An Introduction to Clinical Emergency Medicine

Clinical Decision Making

As Charles Frazier's novel *Cold Mountain* dramatized, dissenters from the Confederacy lived in mortal danger throughout the South. In scattered pockets from the Carolinas to the frontier in Texas, these dissenters, or "brush men," often died at the hands of their own neighbors as a result of their belief in the Union or an unwillingness to preserve the slaveholding Confederacy. *Brush Men and Vigilantes: Civil War Dissent in Texas* tells the story of how dissent, fear, and economics developed into mob violence in the Sulphur Forks river valley northeast of Dallas. Authors David Pickering and Judy Falls have combed through court records, newspapers, letters, and other primary sources and have collected extended-family lore to relate the details of how vigilantes captured and killed more than a dozen men. Betrayed by links to a well-known Union guerilla, many dissenters were captured, tried in mock courts, and hanged. Still others met their death by sniper fire or private execution. Their story begins before the Civil War, as they describe the particular social and economic conditions that gave rise to tension and violence during the war. Four more chapters follow, each detailing the horror and hysteria that characterized post-Civil War Texas.

Introductory Pediatric Nursing

Organized around the central theme of homeostasis - how the body meets changing demands while maintaining the internal constancy necessary for all cells and organs to function - this title helps you understand how each component of the course depends on the others and appreciate the integrated functioning of the human body.

Through the Looking Glass

The Phoenix Commotion is a local building initiative created to prove that constructing homes with recycled and salvaged materials has a viable place in the building industry. This process uses only apprentice labor and teaches marketable skills to anyone with a work ethic who is willing to swing a hammer. By keeping labor costs low and using donated or found materials, the homes created are truly affordable. (www.phoenixcommotion.com) This book is an examination of the history of Phoenix Commotion and the philosophy of Dan Phillips, the prime mover of the enterprise. Here readers will be introduced to the major projects of Phillips

and Phoenix Commotion: the story behind them and the specifics of these unique structures, complete with black-and-white and color plates.

Texas, the 1930s—the years of the Great Depression. It was the Texas of great men: Dobie, Bedichek, Webb, the young Américo Paredes. And it was the Texas of May McCord and "Cocky" Thompson, the Reverend I. B. Loud, the Cajun Marcelle Comeaux, the black man they called "Grey Ghost," and all the other extraordinary "ordinary" people whom William A. Owens met in his travels. "Up and down and sideways" across Texas, Owens traveled. His goal: to learn for himself what the diverse peoples of the state "believed in, yearned for, laughed at, fought over, as revealed in story and song." Tell me a story, sing me a song brings together both the songs he gathered—many accompanied by music—and Owens' warm reminiscences of his travels in the Texas of the Thirties and early Forties.

The Science Focus Second Edition is the complete science package for the teaching of the New South Wales Stage 4 and 5 Science Syllabus. The Science Focus Second Edition package retains the identified strengths of the highly successful First Edition and includes a number of new and exciting features, improvements and components. The homework book provides: an easy to follow outline of the various worksheets related to each chapter of the student book; a syllabus correlation grid linking each worksheet to NSW Science Syllabus; worksheets with explicit use of mandatory verbs; a clearer gradation of activities from simple to complex, within each worksheet

Brush Men and Vigilantes

Using a consistent, logical, and step-by-step approach, *MEDICAL TERMINOLOGY: A LIVING LANGUAGE*, 5/e introduces students to the anatomy and physiology of body systems and the corresponding medical terms related to them. For each body system, broad coverage of anatomy, physiology, pathology, diagnostic procedures, treatment procedures, and pharmacology is provided. The author emphasizes both terms built from Latin and Greek word parts, and modern English terms, helping students develop a full working word part vocabulary they can use to interpret any new term. This edition contains many new terms, and has been reorganized for more efficient learning. To eliminate confusion, Word Building tables have been removed from each chapter and the terms have been distributed throughout the pathology, diagnostic procedure, and treatment procedure tables, where they are more immediately relevant to students.
