In this informed and enlightening book, Colin Chapman assesses the centrality of Jerusalem in the Israeli-Palestinian conflict, tracing its history through the ages and showing how the issues of the past are relevant today. Since 1967, the Israelis have controlled the city and the areas around it, creating new settlements and roads to transform its geography and demography, and provoking intense opposition from the Palestinians. The situation today appears hopeless as the conflict continues violently with Jerusalem at its centre. How, Colin Chapman asks, can the two sides reach agreement over this most holy of cities?

When most people think that “little girls should be seen and not heard,” a noisy, riotous scream can be revolutionary. But that’s not the case anymore. (Cis/Het/White) Girls aren’t supposed to be virginal, passive objects, but Poly-Styrene-like sirens who scream back in spectacularly noisy and transgressive ways as they “Lean In.” Resilience is the new, neoliberal feminine ideal: real women overcome all the objectification and silencing that impeded their foremothers. Resilience discourse incites noisy damage, like screams, so that it can be recycled for a profit. It turns the crises posed by avant-garde noise, feminist critique, and black aesthetics into opportunities for strengthening the vitality of multi-racial white supremacist patriarchy (MRWaSP). Gaga, Beyonce, Calvin Harris – with and against political philosophers like Michel Foucault, feminists like Patricia Hill Collins, and media theorists like Steven Shaviro, */Resilience & Melancholy/* shows how resilience discourse manifests in both pop music and in feminist politics. In particular, it argues that resilient femininity is a post-feminist strategy for producing post-race white supremacy. Resilience discourse allows women to “Lean In” to MRWaSP privilege because their overcoming and leaning-in actively produce blackness as exception, as pathology, as death. The book also considers alternatives to resilience found in the work of Beyonce, Rihanna, and Atari Teenage Riot. Updating Freud, James calls these pathological, diseased iterations of resilience “melancholy.” Melancholy makes resilience unprofitable, that is, incapable of generating enough surplus value to keep MRWaSP capitalism healthy. Investing in the things that resilience discourse renders exceptional, melancholic siren songs like Rihanna’s “Diamonds” steer us off course, away from resilient “life” and into the death.

George Forsdike ran a nursery garden at Shrublands, Suffolk for nearly 50 years, specialising in chrysanthemums and other cut flowers that he sent to Covent Garden to sell. Shrublands changed from a country manor house to a health farm, where many famous people came to rest and recuperate. George tells of his life, working quietly on the four acres of his garden, together with his wife Claire.

There is an increasing trend within both the study of visual culture and fashion itself to restore fashion to an aesthetic role - one that moves beyond its commercial success as a global industry and places fashion within a nexus of art, the body, and femininity. This emphasis aims to separate fashion from mere clothing, and illustrate its cultural power as an integral aspect of modern life. In this innovative new book, Alison Bancroft re-examines significant moments in twentieth-century fashion history through the focal lens of psychoanalytic theory. Her discussion centres on studies of fashion photography, haute couture, queer dressing, and fashion/art in an attempt to shed new light on these key issues. According to Bancroft, problems of subjectivity are played out through fashion, in the public arena, and not just in the dark, unknowable unconscious mind. The question of what can be said, and what can only be experienced, and how these two issues may be reconciled, become questions that fashion addresses on an almost daily basis. Psychoanalysis has been profoundly influential in the arts, thanks to its capacity to add layers of meaning to things that, without it, would remain obtuse and intractable. It has proved crucial to the development of film studies, art theory and literary criticism. What it has not yet been brought into dialogue with in great depth is fashion. By interpreting fashion within a psychoanalytic frame, Bancroft illustrates how fashion articulates some of the essential, and sometimes frightening, truths about the body, femininity and the self.

Our Musicals, Ourselves is the first full-scale social history of the American musical theater from the imported Gilbert and Sullivan comic operas of the late nineteenth century to such recent musicals as The Producers and Urinetown. While many aficionados of the Broadway musical associate it with wonderful, diversionary shows like The Music Man or My Fair Lady, John Bush Jones instead selects musicals for their social relevance and the extent to which they engage, directly or metaphorically, contemporary politics and culture. Organized chronologically, with some liberties taken to keep together similarly themed musicals, Jones examines dozens of Broadway shows from the beginning of the twentieth century to the present that demonstrate numerous links between what played on Broadway and what played on newspapers' front pages across our nation. He reviews the productions, lyrics, staging, and casts from the lesser-known early musicals (the "Gunboat" musicals of the Teddy Roosevelt era and the "Cinderella shows" and "leisure time musicals" of the 1920s) and continues his analysis with better-known shows including Showboat, Porgy and Bess, Oklahoma, South Pacific, West Side Story, Cabaret, Hair, Company, A Chorus Line, and many others. While most examinations of the American musical focus on specific shows or emphasize the development of the musical as an art form, Jones's book uses musicals as a way of illuminating broader social and cultural themes of the times. With six appendixes detailing the long-running diversionary musicals and a foreword by

The increasingly popular idea that cinematic fictions can 'do' philosophy raises some difficult questions. Who is actually doing the philosophizing? Is it the philosophical commentator who reads general arguments or theories into the stories conveyed by a film? Could it be the film-maker, or a group of collaborating film-makers, who raise and try to answer philosophical questions with a film? Is there something about the experience of films that is especially suited to the stimulation of worthwhile philosophical reflections? In the first part of this book, Paisley Livingston surveys positions and arguments surrounding the cinema's philosophical value. He raises criticisms of bold theses in this area and defends a

moderate view of film's possible contributions to philosophy. In the second part of the book he defends an intentionalist approach that focuses on the film-makers' philosophical background assumptions, sources, and aims. Livingston outlines intentionalist interpretative principles as well as an account of authorship in cinema. The third part of the book exemplifies this intentionalist approach with reference to the work of Ingmar Bergman. Livingston explores the connection between Bergman's work and the Swedish director's primary philosophical source—a treatise in philosophical psychology authored by the Finnish philosopher, Eino Kaila. Bergman proclaimed that reading this book was a tremendous philosophical experience for him and that he 'built on this ground'. With reference to materials in the newly created Ingmar Bergman archive, Livingston shows how Bergman took up Kaila's topics in his cinematic explorations of motivated irrationality, inauthenticity, and the problem of self-knowledge.

Half a millennium of European warfare brilliantly retold by masterly historian Brendan Simms At the heart of Europe's history lies a puzzle. In most of the world humankind has created enormous political frameworks, whether ancient (such as China) or modern (such as the United States). Sprawling empires, kingdoms or republics appear to be the norm. By contrast Europe has remained stubbornly chaotic and fractured into often amazingly tiny pieces, with each serious attempt to unify the continent (by Charles V, Napoleon and Hitler) thwarted. In this marvelously ambitious and exciting new book, Brendan Simms tells the story of Europe's constantly shifting geopolitics and the peculiar circumstances that have made it both so impossible to dominate, but also so dynamic and ferocious. It is the story of a group of highly competitive and mutually suspicious dynasties, but also of a continent uniquely prone to interference from 'semi-detached' elements, such as Russia, the Ottoman Empire, Britain and (just as centrally to Simms' argument) the United States. Europe: The Struggle for Supremacy will become the standard work on this crucial subject - and an extremely enjoyable one. Reviews: 'This is a brilliant and beautifully written history. the Euro, Brendan Simms shows that one of the constant preoccupations of Europeans has always been the geography, the power and the needs of Germany. Europe is a work of extraordinary scholarship delivered with the lightest of touches. It will be essential, absorbing reading for anyone trying to understand both the past and the present of one of the most productive and most dangerous continents on earth' William Shawcross 'World history is German history, and German history is world history. This is the powerful case made by this gifted historian of Europe, whose expansive erudition revives the proud tradition of the history of geopolitics, and whose immanent moral sensibility reminds us that human choices made in Berlin (and London) today about the future of Europe might be decisive for the future of the world' Timothy Snyder (author of Bloodlands) About the author: Brendan Simms is Professor of the History of International Relations at the University of Cambridge. His major books include Unfinest Hour: Britain and the Destruction of Bosnia (shortlisted for the Samuel Johnson Prize) and Three Victories and a Defeat: The Rise and Fall of the First British Empire.

center of the political storm over the multi-billion dollar ecological “restoration” of the Everglades. *Raising Cane in the 'Glades* is the first study to situate the environmental transformation of the Everglades within the economic and historical geography of global sugar production and trade. Using, among other sources, interviews, government and corporate documents, and recently declassified U.S. State Department memoranda, Gail M. Hollander demonstrates that the development of Florida’s sugar region was the outcome of pitched battles reaching the highest political offices in the U.S. and in countries around the world, especially Cuba—which emerges in her narrative as a model, a competitor, and the regional “other” to Florida’s “self.” Spanning the period from the age of empire to the era of globalization, the book shows how the “sugar question”—a label nineteenth-century economists coined for intense international debates on sugar production and trade—emerges repeatedly in new guises. Hollander uses the sugar question as a thread to stitch together past and present, local and global, in explaining Everglades transformation.

Greg is a middle school teacher with the Teach for America program and a volunteer as a Court Appointed Special Advocate (CASA) for foster children, where his client is Tanya's twin brother Shawn. At first, the only thing connecting him to Tanya's death is the fact that they shared a meal earlier that night. But soon enough, elements of that story seem to fall apart and lawyer Dismas Hardy's daughter Rebecca finds herself drawn into the defense of young man who is perhaps not all that he had originally appeared to be. With signature suspense and intricate plotting, John Lescroart's newest novel puts Dismas and his only daughter in the middle of one of his most complex and thrilling cases yet.

Landmark court cases in the history of formal U.S. relations with Indian tribes are Corn Tassel, Standing Bear, Crow Dog, and Lone Wolf. Each exemplifies a problem or a process as the United States defined and codified its politics toward Indians. The importance of the Lone Wolf case of 1903 resides in its enunciation of the "plenary power" doctrine that the United States could unilaterally act in violation of its own treaties and that Congress could dispose of land recognized by treaty as belonging to individual tribes. In 1892 the Kiowas and related Comanche and Plains

Apache groups were pressured into agreeing to divide their land into allotments under the terms of the Dawes Act of 1887. Lone Wolf, a Kiowa band leader, sued to halt the land division, citing the treaties signed with the United States immediately after the Civil War. In 1902 the case reached the Supreme Court, which found that Congress could overturn the treaties through the doctrine of plenary power. As he recounts the Lone Wolf case, Clark reaches beyond the legal decision to describe the Kiowa tribe itself and its struggles to cope with Euro-American pressure on its society, attitudes, culture, economic system, and land base. The story of the case therefore also becomes the history of the tribe in the late nineteenth century. The Lone Wolf case also necessarily becomes a study of the Dawes Allotment Act of 1887 in operation; under the terms of the Dawes Act and successor legislation, almost two-thirds of Indian lands passed out of their hands within a generation. Understanding how this happened in the case of the Kiowa permits a nuanced view of the well-intentioned but ultimately disastrous allotment effort.

Sinatra: Up and Running

Australian High Country Raptors covers raptor species that regularly breed in the high country above 600 metres, from Goulburn in New South Wales down to the hills outside Melbourne, Victoria. Author Jerry Olsen explores the nature of these striking animals that are classified as Accipitriformes (diurnal hawks, falcons, kites and eagles), Falconiformes and Strigiformes (nocturnal owls). Comparisons between these high country raptors and lower-elevation breeders are also provided, in addition to comparisons with raptors found overseas, especially from North America and Europe. The book begins with a description of habitats and vegetation types in the high country, and which raptors are likely to be seen in each habitat type. It continues with sections on finding and watching raptors, raptor identification, hunting styles, food, breeding and behaviour, and conservation. Appendices provide species accounts for diurnal breeding species in the high country, with basic information about their ecology, distribution and conservation, as well as detailed instructions about handling an injured or orphaned raptor. Illustrated throughout with photographs and drawings, Australian High Country Raptors offers readers a chance to look into the lives of Australia's fascinating birds of prey.

Poor fills in where the other books leave off. Issues of analyzing poverty and low earnings in the developing world are quite different from those in the developed world. The discourse in the developed world is about incentive effects of social welfare programs, cultures of poverty, single-parenthood, homelessness, drug and alcohol abuse, ill health, mental illness, domestic violence, and the like. But in the developing world, different issues predominate, such as own-account work and household enterprises, agricultural work, casual employment, and informal work. And some of the policy issues--stimulating economic growth, harnessing the energies of the private sector, increasing paid employment, and raising the returns to self-employment--take a different twist. This book shows how people in poverty work, what has been effective in helping the poor earn their way out of poverty, and how readers might help.

Exploring Anatomy & Physiology in the Laboratory

Beavers are the great comeback story—a keystone species that survived ice ages, major droughts, the fur trade, urbanization and near extinction. Their ability to create and maintain aquatic habitats has endeared them to conservationists, but puts the beavers at odds with urban and industrial expansion. These conflicts reflect a dichotomy within our national identity. We place environment and our concept of wilderness as a key touchstone for promotion and celebration, while devoting significant financial and personal resources to combating "the beaver problem." We need to rethink our approach to environmental conflict in general, and our approach to species-specific conflicts in particular. Our history often celebrates our integration of environment into our identity, but our actions often reveal an exploitation of environment and celebration of its subjugation. Why the conflict with the beaver? It is one of the few species that refuses to play by our rules and continues to modify environments to meet its own needs and the betterment of so many other species, while at the same time showing humans that complete dominion over nature is not necessarily achievable.
