The Federal Aviation Administration (FAA) administers oral as well as written exams for pilot certification and flight review. These exam guides teach applicants not only what to expect, but also how to exhibit subject mastery and confidence

under scrutiny. In this series, the most consistent questions asked in each exam are provided in a question-and-answer format, with information sources for further study. Applicants facing the oral exams will benefit from the topics discussed and the further study materials provided, which have been updated to reflect important FAA regulatory, procedural, and training changes, including fundamentals of instruction, technical subject areas, an appendix with the latest version of the FAA's advisory circular 61-65, and a new chapter on emergency operations.

founded as the Taylor Brothers Aircraft Manufacturing Company in September 1927 by Clarence Gilbert Taylor and Gordon A. Taylor in Rochester, New York. The company was renamed Taylor Brothers Aircraft Corporation in April 1928, shortly before Gordon Taylor died in a plane crash on April 24, 1928. The company was enticed to move to Bradford, Pennsylvania with the promise of larger facility and investment capital from local businessmen, including an initial investment of \$400 from local oilman William T. Piper.
