### Catullus and His World

This book is a consolidation of essays arranged in three layers thematically. The first is directly about the AA; the second attempts to synthesize the converstaions that are typical and current in the school at the present time; the third is a group of discussions taken from video-tape interviews with four well-known AA architects who have each made reputations that are distinct and personal.

### Small Animal Endocrinology

A companion volume to 'Electrogravitics Systems: Reports on a New Propulsion Methodology', this book delivers: (1) the scientific validation from three different authorities; (2) the compelling public history of gravity research conducted by the aviation industry before it became 'unacknowledged' and (3) testimonials which eye-witnesses have provided. In total, this anthology attests to the validity of the Biefeld-Brown high voltage force effect. The book's Science Section includes a well-known 'electrokinetic force' and how it works; the proposed ion mobility explanation; and how electricity and gravity may couple. The Historical Section contains seven articles about T T Brown, gravity research, etc. Also included are a Testimonial Section and Patent Section.

### Ancient Coins Through the Bible

Essays on Irish nationalism, some on particular protest movement, others on more general themes.

Considered a standard industry resource, the Embedded Systems Handbook provided researchers and technicians with the authoritative information needed to launch a wealth of diverse applications, including those in automotive electronics, industrial automated systems, and building automation and control. Now a new resource is required to report on current developments and provide a technical reference for those looking to move the field forward yet again. Divided into two volumes to accommodate this growth, the Embedded Systems Handbook, Second Edition presents a comprehensive view on this area of computer engineering with a currently appropriate emphasis on developments in networking and applications. Those experts directly involved in the creation and evolution of the ideas and technologies presented offer tutorials, research surveys, and technology overviews that explore cutting-edge developments and deployments and identify potential trends. This second self-contained volume of the handbook, Network Embedded Systems, focuses on select application areas. It covers automotive field, industrial automation, building automation, and wireless sensor networks. This volume highlights implementations in fast-evolving areas which have not received proper coverage in other publications. Reflecting the unique functional requirements of different application areas, the contributors discuss inter-node communication aspects in the context of specific applications of networked embedded systems. Those looking for guidance on preliminary design of embedded systems should consult the first volume: Embedded Systems Design and Verification.

## **Six Billion Plus**

Origins of Pan-Africanism: Henry Sylvester Williams, Africa, and the African Diaspora recounts the life story of the pioneering Henry Sylvester Williams, an unknown Trinidadian son of an immigrant carpenter in the late-19th and early 20th century. Williams, then a student in Britain, organized the African Association in 1897, and the first-ever Pan-African

Conference in 1900. He is thus the progenitor of the OAU/AU. Some of those who attended went on to work in various pan-African organizations in their homelands. He became not only a qualified barrister, but the first Black man admitted to the Bar in Cape Town, and one of the first two elected Black borough councilors in London. These are remarkable achievements for anyone, especially for a Black man of working-class origins in an era of gross racial discrimination and social class hierarchies. Williams died in 1911, soon after his return to his homeland, Trinidad. Through original research, *Origins of Pan-Africanism: Henry Sylvester Williams, Africa, and the African Diaspora* is set in the social context of the times, providing insight not only into a remarkable man who has been heretofore virtually written out of history, but also into the African Diaspora in the UK a century ago.

## **High Power Laser Handbook**

The Routledge Handbook of U.S. Military and Diplomatic History provides a comprehensive analysis of the major events, conflicts, and personalities that have defined and shaped the military history of the United States in the modern period. Each chapter begins with a brief introductory essay that provides context for the topical essays that follow by providing a concise narrative of the period, highlighting some of the scholarly debates and interpretive schools of thought as well as the current state of the academic field. Starting after the Civil War, the chapters chronicle America's rise toward empire, first at home and then overseas, culminating in September 11, 2001 and the War on Terror. With authoritative and vividly written chapters by both leading scholars and new talent, maps and illustrations, and lists of further readings, this state-of-the-field handbook will be a go-to reference for every American history scholar's bookshelf.

## **Folklor i Povijesni Proces**

A revelatory collection of essays and poems by a master of Eastern philosophy In these writings, Gibran offers verses and lyric prose that possess all the grandeur of rich music. Here are the great truths and heartening joys drawn from the tears and sufferings of man. Each work sparkles with simile and symbolism, from "Seven Reprimands," containing wise rules to live by, to "The Sayings of the Brook," about the secrets to beauty, wealth, and virtue. These are profound exaltations of a great soul, and a trove of wisdom as relevant today as when it was first written.

## **Literary Reflections**

Nothing confuses Christian ethics quite like the Old Testament. Some faithful readers struggle through its pages and conclude that they must obey its moral laws but may disregard its ceremonial and civil laws. Others abandon its teaching altogether in favor of a strictly New Testament ethic. Neither option, argues Chris Wright, gives the Old Testament its due. In

this innovative approach to Old Testament ethics--fully revised, updated and expanded since its first appearance in 1983 as *Living as the People of God (An Eye for an Eye in North America)* and including material from *Walking in the Ways of the Lord*--Wright examines a theological, social and economic framework for Old Testament ethics. Then he explores a variety of themes in relation to contemporary issues: economics, the land and the poor; politics and a world of nations; law and justice; society and culture; and the way of the individual. This fresh, illuminating study provides a clear basis for a biblical ethic that is faithful to the God of both Testaments.

Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center

A scholarly treatment of English spoken in the Midwest, or the northern interior of the continental United States. Frazer and his contributors show that this is a complex region in which forces - old and new - have led to variety in the spoken language.

## **"Heartland" English**

Coins have not changed much throughout antiquity. Yes, they are made from different, more durable materials now, but they are still etched with depictions of their civilization, whether that means the profile of George Washington or the profile of Emperor Nero or the profile of a lion, the symbol of ancient Babylon. Following the course of time from Abraham to the Crusaders, Ancient Coins through the Bible chronicles the history of various locations mentioned throughout the Bible and presents photographs of ancient coins minted in these cities. Though we cannot see those ancient civilizations or the way they lived, these tangible bits of the past speak abundantly about them. As you view these fragments of history, imagine you are traveling with Abraham to Canaan and Paul to Spain. Experience the biblical stories visually through the coins depicted instead of simply reading them, and better understand the lessons taught by God's Word.

## **A Continuing Experiment**

From the FOREWORD In preparing these selections from the Morte D' Arthur for use in middle and senior forms, my aim has been to preserve as faithfully as possible the flavour of the original work, and at the same time to choose those stories which have proved the most inspiring to the poets ; in witness whereof Spenser's Faerie Queene, Tennyson's Idylls of the King, Matthew Arnold's Tristram and Iseult, William Morris's Defence of Guenevere, Swinburne's Tristram of Lyonesse, and other poems may be consulted with advantage. Such a compilation will serve its purpose merely as an introduction to the Arthurian cycle of legends. A comparative study of the extracts with some of the works mentioned above will, however, do more than this. Malory's prose is inimitable. Even these fragments, in comparison with the art and beauty of poetic form, by their unconscious naivety and vigorous directness of speech and vision will reveal traces of the simple grandeur which underlies the more elemental facts of human existence, as well as something of the very nature of poetic inspiration. The selections have been made from Southey's reprint of Caxton's edition. The latter's loose arrangement into chapters has been discarded, and the subject-matter paragraphed as well as Malory's discursive style and the many necessary omissions will allow. The spelling, for obvious reasons, has been modernized, the punctuation revised, the grammar occasionally simplified. Obsolete words and phrases are explained in foot-notes. In one or two cases only, a word or phrase has been introduced or substituted, where sense or propriety seemed to require it. The limitation of space that a school-text imposes

is responsible for many and lengthy excisions, and for the exclusion of several well-known stories. Such omissions will be turned to their proper account if the reader's curiosity and interest impel him to consult a complete version for himself. I tender my thanks to Mr. Theodore Watts-Dunton for allowing me to include extracts from Swinburne's *Tristram of Lyonesse*.

## **1999 Supplement to Cases and Materials on Sexual Orientation and the Law**

In graduating from Gallaudet University, finding a job in Washington, D.C., and starting a family with her college sweetheart, Kitty Fischer tacitly abandoned the Louisiana Cajun culture that had exposed her to little more than prejudice and misery as a child. Upon discovering that she suffered from Usher syndrome (a genetic condition that causes both deafness and blindness), however, Fischer began an unlikely journey toward reclaiming her heritage. She and Cathryn Carroll tell the story of her heroic struggle and cultural odyssey in *Orchid of the Bayou: A Deaf Woman Faces Blindness*. "By this time Mama knew I was 'not right,'" Fischer says of her early childhood. "She knew the real words for 'not right,' too, though she never said those words. I was deaf and dumb." Initially Fischer's parents turned to folk healers to try and "cure" their daughter's deafness, but an aunt's fortunate discovery of the Louisiana School for the Deaf would rescue Fischer from misunderstanding and introduce her to sign language and Deaf culture. She weathered the school's experiments with oralism and soon rose to the top of her class, ultimately leaving Louisiana for the academic promise of Gallaudet. While in college, Fischer met and married her future husband, Lance, a Jewish Deaf man from Brooklyn, New York, and each landed jobs close to their alma mater. After the birth of their first child, however, Fischer could no longer ignore her increasing tunnel vision. Doctors quickly confirmed that Fischer had Usher syndrome. While Fischer struggled to come to terms with her condition, the high incidence of Usher syndrome among Cajun people led her to re-examine her cultural roots. "Could I still be me, Catherine Hoffpauir Fischer, had I not been born of a mix that codes for Usher syndrome?" she asks. "To some extent, the history of my people explains the constitution of my genes and the way my life has unfolded." Today Fischer prospers, enjoying her time with family and friends and celebrating the Deaf, Cajun, Blind, and Jewish cultures that populate her life. Her lively story will resonate with anyone who recognizes the arduous journey toward claiming an identity.

## **A Touch of Truth**

When committed agnostic Gabriel Stone's wife dies in an unlikely airline disaster, he pours himself into the writing of a story that has haunted him since his youth--a novel his devout wife had warned him never to finish. Inspired by a visit to the island of Patmos, he is fascinated with the visions beheld there by St. John The Divine while in political exile for his beliefs. Those visions included terrifying events delivered by what John described as "seven thunders," which he was instructed to withhold, to seal up and "write them not" (Revelation 10:4). As Stone becomes entrenched in his speculative interpretation of what those visions might have been, an embedded code within the Book of Revelation itself reveals startling connections to covert operations that are about to tear the world's political landscape to shreds, perhaps signaling the beginning of the prophesied end of times. As Stone's novel nears publication, he finds himself the pawn in a war between superpowers and

supernatural forces, each hoping to control the book, each driven by hidden agendas beyond Stone's comprehension. Facing choices that are at once spiritual and life-dependent, with global stakes pivoting on his ability to accept the unbelievable and stop the unthinkable, *The Seventh Thunder* is a secular thriller that stops at nothing short of our very souls hanging in the balance, while ringing frighteningly relevant to today's headlines. Winner of the 2010 Next Generation Indie Book Award for best novel in the SUSPENSE/THRILLER category.

### **Meghan's Wish**

This book is an attempt to read the poems of Gaius Valerius Catullus in his own context; to look at the poet and his works against the cultural realities of the first century BC as recent advances in historical research allow us to understand them. Catullus' own social background, the circumstances of the literary life of his time, the true extent of his works and the variety of audiences he addressed - these and other questions are explored by Professor Wiseman with new and startling results. Contemporary high society and politics are illustrated through Clodia and Caelius Rufus, considered not as mere adjuncts to Catullus' story but as significant historical personalities in their own right. A final chapter on nineteenth- and twentieth-century interpretations of Catullus' world shows how anachronistic preconceptions have prevented a proper understanding of it, and made this radical reappraisal necessary. Anyone with a serious interest in Latin literature or Roman history will want to read this book. Students in the upper levels of school or at university will find it essential background reading to their work on Catullus and Cicero's *Pro Caelio*.
