The purpose of this volume is to look at the developments and changes that have occurred in the area of mental workload and its assessment since the NATO symposium was held in 1979. This has been achieved by inviting prominent researchers to survey their respective areas of expertise. Examined are the current methodologies, individual differences, unanswered questions, and future directions for the mental workload issue. Particular topics discussed include the properties of workload assessment techniques, physiological measures, heart rate variability, effort and fatigue in relation to the workload experienced during normal daily routines, subjective assessment techniques, and the cognitive psychology of subjective workload. A preliminary proposal for a cohesive model of mental load is presented. A bibliographic listing of contemporary research reports completes the volume.

The Theory and Measurement of Work Commitment

Three experts in Human Resources introduce a measurement system that convincingly showcases how HR impacts business performance. Drawing from the authors' ongoing study of nearly 3,000 firms, this book describes a seven-step

process for embedding HR systems within the firm's overall strategy--what the authors describe as an HR Scorecard--and measuring its activities in terms that line managers and CEOs will find compelling. Analyzing how each element of the HR system can be designed to enhance firm performance and maximize the overall quality of human capital, this important book heralds the emergence of HR as a strategic powerhouse in today's organizations.

The second Canadian edition of Health Psychology: Biopsychosocial Interactions integrates multidisciplinary research and theory to help students understand the complex connections between psychology and health. This comprehensive yet accessible textbook covers the biopsychosocial factors that impact human health and wellness, placing particular emphasis on the distinctive characteristics of the Canadian health care system, the issues and challenges unique to Canadian culture, and the most recent Canadian research in the field of health psychology. Clear, student-friendly chapters examine topics such as coping with stress and illness, lifestyles for enhancing health and preventing illness, managing pain and discomfort, getting medical treatment, and living with chronic illness. This fully revised second edition features the latest available data and research from across Canada and around the world. New and expanded chapters explore psychosocial factors in aging and dying, legalized marijuana use in Canada, the link between inflammation and depression, Canadian psychosocial models of pain, recent Medical Assistance in Dying (MAiD) legislation, weight control, eating disorders, and exercise, and much more. Throughout the text, updated illustrative examples, cross-cultural references, and real-world cases reinforce key points and strengthen student comprehension, retention, and interest.

This book consists of nine chapters written by internationally known and respected research workers. Lennart Levi presents a psychosocial framework for understanding sickness and health in the workplace. James Campbell Quick, Debra Nelson and Jonathan Quick give an account of their research with executives in industry and the US Air Force. Tores Theorell focusses his research on the increasing demands on workers and the reducing control they have over their working lives. Johannes Siegrist is also concerned with imbalance - in this case between effort and reward at work. Susan Cartwright and Sheila Penchal report on the effects of the increase of mergers and acquisitions in the 1990's. Howard Khan's focus is the stress of working for clearing banks, merchant banks and foreign owned banks in London and New York. Sandra Fielden and Lyn Davidson present evidence of the sources of stress of women in managerial positions. Cheryl Traver's analysis of the rising costs of teacher stress is very relevant for policy makers and managers. Michiel Kompier and Tage Kristensen make recommendations for planning and implementing stress management strategies in the workplace.

Workload Transition

Human Mental Workload

IGC 2018

Persaingan dunia industri dari tahun ke tahun semakin kompetitif. Hal ini menuntut perusahaan untuk selalu beradaptasi dan berinovasi, supaya tetap survive dalam persaingan dunia usaha. Salah satu faktor penting yang harus dikelola dengan baik oleh perusahaan adalah karyawan. Karyawan bukan sekadar individu yang datang ke perusahaan untuk bekerja dan menerima gaji, tetapi karyawan adalah individu yang mewujudkan visi, misi, dan tujuan perusahaan. Oleh karena itu, sinergi antara perusahaan dan karyawan harus terbangun dengan baik. Salah satu caranya adalah menumbuhkan keterikatan kerja karyawan. Buku ini membahas berbagai penelitian tentang keterikatan kerja, meliputi faktor-faktor pembentuknya maupun dampak-dampak yang dihasilkannya. Penelitian-penelitian ini dilakukan pada berbagai setting industri, seperti aviasi, teknologi informasi, maupun media. Dengan terbitnya buku ini, kami berharap masyarakat luas (terutama praktisi dan akademisi di bidang industri dan organisasi) memperoleh gambaran menyeluruh mengenai keterikatan kerja, termasuk aplikasi untuk mengembangkan konsep keterikatan kerja dalam rutinitas perusahaan.

Workload transition is a potentially crucial problem in work situations wherein operators are faced with abrupt changes in task demands. People involved include military combat personnel, air-traffic controllers, medical personnel in emergency rooms, and long-distance drivers. They must be able to respond efficiently to sudden increases in workload imposed by a failure, crisis, or other, often unexpected, event. This book provides a systematic evaluation of workload transition. It focuses on a broad spectrum of activities ranging from team cooperation to the maintenance of this problem on a theoretical level and offers several practical solutions.

Metode Riset Kuantitatif: Teori dan Aplikasi pada Penelitian Bidang Manajemen dan Ekonomi Islam

Pemimpin merupakan orang yang mempunyai kemampuan untuk mempengaruhi sekelompok orang dalam usaha mencapai tujuan organisasi dan mengarahkan para pegawai untuk mencapai tujuan yang telah disepakati bersama. Suatu instansi dapat mencapai tujuannya jika orang-orang yang berada dalam instansi tersebut dapat bekerjasama dengan baik untuk mencapai tujuannya, oleh karena itu peran pemimpin sangat berarti dalam mendukung tercapainya tujuan tersebut. Kepemimpinan dipengaruhi oleh sifat dan perilaku yang dimiliki oleh pemimpin tersebut. Karena sifat dan perilaku seseorang tidak akan persis sama, maka gaya kepemimpinan yang diperlihatkan oleh seorang pemimpin dapat berbeda antara satu pemimpin yang satu dengan yang lainnya. Pada teori kepemimpinan situasional, terdapat empat gaya kepemimpinan yang digunakan pemimpin dalam proses pengambilan keputusan dan pemecahan masalah yaitu : gaya kepemimpinan direktif, gaya kepemimpinan konsultatif, gaya kepemimpinan partisipatif, dan gaya kepemimpinan delegatif (Thoha, 2012).

Stress in the Workplace

Housekeeping is the maintenance of a clean environment, usually in a house, but it also applies to industrial, commercial, and institutional settings. Management of a housekeeping operation entails scheduling staff, deliveries, services and maintenance, budget analysis, cost-controls and compliance with regulations. A well-run housekeeping department is integral to the success of any lodging operation. The book offers future industry professionals the tools they need to be competitive in this new era the skills to manage resources administer assets, and manage all of the technical operations of a busy housekeeping department. It demonstrates clearly how theoretical concepts apply to real-life situations.
