Legal research examines subject matter enshrouded in social circumstances in order to conceptualize theories and prepare a future course of action. This dynamic, inter-disciplinary, and labyrinthine character of legal research requires researchers to be fluid, eclectic, and analytical in their approach. Idea and Methods of Legal Research unearths how the thinking process is to be streamlined in research, how a theme is built on the basis of comprehensive and intensive study, and the paths through which notions of objectivity, feminism, ethics, and purposive character of knowledge are to be understood. The book first explains the meaning, evolution, and scope of legal research, and discusses objectivity and ethics in legal research. It engages with the requirements, advantages, and limits of various doctrinal and non-doctrinal methods and tools, and the points to be considered in selecting a suitable method or combination of methods. It highlights analytical, historical, philosophical, comparative, qualitative, and quantitative methods of legal research. The book then goes on to discuss the use of multi-method legal research, policy research, action research, and feminist legal research and finally, reflects on research-based critical legal writing, as opposed to client-related legal writing. This book, thus, is a comprehensive answer to key questions one faces in legal research.

The second edition of California Legal Research continues to fill a unique niche in the literature available for California state law research, explaining both the sources of California law and the process of conducting research using those sources. This edition includes enhanced coverage of online sources, and WestlawNext, Lexis Advance, and free Internet sources are covered throughout. After introductory chapters devoted to the basic research process and research techniques, California Legal Research explores judicial opinions, the state constitution, statutes and legislative history, and administrative law. A final chapter explains legal citation, with information on the California Style Manual, the ALWD Citation Manual, and the Bluebook. The book should be valuable to a wide range of audiences — from first-year students to seasoned veterans. Outlines of the research process and excerpts from key state sources make the book easy to use. The text includes brief discussions of legal analysis throughout, recognizing the interplay between research and analysis. California Legal Research supplements its detailed discussion of state research with brief discussions of federal research. Thus, it can be used as the sole text in a research course or in conjunction with texts focusing on topical or federal research. This book is part of the Legal Research Series, edited by Suzanne E. Rowe, Director of Legal Research and Writing, University of Oregon School of Law.
