Despite the loss of the French Empire, France and its former colonies are still bound by a common historical past. With the new global promotion of la Francophonie, the relation between the various constituencies of the French-speaking regions of the world is reexamined and debated in this book, through the conversation between scholars dealing with diverse texts and contexts that present the colonial contact and its imprint. The book illustrates how, in France and in its other worlds, that contact, its repercussions, and its memory are lived and expressed today in a variety of textual

representations. The historical contact between France and its other worlds has given birth to new kinds of cross-cultural expressions in the arts, in literature, and in aesthetics, establishing interrelations and generating appropriations from both sides of the Hexagon frontier, highlighting the fluidity and the permeability of its cultural borders. The book subtext tells that the frontier between France and its other worlds is no more an unshakable geographical, political, and cultural limit, but rather a line that has become mobile, fluctuating, and permeable, and across which currents, ideas, sensitivities, and creativity are expressed, bearing testimony to vitality and diversity but also to a cross-fertilization of cultures and societies (re) crossing or meeting at that line. Seen from this latter perspective, the book comes also as an interrogation of the inclusiveness or exclusiveness of the words francophone and Francophonie, and, at an academic level, a mutual exclusion of French and Francophone Studies.

Compact Utility Tractors, or CUTs, are cute little cutters! As farming became more refined so did the needs of tractors. The answer was a smaller, more maneuverable and fuel-efficient tractor with a variety of implements and attachments. With this focus on special needs, attachments became available such as plows, disc harrows, mower decks, cultivators, spreaders, snowblowers, and more. They have become a necessary utility for farmers, orchards, small construction jobs, and landscaping/maintenance for estates, parks and golf courses. At the forefront of this evolution was the Farmall Cub and John Deere Model L. Then came the Japanese invasion; a new kind of tractor by companies such as Yanmar and Kubota. These four-wheel drive machines were rugged and tough and used a variety of hydraulically powered attachments. American companies like John Deere, International Harvester, and Massey Ferguson built their own their own four-wheel versions. Today's compact tractors, such as the Kubota BX series, Massey Ferguson's GC series, and the John Deere 3000, offer an even larger selection of implements for special purposes.

Takeshi's acupuncture techniques are meant to calm Hannah's erratic heartbeat, but the longer they are together, the more his magic fingers have the opposite effect. Soon, their passion flares hotter than any lightning strike. But now the terrorist they seek is hunting them. And the FBI is suspicious Hannah knows just a little too much. Large-scale agriculture tends to view a farm as a means for producing a certain amount of grain, milk or meat. This practical book argues instead for a holistic method of farming: the farm as a living organism. This is the principle of biodynamic farming. The author, an experienced farmer, takes a down-to-earth approach. Based on an example farm of around 60 hectares, he recommends the ideal numbers of livestock: 12 cows, 4 horses, 6 pigs, 10 sheep and 120 hens. This mix is drawn from Osthaus's deep understanding of nature, animals, agriculture and the cosmos, and from his many years of personal experience as a biodynamic farmer and teacher. The result is a healthy, balanced and sustainable farm. This is an invaluable book for anyone considering setting up a farm, or developing their existing farm with new biodynamic methods.
