It is the time of the great elven city of Cormanthor, when the Heartlands are home to barbarians, wicked dragons rule the skies, and the elven people trust no one. Wizards and warriors alike threaten their civilization in vain, arrogant, and ignorant quests for glory. Thus it was that Elminster was guided to Cormanthor, the Towers of Song, where Eltargrim was Coronal. There he dwelt for twelve summers and more, studying with many mighty mages, learning to feel magic and know how it could be bent and directed to his will . . . . It is recorded that when the Mythal was laid, and Cormanthor became Myth Drannor, Elminster was among those who devised and spun that mighty magic.

Personnel Assessment and Selection codifies the wealth of new research surrounding employee selection (web-based assessments, social networking, globalization of organizations), situating them alongside more traditional practices to establish the best and most relevant research for both professionals and academics. Comprising chapters from authors in both the private sector and academia, this volume is organized into seven parts: (1) historical and social context of the field of assessment and selection; (2) research strategies; (3) individual difference constructs that underlie effective performance; (4) measures of predictor constructs; (5) employee performance and outcome assessment; (6) societal and organizational constraints on selection practice; and (7) implementation and sustainability of selection systems. While providing a comprehensive review of current research and practice, the purpose of this handbook is to provide an up-to-date profile of each of the areas addressed and highlight current questions that deserve additional attention from researchers and practitioners. This compendium is essential reading for industrial/organizational psychologists and human resource managers.

Slippery Jim diGriz is in the process of robbing the new Mint on Paskonjak when the heist goes terribly wrong. Threatened with a horrific death, Slippery Jim is allowed to cut a deal with the Galactic League: voyage to the planet Liokukae and bring back a missing artifact - the only known evidence of alien life-forms found in 32,000 years of galactic exploration. For diGriz there are a few catches. One is Liokukae itself - a dumping ground for the League's misfits, murderers, maniacs, and the incurably obnoxious. Another is a little matter of life and death. To ensure the utterly untrustworthy diGriz's cooperation, the League has given him a slow-acting poison, allowing him thirty days in which to succeed . . . or die. Now the Stainless Steel Rat is on his way to a world that is hurtling backward down the evolutionary scale - a land of fanatic, goat-herding Fundamentaloids, murderous Machmen, and a rusty guru named Iron John. DiGriz has developed an almost perfect cover: a four-member rock band that has a way of giving its audiences what they want to hear. But while the days tick away and diGriz's life expectancy lowers, the mission evolves from finding an artifact to liberating a planet . . . which
