When school buildings are aging, a decision must be made as to whether to continue to maintain the existing building, renovate building, or build new. Very seldom is extending the existing buildings life over building a new building. If renovation costs exceed 50% of the cost of new construction, it is better to build instead of renovating. The taxpayers in your community will have much to say on whether to renovate or build new. Much emphasis should be given to taxpayer input before the school board makes a final decision. School administrators are responsible to the community for maintaining school buildings and they owe an explanation to the community of what has been done to protect existing school buildings. This book is developed to help aspiring teachers who want to become principals, business managers or superintendents, that existing buildings need to be properly maintained and functional and can continue to serve the public for many years to come.

A visual guide to one of the fastest growing areas in trading and speculation An Exchange-Traded Fund (ETF)—a security that tracks an index, a commodity, or a basket of assets like an index fund, but trades like a stock on an exchange—offers diversification of an index fund, as well as the ability to sell short, buy on margin, and purchase as little as one share. Giving financial advisors, institutional asset managers, traders, and other investment professionals the information they need to get the most out of ETF opportunities, the Bloomberg Visual Guide to ETFs covers the subject in a highly visual manner. Starting with an introduction to ETFs, the book looks at where they fit within the world of investment products, how they are structurally differentiated from other products and among themselves, relevant tax considerations, global listings, growth on a global basis, evolution of the product set, and other topics. Also looking towards the future, the text provides information on finding ETFs—including fund searches, fund news, measuring and valuing ETFs, evaluating their correlation to the underlying sector or commodity being tracked, and more. As a result, the book is a resource not just for understanding ETFs today, but for taking advantage of what's to come. Presents critical information in an easy-to-absorb visual manner Serves as a reference, presenting information in easily digestible pieces for easy access Author David Abner is a well-known ETF developer expert Incorporates quizzes, charts, and other accessible features to bring the material to life ETFs are multivarious, complex instruments that offer unique rewards, and the Bloomberg Visual Guide to ETFs brings together everything that people working with them need to understand to cash in.

From internal control structures that are not fraud-specific to insufficient communication in the fraud discovery-to-investigation and conviction process, fraudulent activity is a widespread fact of life in the business world. Historically, the corporate tendency has been to react to fraud after the fact, rather than to be proactive in its prevention. And in most cases, blame is directed at accountants and auditors. Unfortunately, these officers are rarely provided with the resources, proper training, and commitment from top management that are essential to effective fraud detection and control. The Accountant's Guide to Fraud Detection and Control offers comprehensive direction for this largely uncharted area. Two

types of fraud are addressed in this book: fraudulent financial reporting, also known as "Treadway" fraud, usually originating in the top management sector; and "asset-theft" fraud, the more common and more costly type, likely to be practiced by virtually anyone, including outsiders. Treadway fraud is being adequately detected by independent auditors (CPAs) in their annual audits. Asset-theft fraud is not being adequately detected by anyone, with very few exceptions. From following clues to achieving a prosecution, here is sound advice that accountants and auditors will find invaluable. Businesses lose over \$100 billion a year to fraud. Only 20 percent is discovered. Who's to blame? Accountants and internal auditors are often the scapegoats for management's insufficient fraud detection operations and guidelines. At last, here is comprehensive, intermediate training for evaluating, devising, and installing fraud-specific internal controls, and for conducting proactive fraud-specific examinations. Including actual case studies, the authors show accountants and auditors how to: Anticipate problems and follow clues Successfully disclose fraud Compile the evidence necessary to prosecute acts of fraud Develop investigative techniques Create effective internal controls . . . and much more, to fill the needs of this crucial area. www.wiley.com/accounting
