Michael Swanson's online discussions with literally thousands of NexStar owners made it clear that there was a desperate need for a book such as this - one that provides a complete, detailed guide to buying, using and maintaining NexStar telescopes. Although this book is highly comprehensive, it is suitable for beginners - there is a chapter on "Astronomy Basics" - and experts alike. Celestron's NexStar telescopes were introduced in 1999, beginning with their first computer controlled "go to" model, a 5-inch. More models appeared in quick succession, and Celestron's new range made it one of the two dominant manufacturers of affordable "go to" telescopes.

This carefully crafted ebook is formatted for your eReader with a functional and detailed table of contents. The sixth season of the fantasy drama television series Game of Thrones premiered on HBO on April 24, 2016, and concluded on June 26, 2016. It consists of ten episodes, each of approximately 50-60 minutes, largely of original content not found in George R. R. Martin's A Song of Ice and Fire series. Some material is adapted from the upcoming sixth novel The Winds of Winter and the fourth and fifth novels, A Feast for Crows and A Dance with Dragons. The series was adapted for television by David Benioff and D. B. Weiss. HBO ordered the season on April 8, 2014, together with the fifth season, which began filming in July 2015 primarily in Northern Ireland, Spain, Croatia, Iceland and Canada. Each episode cost over \$10 million. This book has been derived from Wikipedia: it contains the entire text of the title Wikipedia article + the entire text of all the 593

related (linked) Wikipedia articles to the title article. This book does not contain illustrations. e-Pedia (an imprint of e-artnow) charges for the convenience service of formatting these e-books for your eReader. With its cranked wing and vulture-like looks the Junkers Ju 87 Stuka dive-bomber came to symbolise the terror of the German Blitzkrieg. In the early years of the Second World War the Ju 87 lived up to its fearsome reputation, but it eventually met its match when pitted against more modern adversaries. Supported by a comprehensive selection of photographs and technical drawings, Jonathan Falconer's Junkers JU 87 Stuka Manual describes the design, construction and operation of the feared Stuka, which saw frontline action wherever the German Army went – from Norway, western Europe and Russia, to North Africa.

Preserving New York

Scientific and Technical Aerospace Reports

Preserving New York is the largely unknown inspiring story of the origins of New York City's nationally acclaimed landmarks law. The decades of struggle behind the law, its intellectual origins, the men and women who fought for it, the forces that shaped it, and the buildings lost and saved on the way to its ultimate passage, span from 1913 to 1965. Intended for the interested public as well as students of New York City history, architecture, and preservation itself, over 100 illustrations help reveal a history richer and more complex than the accepted myth that the landmarks law sprang from the wreckage of the great Pennsylvania Station. Images include those by noted historic photographers as well as those from newspaper accounts of the time. Forgotten civic leaders such as Albert S. Bard and lost buildings including the Brokaw Mansions, are unveiled in an extensively researched narrative bringing this essential episode in New York's history to future generations tasked with protecting the city's landmarks. For the first time, the

story of how New York won the right to protect its treasured buildings, neighborhoods and special places is brought together to enjoy, inform, and inspire all who love New York.

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated. Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

In his 1998 State of the Union address, President Clinton challenged Americans to a public debate about how to fix the long-term financial problems of Social Security. This annual volume of the National Academy of Social Insurance provides a framework for that debate. Competing reform proposals reflect contrasting views about the nature of the Social Security problem and how to solve it. This book examines issues about privatization, national savings and economic growth, the political risks and realities in reforms, lessons from private pensions developments in the United States, and the efforts of other advanced industrial countries to adapt their old-age pensions to an aging population. It also poses philosophical arguments about collective versus individual responsibility and the implications of market risks and political risks for stable and secure retirement income policy. The contributors are Theo Angelis, Michael J. Boskin, Peter A. Diamond, John Geanakoplos, Hugh Hecl, Karen C. Holden, Howell Jackson, Olivia Mitchell, Dallas L. Salisbury, Lawrence H. Thompson, Kent Weaver, and Stephen P. Zeldes. Copublished with the National Academy of Social Insurance

Kilobaud: Microcomputing

A behind-the-scenes look into the lives of successful middle- and upper-middle class African American women, the groundbreaking *HAVING IT ALL?* is sure to spark discussions from cocktail parties to boardrooms. In a single generation, black women have made extraordinary strides academically, professionally, and financially. They've entered the workplace at a far greater rate than white women; increased their enrollment in law schools and graduate programs by 120 percent; and many are now running top companies, or in some cases, the country. Isn't that enough? Not necessarily. With sharp insight, award-winning journalist Veronica Chambers explores the challenges and stereotypes she and other African American women continue to endure, and answers the question most often posed to her: What does success mean for black women? Twenty-first century black women draw their inspiration from a wide range of sources: Claire Huxtable to Audrey Hepburn, snowboarding to basketball, Gloria Steinem to bell hooks. They choose what they like. Yet they are misunderstood by mainstream America and lack an accurate portrayal in the media of their lives. *HAVING IT ALL?* interweaves the thoughts and reflections of more than fifty women who occupy this territory. The voices range from Thelma Golden, chief curator of The Studio Museum in Harlem, to a Silicon Valley executive, to medical and legal professionals, and stay-at-home "mocha moms." Successful black women today want it all: marriage, motherhood, engaging work, and prosperity. The difference is that they come to the table with the strength, courage and wisdom of black women ancestors who-did-it-all, even when they didn't-have-it-all. What has gone so undocumented by the media is that modern black women are coming up with creative, satisfying answers to the juggling act that all women face. Veronica Chambers chronicles this topic for the first time in her absorbing, riveting and groundbreaking book *HAVING IT ALL?* From the Trade Paperback edition.
