experiences lasting from an hour to several weeks. More than 300 historic commercial vessels, such as ferries, tugs, and steamboats, as well as warships, including battleships, aircraft carriers, destroyers, and small craft dating from the 18th century to the middle 20th century that you can visit. More than 750 photogenic lighthouses and lightships grouped by East Coast, West Coast, the Gulf Coast, and the Great Lakes. More than 260 family-friendly maritime museums in 37 states and the District of Columbia. Three maps with suggested itineraries for discovering lighthouses in New England, California, and Michigan. Special articles on the tall ship Lady Washington, forgotten steamboats on the Okanogan River, the best lighthouse books, and major maritime festivals. Twenty-five professional photos of key ships and other attractions. The Fyddeye Guide to America's Maritime History complements Fyddeye, <http://www.fyddeye.com>, the Internet's most comprehensive website dedicated to maritime history and heritage. Fyddeye also features an online community that discusses news about maritime history and current issues, including preservation of historic ships. You can also share photos and vote in polls on current events. Visit Fyddeye's pages on Facebook and follow Fyddeye on Twitter.

Ship Safety Handbook 2

In the last few years, the quantity of books and papers on the political, economic and legal problems of the exploration and use of the sea and marine resources has considerably increased. But the status and activities of international organizations related to maritime shipping, fisheries, scientific research in the World Ocean and the protection of the marine environment have not yet, as a whole, been represented in the scientific and reference literature. It would be fair, though, to mention that some general information on marine international organizations may be found in the Yearbook of International Organizations, Brussels, 1979; in Annotated Acronyms and Abbreviations of Marine Science Related International Organizations, U. S. Department of Commerce, 1976; and in the UN Annotated Directory of Intergovernmental Organizations Concerned with Ocean Affairs, 1976. Voluminous information on organizations engaged in problems of the exploration and use of the sea is given in International Marine Organizations by the well-known Polish scientists Lopuski and Symonides, 1978. Meanwhile the increasing volume of practical work related to the participation of governmental and scientific bodies as well as individual scientists and specialists in these organizations, the necessity of long-term planning in this field, and the perspectives of the development of these organizations, make necessary a special publication depicting the structure and many-sided activities of such international bodies. This book is the first one in which the most complete information on the main marine international

organizations is presented.

International Maritime Law Conventions: Training, employment and welfare; environment

The importance of international maritime labour law - both as a component of international maritime law, and in socio-political and economic terms - has been recognised by the IMO International Maritime Law Institute for a number of years. Indeed, the Institute has annually organised a course on maritime labour law with the participation of inter alia the International Maritime Organization, the International Labour Organization, the International Transport Workers' Federation, and the German Shipowners' Association. It was therefore a great pleasure when the authors invited me to introduce their forthcoming monograph on Maritime Work Law Fundamentals: Responsible Shipowners Reliable Seafarers. As the title suggests, a fundamental challenge of this branch of international maritime law is to achieve a balance between the interests of the two main stakeholders. Institutionally, the effort to achieve this balance dates back a number of decades with its genesis mainly found in the work of the International Labour Organization. It has to be said that whilst this effort achieved great progress, it has led to a haphazard, plethora of legal instruments.

This updated and expanded edition tackles the increasingly complex maze of federal and state fund-raising regulations. It details federal and state laws, with an emphasis on administrative, tax, and constitutional law. It also explains state and federal rules impacting the responsibilities of fund-raising professionals, as well as explores compliance issues, prospective laws, and regulatory trends.

This book assesses the state of practice and use of ship-bridge simulators in the professional development and licensing of deck officers and marine pilots. It focuses on full-mission computer-based simulators and manned models. It analyzes their use in instruction, evaluation and licensing and gives information and practical guidance on the establishment of training and licensing program standards, and on simulator and simulation validation.
