Carr is back, and he’s sly and sardonic as ever. Looks at the history and revival of religious naturalism, a spiritual path without a supreme being. Previously a forgotten option in religious thinking, religious naturalism is coming back. It seeks to explore and encourage religious ways of responding to the world on a completely naturalistic basis without a supreme being or ground of being. In this book, Jerome A. Stone traces its history and analyzes some of the issues dividing religious naturalists. He includes analysis of nearly fifty distinguished philosophers, theologians, scientists, and figures in art and literature, both living and dead. They range from Ursula Goodenough, Gordon Kaufman, William Dean, Thomas Berry, and Gary Snyder to Jan Christiaan Smuts, William Bernhardt, Gregory Bateson, and Sharon Welch. "...Stone's book offers landscape as well as portrait, for behind the particular figures in focus there is a wide range of religious naturalisms depicted in clear perspective and considerable depth of field. As theologian Philip Hefner observes in the foreword, Stone is an expert guide and companion to this broader landscape ... Stone's latest book belongs on any current reading list in religious naturalism and would make a fine centerpiece for an academic course or a book group on the subject." — American Journal of Theology and Philosophy "...Stone has

pointed toward religious naturalism's connections to and critiques of other types of religious scholarship. He opens possibilities for dialogue with the work of thinkers in many fields, including religious humanism and ecology, along with the ethical questions these fields raise. Stone's work is an excellent introduction to the renewal of religious naturalism that invites the reader to join the discussion." — Religious Studies Review "The strength of Religious Naturalism Today is its descriptions of early religious naturalists." —CHOICE "This is a timely contribution to contemporary theology. I know of no other book that provides such a clear yet nuanced account of the origins, development, and contemporary forms of religious naturalism. Stone's achievement ensures that religious naturalism will again be a major contender in theological debates." — Mary Doak, author of Reclaiming Narrative for Public Theology
