The German Tiger I was the most feared battle tank of the Second World War. Its invincibility lay in its main 8.8cm gun and heavy defensive armour. Tiger Tank gives a rare insight into acquiring, owning and operating one of these awesome fighting machines, using the UK's Tank Museum's Tiger 131 - the only Tiger I in the world that has been restored to full running order. In addition to offering unique insights into maintenance and driving the Tiger, the book includes vivid personal recollections from wartime German tank crewmen and reveals what it was like to operate this 57-ton giant in combat. It was written by a team of experts from the Tank Museum who were closely involved with the strip-down and rebuild of the Tiger I. David Fletcher is a historian, a prolific author and a world expert on tanks.

The Current state of expectations is that Computer Integrated Manufacturing (CIM) will ultimately determine the industrial growth of world nations within the next few decades. Computer Aided Design (CAD), Computer Aided Manufacturing (CAM), Flexible Manufacturing Systems (FMS), Robotics together with Knowledge and Information Based Systems (KIBS) and Communication Networks are expected to develop to a mature state to respond effectively to the managerial requirements of the factories of the future that are becoming highly integrated and complex. CIM represents a new production approach which will allow the factories to deliver a high variety of products at a low cost and with short production cycles. The new technologies for CIM are needed to develop manufacturing environments that are

smarter, faster, close-cou pled, integrated, optimized, and flexible. Sophistication and a high degree of specialization in materials science, artificial intelligence, communications technology and knowledge-information science techniques are needed among others for the development of realizable and workable CIM systems that are capable of adjusting to volatile markets. CIM factories are to allow the production of a wide variety of similar products in small batches through standard but multi mission oriented designs that accommodate flexibility with specialized software.

There has been a Skyline in Nissan's line-up since 1966. After many changes the Skyline found its sporting feet again in 1981 and 1986. The R32 Skyline GT-R name was revived in 1989 and has hardly been altered since. It has been very successful and has dominated Group A Touring Car racing worldwide. This is a book of contemporary road and comparison tests, new model introductions, driver's impressions, long term report, buying second-hand, track tests.

vanish. Only one returned, Olivia, starved, terrified, and with no memory of where she'd been. Questioned by the police but released for lack of evidence, Nathan spent the years trying to forget. When a body is found in the same ancient woodland where they disappeared, it is first believed to be one of the missing children, but is soon identified as a Bronze Age warrior, nothing more than an archaeological curiosity. Yet Nathan starts to have horrific visions of the students, alive but trapped. Then Olivia reappears, desperate that the warrior's body be returned to the earth. For he is the only thing keeping a terrible evil at bay...

Nissan Z: 50 Years of Exhilarating Performance is the Nissan-official chronicle of Z history, from Datsun's planning for the new model in the late 1960s through the latest 50th anniversary Nissan 370Z. The Datsun 240Z revolutionized the sports car industry and demolished established assumptions about Japanese automakers. With the Z, Datsun gave the world a sleek, sexy, fast product—one that forever banished the idea that Japanese manufacturers could only build economy cars. Over the past 50 years, six generations of the Z car have generated a massive, devoted following. More than 1.5 million cars have been sold worldwide. The retro-inspired 350Z reinvigorated the Z's fortunes in the 21st century, and the latest incarnation, the 370Z, continues the tradition of high-performance in a modern, affordable package. In addition to a complete history of the Z, this handsomely illustrated book examines the car's significant racing history with successes in IMSA and SCCA sports car racing, including extensive racing by Paul Newman for Bob Sharp and John Morton with Brock Racing Enterprises. Special attention is devoted to the cult of Z-fans around the world who have supported Nissan's sports

How to Restore Your Datsun Z-Car

Close your eyes and think of the luckiest day of your life. Was it when you got married? Or did you hit a windfall of cash? Maybe you escaped a near death experience. The fact is, something had to happen for you to feel that way. The truth is, anyone can wake up feeling happy. But we need an outlier to feel lucky. May 17th 2006 was my outlier. That was the day I was sentenced to juvenile detention. That's the nice way of saying jail for kids. I landed in juvie as a 17 year old high school drop out. Behind bars, I was met with a choice. Succumb to who I was or try and salvage this thing they call life. This is a tale of perseverance, second chances and of course, luck.

Since its introduction, the Skyline GT-R has been the undeniable king of the tuner CAR world. This book explains why. Along with an overview of Skylines since their debut in 1957, Author Alex Gorodji gives in-depth reviews of the last four generations of GT-Rs, including the new-for-2008 V35 – the first iteration of the car to be sold in the U.S. Paying special attention to technical aspects such as the all-wheel steering and drive systems, the chassis, and the legendary six-cylinder twin-turbocharged engine, his work explains the GT-R to those who already admire the car, and to those who wonder what the excitement is all about.

The #1 New York Times–bestselling humorist’s tribute to car travel is “a ride worth taking, even for readers who don’t know an oil pan from a frying pan” (The Washington Times). From a veteran of both Car and Driver and National Lampoon magazines, this hilarious book chronicles the golden age of the automobile in America—and takes us on a whirlwind tour of the world’s most scenic and bumpiest roads in trouble-laden cross-country treks, from a 1978 Florida-to-California escapade in a 1956 special four-door Buick sedan, to a thousand-mile effort across Mexico in the Baja 1000 in 1983, to a journey through Kyrgyzstan in 2006 on the back of a Soviet army surplus six-wheel-drive truck. For longtime fans of the celebrated humorist, the collection features a host of O’Rourke’s classic pieces on driving, including “How to Drive Fast on Drugs While Getting Your Wing-Wang Squeezed and Not Spill Your Drink,” about the potential misdeeds one might perform in the front (and back) seat of an automobile; “The Rolling Organ Donors Motorcycle Club,” which chronicles a seven-hundred-mile weekend trip through

Michigan and Indiana that O'Rourke took on a Harley-Davidson; his brilliant and funny piece from Rolling Stone on NASCAR and its peculiar culture recorded during an alcohol-fueled weekend in Charlotte, North Carolina, in 1977; and an hilarious account of a ride from Islamabad to Calcutta in Land Rover's new Discovery Trek. "Never in neutral, O'Rourke offers laughter on wheels." —Publishers Weekly "An insightful look not just at the American love affair with cars, but also at one man's changing outlook on life, all of it fast-paced and over the top . . . Even readers who know nothing about cars and motorcycles will appreciate the joy and hilarity of this book." —Booklist

This book chronicles the 91 years in which Ford built cars in Australia for Australian conditions and interviews many of the people who worked for the company. It constitutes the complete history of Ford production in this country, with many rare images and essential production statistics. The perfect book for every Ford enthusiast, or anyone with an affinity for cars or industrial Australia. On March 31, 1925, US manufacturer Ford announced that Geelong would be the Australian headquarters of its local production. The first Australian-built Ford was a Model T that came off an improvised production line in a disused Geelong woolstore in June 1925, while work started on a factory in the nearby suburb of Norlane. In 1928 the factory switched to the Model A and was followed by the Ford V8 in 1932. In 1956

the company bought a large tract of land in the northern Melbourne suburb of Broadmeadows, and in July 1961 announced that the new Melbourne factory would become the company headquarters. On the 23 May 2013, Ford announced that its factories in Geelong and Broadmeadows would be closed down in October 2016.

clips. So when he is hired to defend a local man accused in a triple murder in East Hampton, he knows that he has found the case of his lifetime. The crime turns the glittering playground for the super-rich into a blazing inferno. Dunleavy's client is a local hero, but he knows the case rests on money, deception, and forbidden desires. His client will be framed-unless he can find the key to the case. When Dunleavy is joined by his former flame, the savvy and well-connected attorney, Kate Costello, he believes he has a chance. But payback is a bitch, especially from the rich. The violent retaliations of billionaires threatened by his investigation exceed anything Dunleavy has ever seen. With the entire nation's eyes on him in a new Trial of the Century, Dunleavy orchestrates a series of revelations that lead to a stunning outcome-and the truth is wilder than anything he ever imagined.

Dreamed up by drivers trying to outdo each other on the mountain passes of Japan, the art of the sideways descent of a switchback-what Wired described as "the fishtailing ballet of burning rubber called drifting"-has made it to the United States in a big way. What began as a new kind of daredevil driving among teens has, over two decades, become a sanctioned sport, making its way across the Pacific through video games and magazines, anime and the Internet, to take root in California's fertile underground racing culture. Drifting tells the story of drifting from its arrival on the West Coast to its emergence as the hottest form of motorsport in the United States. A dramatic visual record of the sport in America that includes over 400 photos, the book also profiles the people, teams, techniques, web sites, publications, videos, and trends that have made drifting the phenomenon that it is today. For the curious newcomer, author Antonio Alvendia's introduction succinctly explains what drifting is, setting the stage for the thrilling
