Except for some excellent studies on the notion of koinonia, few works have been devoted to a revival of the entire vision of the Church around communion, a vision of ecclesiology which is rooted in the solidarity that finds its locus in Jesus Christ. Church of Churches, the fruit of several years of research, teaching, and ecumenical involvement, is intended to overcome this lack. It is not an exhaustive study but rather a point of departure for discussing how the vision of the ecclesiology of communion - the most difficult question of the ecumenical debate - can break down the barrier of misunderstanding, suspicions, and claims in which the diverse ecclesial traditions are locked.

Bioprospecting--the exchange of plants for corporate promises of royalties or community development assistance--has been lauded as a way to develop new medicines while offering southern nations and indigenous communities an incentive to preserve their rich biodiversity. But can pharmaceutical profits really advance conservation and indigenous rights? How much should companies pay and to whom? Who stands to gain and lose? The first anthropological study of the practices mobilized in the name and in the shadow of bioprospecting, this book takes us into the unexpected sites where Mexican scientists and American companies venture looking for medicinal plants and local knowledge. Cori Hayden tracks bioprospecting's contentious new promise--and the contradictory activities generated in its name. Focusing on a contract involving Mexico's National Autonomous University, Hayden examines the practices through which researchers, plant vendors, rural collectors, indigenous cooperatives, and other actors put prospecting to work. By paying unique attention to scientific research, she provides a key to understanding which people and plants are included in the promise of "selling biodiversity to save it"--and which are not. And she considers the consequences of linking scientific research and rural "enfranchisement" to the logics of intellectual property. Roving across UN protocols, botanical collecting histories, Mexican nationalist agendas, neoliberal property regimes, and North-South relations, *When Nature Goes Public* charts the myriad, emergent publics that drive and contest the global market in biodiversity and its futures.

International Encyclopedia of Education

This book gathers together leading voices in virtue theory—an increasingly influential aspect of legal theory in the 21st century—to take stock of virtue jurisprudence's evolution and suggest ways in which this approach can be further developed. The contributions address the three main axes along which virtue jurisprudence has unfolded in the past decades: the quest to provide a suitable virtue-based foundation for the law (in general) or for some aspects of it (in particular, but not exclusively, criminal law); the investigation of the role played by character traits in legal decision-making; and the investigation of how the law can be part of a virtuous life. As will become apparent for readers of this volume, those lines are converging and, as they do so, a general virtue-based approach to the study of law is starting to emerge. Crucial in addressing problems with legal experience for which the resources of traditional legal theory are insufficient, this book's investigation of virtue theory and virtue jurisprudence will be of interest to all of those studying legal decision-making and the philosophy of law, as well as those studying virtue ethics more widely. It was originally published as a special issue of *Jurisprudence*.

The landmark exploration of economic prosperity and how the world can escape from extreme poverty for the world's poorest citizens, from one of the world's most renowned economists Hailed by Time as one of the world's hundred most influential people, Jeffrey D. Sachs is renowned for his work around the globe advising economies in crisis. Now a classic of its genre, *The End of Poverty* distills more than thirty years of experience to offer a uniquely informed vision of the steps that can transform impoverished countries into prosperous ones. Marrying vivid storytelling with rigorous analysis, Sachs lays out a clear conceptual map of the world economy. Explaining his own work in Bolivia, Russia, India, China, and Africa, he offers an integrated set of solutions to the interwoven economic, political, environmental, and social problems that challenge the world's poorest countries. Ten years after its initial publication, *The End of Poverty* remains an indispensable and influential work. In this 10th anniversary edition, Sachs presents an extensive new foreword assessing the progress of the past decade, the work that remains to be done, and how each of us can help. He also looks ahead across the next fifteen years to 2030, the United Nations' target date for ending extreme poverty, offering new insights and recommendations. From the Trade Paperback edition.

Businesses and governments are currently seeking to vigorously exploit the power of ICT to improve their competitive edge. With fast changing technologies and new ICT products entering the marketing daily, business and governments are faced with the difficulty of determining systematically and strategically the best way to invest in ICT to ensure maximum returns in the wake of intense competition, and limited resources. This lecture examines current issues related to the application of ICT in business and government sectors. It highlights the real life challenges, and provides a researched methodology that can assist in evaluating ICT projects for business and government.

The Faces of Virtue in Law

A 'lost' form is a form that was once practised often by the students of a martial art, but which in time has been forgotten, and information about it lost. Taekwondo

is a relatively new martial art - being only sixty years old as of 2015. However, in that time, there are a few forms which have been forgotten. Unam is one such 'lost' form. Practised in the formative years of Taekwondo, the only evidence of it that remains today is in Choi Hong-hi's first edition Taekwondo textbook in Korean. (The form never made it into the English editions.) Now, more than fifty years after the form has been practised, B. T. Milnes has translated the section of Choi's 1959 textbook that describes the movements of the form. With this book, a supplementary text to Taekwondo Forms, find out what became of this ancient form, and why we no longer practise it. This book contains a line-by-line translation of the movements of the form, with detailed annotations as to what particular words and phrases mean, and how the terminology has changed in the decades since. The book also contains a discussion about the form, and a description of the movements using modern terminology, so that you can practise and perform the form yourself.

This book constitutes the refereed proceedings of the Turing Centenary Conference and the 8th Conference on Computability in Europe, CiE 2012, held in Cambridge, UK, in June 2012. The 53 revised papers presented together with 6 invited lectures were carefully reviewed and selected with an acceptance rate of under 29,8%. The CiE 2012 Turing Centenary Conference will be remembered as a historic event in the continuing development of the powerful explanatory role of computability across a wide spectrum of research areas. The papers presented at CiE 2012 represent the best of current research in the area, and forms a fitting tribute to the short but brilliant trajectory of Alan Mathison Turing. Both the conference series and the association promote the development of computability-related science, ranging over mathematics, computer science and applications in various natural and engineering sciences such as physics and biology, and also including the promotion of related non-scientific fields such as philosophy and history of computing.
