This guide will help readers have an in-depth understanding of autism, and provide a plan for parents to raise happy, healthy children. All children can flourish and mature through love.

Programming for Children and Teens with Autism Spectrum Disorder

Finalist for the 2017 Pulitzer Prize in General Nonfiction
An extraordinary narrative history of autism: the riveting story of parents fighting for their children's civil rights; of doctors struggling to define autism; of ingenuity, self-advocacy, and profound social change
Nearly seventy-five years ago, Donald Triplett of Forest, Mississippi, became the first child diagnosed with autism. Beginning with his family's odyssey, *In a Different Key* tells the extraordinary story of this often misunderstood condition, and of the civil rights battles waged by the families of those who have it. Unfolding over decades, it is a beautifully rendered history of ordinary people determined to secure a place in the world for those with autism—by liberating children from dank institutions, campaigning for their right to go to school, challenging expert opinion on what it means to have autism, and persuading society to accept those who are different. It is the story of women like Ruth Sullivan, who rebelled against a medical establishment that blamed cold and rejecting “refrigerator mothers” for causing autism; and

of fathers who pushed scientists to dig harder for treatments. Many others played starring roles too: doctors like Leo Kanner, who pioneered our understanding of autism; lawyers like Tom Gilhool, who took the families' battle for education to the courtroom; scientists who sparred over how to treat autism; and those with autism, like Temple Grandin, Alex Plank, and Ari Ne'eman, who explained their inner worlds and championed the philosophy of neurodiversity. This is also a story of fierce controversies—from the question of whether there is truly an autism “epidemic,” and whether vaccines played a part in it; to scandals involving “facilitated communication,” one of many treatments that have proved to be blind alleys; to stark disagreements about whether scientists should pursue a cure for autism. There are dark turns too: we learn about experimenters feeding LSD to children with autism, or shocking them with electricity to change their behavior; and the authors reveal compelling evidence that Hans Asperger, discoverer of the syndrome named after him, participated in the Nazi program that consigned disabled children to death. By turns intimate and panoramic, *In a Different Key* takes us on a journey from an era when families were shamed and children were condemned to institutions to one in which a cadre of people with autism push not simply for inclusion, but for a new understanding of autism: as difference rather than disability.

Teaching Students with Autism Spectrum Disorders

A Regular Guy

What You Can Do Right Now to Help Your Child with Autism gives you the best techniques you can do? right now? to work with your child and draw him or her back into our interactive world.

Art Therapy with Children on the Autistic Spectrum

Presents an illustrated book with exercises for increasing social and communication skills for children with a diagnosis of autism. On board pages.

Autism and Loss

‘He’ll grow out of it,’ my friends told me. ‘He’s so intelligent,’ my family said. ‘Your parents are mathematicians,’ people reminded me. ‘What did you expect?’ What did I expect? We expect many things of our children. Most of the time we are only aware of these expectations when something happens to make it impossible for them to be fulfilled. When Ben is a baby, Rachel puts his behavioural quirks down to eccentricity. He likes to count letterboxes; he hates to get his hands dirty; loud noises make him anxious. But as Ben grows and his quirks become more pronounced, it becomes clear there is

Where To Download Reaching The Child With Autism Through Art

something else going on. When he is diagnosed with autism, Rachel must reconsider everything she thought she knew about parenting, about Ben, and about how best to mother him. *Reaching One Thousand* charts her quest to understand autism and to build a new kind of relationship with her son. Exquisitely written, this is a thought-provoking reflection on family and understanding and a tender love letter from a mother to her son. Shortlisted for the 2013 National Biography Award. "This is the best kind of memoir – there is a beautiful calm clarity that drew me in, and held me until the end." – Georgia Blain "Deeply touching but never sentimental, this remarkable book is more than a story of one boy and his mother. It's a thoughtful meditation on the intricate workings of the human mind and heart." – Toni Jordan 'A memoir to remember and share.' - Courier Mail 'Rewarding on many levels, this is an exceptional book.' - West Australian "A deeply enriching book about being human" – The Age Rachel Robertson lectures in professional writing and publishing at Curtin University. Her fiction and essays have been published in *The Best Australian Essays*, *Australian Book Review*, *Griffith Review* and *Island*. Her essay 'Reaching One Thousand' was joint winner of the 2008 Calibre Prize.

Autism

Create an appropriate learning environment to help children with ASD develop lifelong independence!

Spectacular Bond

A collection of personal stories, knowledgeable explanations, and supportive advice written by a fourteen-year-old autistic boy to help provide readers with the confidence and tools necessary to befriend autistic kids.

101 Tips for Parents of Children with Autism

Shortlisted for the 2019 Mark Lynton History Prize A groundbreaking exploration of the chilling history behind an increasingly common diagnosis. Hans Asperger, the pioneer of autism and Asperger syndrome in Nazi Vienna, has been celebrated for his passionate defense of children with disabilities. But in this groundbreaking book, prize-winning historian Edith Sheffer exposes that Asperger was not only involved in the racial policies of Hitler's Third Reich, he was complicit in the murder of children. As the Nazi regime slaughtered millions across Europe during World War Two, it sorted people according to race, religion, behavior, and physical condition for either treatment or elimination. Nazi psychiatrists targeted children with different kinds of minds—especially those thought to lack social skills—claiming the Reich had no place for them. Asperger and his colleagues endeavored to mold certain "autistic" children into productive citizens, while transferring others they deemed untreatable to Spiegelgrund, one of the Reich's deadliest child-killing centers. In the first comprehensive history of the links between autism and Nazism, Sheffer uncovers how a diagnosis common today emerged

Where To Download Reaching The Child With Autism Through Art

from the atrocities of the Third Reich. With vivid storytelling and wide-ranging research, Asperger's Children will move readers to rethink how societies assess, label, and treat those diagnosed with disabilities.

Decoding Autism and Leading the Way to Successful Inclusion

Do you need help dealing with your child's tantrums, inappropriate behavior or communication issues? Then this is the book you've been waiting for. Based on the principles of the Miller Method, this book is filled with effective tips for solving behavioral issues promptly in day-to-day situations. Miller's insights, compiled here and expanded upon by Theresa Smith, are based on an understanding of the cognitive and sensory needs of children with autism and how this can underlie certain disordered behaviors. This practical how-to guide will help you to identify causes of distress, foster friendships, increase focus, toilet train, stop tantrums and handle inappropriate conduct. This will provide essential daily support to parents, families, carers and teachers of pre-adolescent children on the autism spectrum. The book is targeted toward the most affected ASD children.

How to Talk to an Autistic Kid

Now an award winning motion picture! Imagine being trapped inside a Disney movie and having to learn about life mostly from animated characters dancing across a screen of color. A fantasy? A nightmare? This is the real-life story of Owen Suskind, the son of the Pulitzer Prize-winning journalist Ron Suskind and his wife, Cornelia. An autistic boy who couldn't speak for years, Owen memorized dozens of Disney movies, turned them into a language to express love and loss, kinship, brotherhood. The family was forced to become animated characters, communicating with him in Disney dialogue and song; until they all emerge, together, revealing how, in darkness, we all literally need stories to survive. This edition has been updated with additional material from the Suskind family.

A Parent's Guide to Autism

The Director of Global Education for the Autism Treatment Center of America, who as a child was diagnosed by multiple experts as severely autistic and possessing an IQ below 30, outlines his parents' controversial program that enabled his recovery, subsequent education and successful career. 40,000 first printing.

Motivate to Communicate!

Tells the story of Matthew, an autistic boy, through his mother's eyes, including how his behavior can bring out the best and

worst in people and the ways in which he inspires others with his desire to be a "regular guy."

Reaching the Autistic Child

Designed by faculty from Columbia University, Spectacular Bond is a home-centered parent-led behavioral intervention program developed for children between the ages of two and six with autism. This book not only discusses how to implement this program, but also offers insight from Susan Deland, who used this program with her daughter.

Reaching and Teaching the Child with Autism Spectrum Disorder

Voted "Teacher of the Year" by The Autism Society of America, Toni Flowers has more than twenty years of experience teaching individuals with autism. She believes all children benefit from art because it encourages creativity. As a result, children with autism may find a form of expression when they've been handicapped by delayed and/or disturbed language skills and/or abnormal sensory responses. Reaching the Child with Autism through Art offers teachers and parents specific tools and "plans" in four mediums: collage, painting, play and sculpture.

Infinite Jest

Presents three hundred games and play therapy activities for children with autism, covering ways to use food, toys, social and outside games, and other techniques for motivation and engagement.

Reaching Out, Joining in

More students on the autism spectrum are taught in general education settings today than ever before, bringing an array of notable strengths and skills that add intriguing new dimensions to educational programs. But these students also present challenges that are broader, deeper, and more intractable than those of their typically developing peers. Because reaching and teaching students on the autism spectrum in an inclusive environment complicates the work of teachers, school and district administrators must be prepared to provide knowledgeable, mindful leadership. With warmth and wisdom informed by her experience as a school administrator, autism educator, clinician, and parent of a son on the spectrum, Barbara Boroson provides a holistic look at the challenges students on the spectrum face in the areas of anxiety, executive function, sensation, communication, socialization, engagement, and cognitive acquisition. You'll learn to decode the functional and behavioral manifestations of these challenges, and you'll gain practical and research-based preemptive, supportive, and responsive strategies. You will also find - Insight into the perspectives of parents and guardians, along with guidance on

Where To Download Reaching The Child With Autism Through Art

partnering with them in ways that acknowledge both their expertise and yours. - Tips for modeling transparency and creative differentiation in order to set an inclusive tone throughout your school or district. - Supplemental materials to help you engage and educate families and the entire school community about autism, inclusion, and best-practice policies. Decoding Autism and Leading the Way to Successful Inclusion empowers school and district leaders to ensure that students on the spectrum are welcome, supported, understood, and set up for success. It's an essential resource for any education leader committed to achieving a differentiated, equitable, and inclusive learning environment for all students in their care.

Reaching and Teaching the Child with Autism Spectrum Disorder

People with autism often experience difficulty in understanding and expressing their emotions and react to losses in different ways or in ways that carers do not understand. In order to provide effective support, carers need to have the understanding, the skills and appropriate resources to work through these emotional reactions with them. Autism and Loss is a complete resource that covers a variety of kinds of loss, including bereavement, loss of friends or staff, loss of home or possessions and loss of health. Rooted in the latest research on loss and autism, yet written in an accessible style, the resource includes a wealth of factsheets and practical tools that provide formal and informal carers with authoritative, tried and tested guidance. This is an essential resource for professional and informal carers working with people with autism who are coping with any kind of loss.

Asperger's Children: The Origins of Autism in Nazi Vienna

Voted "Teacher of the Year" by ASA, Toni Flowers invites readers to learn from, tweak, and refine the strategies she's used during her quarter-century of teaching children with autism. Chock-full of great ideas, this book tackles some of the thorniest problems (runners, homework, screamers, setting limits, aggression, etc.) facing teachers and parents. It will quickly become a go-to book in your library! Helpful chapters include: Challenges and Expectations: The Child with Autism Can Learn So Many Words? So Little Time: Change Your Way of Communicating I Never Met a Person with Autism I Didn't Like: The Importance of Teacher/Student Bonding The Classroom: Designing a Place to Learn Schedules: Making Sense of the Day The Fine Art of Cueing To Self-Stim? Or Not to Self-Stim School and Beyond: Homework Activities: The Daily Grind

Collaborative Model for Promoting Competence and Success for Students with ASD

This engaging, informative book now in its second edition provides both the knowledge you need to understand students with Autism Spectrum Disorder (ASD) and the strategies you need to help them learn."

Right from the Start

The ideal graduation gift for anyone about to enter the workforce, a witty, practical guide to 200 difficult professional conversations—featuring all-new advice from the creator of the popular website Ask a Manager and New York’s work-advice columnist. There’s a reason Alison Green has been called “the Dear Abby of the work world.” Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don’t know what to say. Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You’ll learn what to say when • coworkers push their work on you—then take credit for it • you accidentally trash-talk someone in an email then hit “reply all” • you’re being micromanaged—or not being managed at all • you catch a colleague in a lie • your boss seems unhappy with your work • your cubemate’s loud speakerphone is making you homicidal • you got drunk at the holiday party Advance praise for Ask a Manager “A must-read for anyone who works . . . [Alison Green’s] advice boils down to the idea that you should be professional (even when others are not) and that communicating in a straightforward manner with candor and kindness will get you far, no matter where you work.”—Booklist (starred review) “I am a huge fan of Alison Green’s Ask a Manager column. This book is even better. It teaches us how to deal with many of the most vexing big and little problems in our workplaces—and to do so with grace, confidence, and a sense of humor.”—Robert Sutton, Stanford professor and author of The No Asshole Rule and The Asshole Survival Guide “Clear and concise in its advice and expansive in its scope, Ask a Manager is the book I wish I’d had in my desk drawer when I was starting out (or even, let’s be honest, fifteen years in).”—Sarah Knight, New York Times bestselling author of The Life-Changing Magic of Not Giving a F*ck

Art as an Early Intervention Tool for Children with Autism

Rising numbers of young children diagnosed with autism spectrum disorders means more students with ASD entering pre-school and the elementary grades. For these young learners, individualized instruction toward measurable goals is crucial to effective education. The COMPASS program—Collaborative Model for Promoting Competence and Success for Students with Autism Spectrum Disorders—has been developed to improve outcomes for these students in the unique context of their lives. Collaborative Model for Promoting Competence and Success for Students with ASD builds consulting and ASD knowledge competencies while working with families and teachers in a systematic, empirically supported consultation program. The book offers a framework for individualized assessment and program planning based in students’ life experiences along with family and teacher input. At the same time, its two-tiered consultation/coaching strategy is designed to minimize the setbacks that occur even in optimal family and classroom situations. Protocols, scripts, forms, and case examples are included for a complete guide to facilitating successful learning. Featured in the text: Theory and rationale behind COMPASS. Self-evaluation tools for assessing core skills and competencies. Guidelines for writing effective

Where To Download Reaching The Child With Autism Through Art

Individual Education Programs and the COMPASS Action Plan. Detailed instructions for implementing Action Plans and monitoring progress. Case studies of the COMPASS program in real-life situations. A complete kit of forms, scales, and checklists. Practitioners working with children with ASD, particularly in child and school psychology, special education, rehabilitation, social work, speech pathology, and developmental psychology, will find in Collaborative Model for Promoting Competence and Success for Students with ASD a consultation model that empowers teachers, families, and above all, students.

Reaching One Thousand

WINNER OF THE EDGAR AWARD FOR BEST FIRST NOVEL The “gripping page-turner” (Time) hitting all the best of summer reading lists, *Miracle Creek* is perfect for book clubs and fans of Liane Moriarty and Celeste Ng How far will you go to protect your family? Will you keep their secrets? Ignore their lies? In a small town in Virginia, a group of people know each other because they’re part of a special treatment center, a hyperbaric chamber that may cure a range of conditions from infertility to autism. But then the chamber explodes, two people die, and it’s clear the explosion wasn’t an accident. A powerful showdown unfolds as the story moves across characters who are all maybe keeping secrets, hiding betrayals. Chapter by chapter, we shift alliances and gather evidence: Was it the careless mother of a patient? Was it the owners, hoping to cash in on a big insurance payment and send their daughter to college? Could it have been a protester, trying to prove the treatment isn’t safe? “A stunning debut about parents, children and the unwavering hope of a better life, even when all hope seems lost” (Washington Post), *Miracle Creek* uncovers the worst prejudice and best intentions, tense rivalries and the challenges of parenting a child with special needs. It’s “a quick-paced murder mystery that plumbs the power and perils of community” (O Magazine) as it carefully pieces together the tense atmosphere of a courtroom drama and the complexities of life as an immigrant family. Drawing on the author’s own experiences as a Korean-American, former trial lawyer, and mother of a “miracle submarine” patient, this is a novel steeped in suspense and igniting discussion. Recommended by Erin Morgenstern, Jean Kwok, Jennifer Weiner, Scott Turow, Laura Lippman, and more-- *Miracle Creek* is a brave, moving debut from an unforgettable new voice.

Understanding Students with Autism Through Art

This book provides a positive approach to understanding and educating children on the autism spectrum. The book gives greater insight into the perspective and behavior of a child with autism and explores how the child's learning preferences, strengths and interests can be used to facilitate learning and enhance motivation.

Reaching the Child with Autism Through Art

Where To Download Reaching The Child With Autism Through Art

A gargantuan, mind-altering comedy about the Pursuit of Happiness in America set in an addicts' halfway house and a tennis academy, and featuring the most endearingly screwed-up family to come along in recent fiction, *Infinite Jest* explores essential questions about what entertainment is and why it has come to so dominate our lives; about how our desire for entertainment affects our need to connect with other people; and about what the pleasures we choose say about who we are. Equal parts philosophical quest and screwball comedy, *Infinite Jest* bends every rule of fiction without sacrificing for a moment its own entertainment value. It is an exuberant, uniquely American exploration of the passions that make us human - and one of those rare books that renew the idea of what a novel can do.

The Autism Revolution

Art Therapy with Children on the Autistic Spectrum presents a new model of practice, which primarily focuses on communication difficulties. The authors describe how negative behaviours and subsequent tension may be alleviated when the autistic child is involved in interactive art making with the therapist.

Creative Therapy

This book provides a positive approach to understanding and educating children on the autism spectrum. The book gives greater insight into the perspective and behavior of a child with autism and explores how the child's learning preferences, strengths and interests can be used to facilitate learning and enhance motivation.

What Color is Monday?

This book opens with a discussion of neurodiversity and an elaboration of the diagnosis of autism. It then examines factors correlating with autism, including sex bias, month of birth, migration and impact of infant feeding. The next section is on the impact of autism. The neurobiology and genetic section deals with epigenetics and intracellular pathways associated with etiology. The development and behaviour section deals with proprioceptive profiles and joint attention in autism. The final section focuses on interventions including mindfulness, animal assisted activity, social/cultural perspective on autism intervention and physical activity. The book is relevant to all professionals and researchers working with persons with autism, including psychiatrists/psychologists, speech and language therapists, occupational therapists, teachers, nurses and care workers.

The Color of Autism

Where To Download Reaching The Child With Autism Through Art

One of the most important yet difficult skills for children with autism to learn is effective social interaction. This book introduces social skills programs to parents of preschool- and kindergarten-aged children diagnosed with one of the Pervasive Developmental Disorders (PDD), including Autistic Disorder, Asperger's Disorder, and PDD: Not Otherwise Specified. The book is based on the authors' decades of clinical experience using Applied Behavior Analysis (ABA), a proven educational method, to teach social skills at home and school. This book focuses on four broad topics: play skills; the language of social skills; understanding another person's perspective; functioning in an inclusive classroom. This book helps parents to work with their child's strengths to improve social skills. Following the suggestions and exercises in this book, parents can teach children to: pretend-play, use toys appropriately, know when to use conventional responses like -- excuse me -- tell jokes, recognise that others' feelings and thoughts are different from their own, and initiate social interaction with peers. Included are tips for using games, modelling, rewards, role play, videos, activity schedules, and social stories to teach social skills and make the learning experience fun for parents and children. A case study of one family's efforts and successes provides a real-life example that's informative and reassuring. Appendices listing resources such as books, games, and activities give parents additional material to explore.

What You Can Do Right Now to Help Your Child with Autism

Every parent, teacher, social worker, therapist, and physician should have this succinct and informative book in their back pocket. Framed with both humor and compassion, the book defines the top ten characteristics that illuminate the minds and hearts of children with autism.

Ask a Manager

Symptoms of autism--including uncooperativeness, inattention, and bizarre, self-destructive behavior--place tremendous strain on families. The proven program presented here offers parents an effective alternative to institutionalization. Detailed case studies demonstrate how parents can teach autistic children to interact in socially acceptable ways.

Teaching Social Communication to Children with Autism and Other Developmental Delays, Second Edition

For young children with autism spectrum disorder (ASD) and others who have challenges in interacting and communicating, early intervention is key--and parents can play a vital role. Developed through work with hundreds of families, this book presents engaging, evidence-based techniques for enriching your child's social communication skills (up to age 6). The strategies can be easily integrated into daily routines, such as meals, bathtime, bedtime, and playtime. Designed for use as

part of a therapist-guided program, the manual has a convenient large-size format and includes 20 reproducible forms. You also get access to a companion website, where you can download and print the forms for repeated use and view video clips of parents using the techniques. Professionals who want to implement Project ImPACT should purchase the authors' two-book set (ISBN 978-1-4625-3814-0), which includes this manual plus a coach's guide. New to This Edition *Reflects the latest research and the ongoing development of the authors' approach. *Even more user friendly; skills parents need to learn are simplified and streamlined. *Chapter on managing challenging behavior. *Numerous graphics to help you remember and use the strategies. *Appropriate for a broader range of children, including those without an ASD diagnosis.

Miracle Creek

There are families with ASD in every community, and with a very little effort they may well become your most loyal and ardent supporters. Discover how to start programming services to the real children and teens behind the statistics.

Autism Breakthrough

Autism is a word most of us are familiar with. But do we really know what it means? Children with autism are challenged by the most essential human behaviors. They have difficulty interacting with other people—often failing to see people as people rather than simply objects in their environment. They cannot easily communicate ideas and feelings, have great trouble imagining what others think or feel, and in some cases spend their lives speechless. They frequently find it hard to make friends or even bond with family members. Their behavior can seem bizarre. Education is the primary form of treatment for this mysterious condition. This means that we place important responsibilities on schools, teachers and children's parents, as well as the other professionals who work with children with autism. With the passage of the Individuals with Disabilities Education Act of 1975, we accepted responsibility for educating children who face special challenges like autism. While we have since amassed a substantial body of research, researchers have not adequately communicated with one another, and their findings have not been integrated into a proven curriculum. *Educating Children with Autism* outlines an interdisciplinary approach to education for children with autism. The committee explores what makes education effective for the child with autism and identifies specific characteristics of programs that work. Recommendations are offered for choosing educational content and strategies, introducing interaction with other children, and other key areas. This book examines some fundamental issues, including: How children's specific diagnoses should affect educational assessment and planning How we can support the families of children with autism Features of effective instructional and comprehensive programs and strategies How we can better prepare teachers, school staffs, professionals, and parents to educate children with autism What policies at the federal, state, and local levels will best ensure appropriate education, examining strategies and resources needed to address the rights of children with autism to appropriate education. Children with autism present

educators with one of their most difficult challenges. Through a comprehensive examination of the scientific knowledge underlying educational practices, programs, and strategies, *Educating Children with Autism* presents valuable information for parents, administrators, advocates, researchers, and policy makers.

Autism Spectrum Disorder in the Inclusive Classroom, Grades K-8

The early years are the most critical period of learning for a child with autism. Therapeutic art-making can be a useful tool to tap into their imaginations and help them to express their thoughts and feelings. *Art as an Early Intervention Tool for Children with Autism* includes practical advice on helping a child move beyond scribbling, organizing the child's environment for maximum comfort and relaxation, and providing physical and sensory support. This book is packed with tips and suggestions for how to provide art therapy for children with autism — covering topics such as the basic materials required, safety issues, how to set up a workspace, and ideas for managing difficult behavior. The author writes from a professional and personal perspective — Nicole Martin is a qualified art therapist specializing in working with children with autism, and she also has a brother with autism. Perfect for busy parents and as a practical reference for professionals such as psychologists, teachers, occupational therapists, sensory integration therapists and anyone working with a child on the autism spectrum.

Teaching Children with Autism and Related Spectrum Disorders

The revised and updated edition of the guide for parents of children with autism on what to look for in an Early Intensive Behavioral Intervention Program (EIBI). EIBI is a highly effective instructional program based on Applied Behavior Analysis (ABA). This edition covers new information on the latest research about the benefits of EIBI, the types of teaching methods, the professionals involved, and the pros and cons of home-based versus school programs. Parents find guidance that gives them confidence to evaluate and choose the best program for their child with autism.

Point to Happy

"One day Jack asked me, 'What color do you see for Monday?' 'What?' I said distractedly. 'Do you see days as colors?'" Raising five children would be challenge enough for most parents, but when one of them has been diagnosed with Autism Spectrum Disorder, life becomes a bit more chaotic, a lot more emotional, and full of fascinating glimpses into a unique child's different way of thinking. In this moving memoir, Carrie Cariello invites us to take a peek into exactly what it takes to get through each day juggling the needs of her whole family. Through hilarious mishaps, honest insights, and heartfelt letters addressed to her children, she shows us the beauty and wonder of raising a child who views the world through a

different lens, and how ultimately autism changed her family for the better.

Ten Things Every Child with Autism Wishes You Knew

In a Different Key

After years of treating patients and analyzing scientific data, Harvard Medical School researcher and clinician Dr. Martha Herbert offers a revolutionary new view of autism and a transformative strategy for dealing with it. Autism, she concludes, is not a hardwired impairment programmed into a child's genes and destined to remain fixed forever. Instead, it is the result of a cascade of events, many seemingly minor.

Educating Children with Autism

Based on 25 years of working with children with ASDs Magnusen contends that teachers who can blend the 'science' of education methodology with the 'art' of teaching are best able to reach these children. She takes a fresh look at established and more recent teaching methods and then explores why, when and how these techniques should be applied.
