people to governments and media today. The dismal state of a country's education system is said to be a reflection of the condition of the society it is meant to serve. What are we teaching young people today? Do we understand what they need to learn for their ultimate well being? In traditional societies, education was the means by which knowledge of the Divine Principle and its relation to the human soul was transmitted to young generations. Addressing a theme rarely discussed in philosophical and educational circles, this unique volume attempts to rediscover the truths and values engrained in traditional education systems. Some of the articles also go to the heart of the woes of modern public education systems."--Publisher's website.

The great majority of papers on brain research that have been published in Mainland China in recent years have appeared in the Chinese language (only a small fraction of the work has appeared in English in the journal *Scientia Sinica*), and hence they have remained inaccessible to other workers, since there have been no translation programs of publications in this field in Chinese of the types that have existed, for example, for Russian-language materials. Accordingly, most investigators are not aware of the work of their Chinese colleagues in this field. Yet the field has been an active if small one in China, and has covered a variety of topics that include electrophysiology, neurochemistry, neuropharmacology, neuropsychology, and instrumentation. Chinese Medical Characters: Basic vocabulary

The Strange Tales of Pu Songling (1640-1715) are exquisite and amusing miniatures that are regarded as the pinnacle of classical Chinese fiction. With their elegant prose, witty wordplay and subtle charm, the 104 stories in this selection reveal a world in which nothing is as it seems. Here a Taoist monk conjures up a magical pear tree, a scholar recounts his previous incarnations, a woman out-foxes the fox-spirit that possesses her, a child bride gives birth to a thimble-sized baby, a ghostly city appears out of nowhere and a heartless daughter-in-law is turned into a pig. In his tales of humans coupling with shape-shifting spirits, bizarre phenomena, haunted buildings and enchanted objects, Pu Songling pushes back the boundaries of human experience and enlightens as he entertains.
